# BRECKS HIGH GRADE SEEDS

EVERYTHING FOR FARM, GARDEN AND LAWN

1822-1917

JOSEPH BRECK & SONS, (CORPORATION) 51 AND 52 NORTH MARKET ST., BOSTON, MASS.

## Breck-Robinson Nursery Co.

ESTABLISHED 1912

A new adjunct to the BRECK ORGANIZATION that has attained an enviable position in the Nursery Trade of New England. Attractive Nurseries and Trial Grounds are readily accessible from all parts of the Metropolitan District, by Railroad, Electric Cars and Automobile. Only ten miles from Boston.

Growers and Importers of

### HIGH GRADE TREES AND PLANTS

Complete plans and estimates for all classes of Landscape Development and Forestry Service. Illustrated catalog free on application.

MUNROE STATION LEXINGTON

51-52 N. MARKET ST. BOSTON

### BRECK'S BUREAU

LOCATED AT 53 FRANKLIN ST., BOSTON

Supplies through its MERCANTILE DEPARTMENT approved Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Janitors, Watchmen, Hotel Help, Engineers, Firemen, etc., Help for Institutions and Hospitals, and through its WOMEN'S MERCANTILE DEPARTMENT approved Women Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Women for Office Work, Matrons, Nurses, etc. Hotel Employees for all positions.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining. Rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than can any house not having our resources. The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.

On application we will mail circulars descriptive of our Bureau, and blank forms whereon employers and employees can state particulars necessary to guide us in supplying their wants.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we recently secured commodious quarters at 53 Franklin Street, which we fitted up in an appropriate and attractive manner. Here our Manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

Bear in mind that no person is sent out from our Bureau whose previous record for character and habits has not been carefully investigated and approved.

Yours respectfully,

Telephone, Richmond 2360

### Breck's Horticultural and Agricultural Registry

Employers and employees in these lines will be served at 51 and 52 North Market Street, as formerly, where competent assistants will use every endeavor to give satisfaction to all who favor us. Approved GARDENERS, FLORISTS, FARM MANAGERS, COACHMEN, SUPERINTENDENTS OF COUNTRY ESTATES, PUBLIC AND OTHER INSTITUTIONS, MEN FOR GENERAL WORK ON COUNTRY PLACES, etc., will here find prompt, efficient and courteous service, while employers of such help can rest assured that only persons who have been deemed worthy of entry in our register will be recommended to them.

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it cannot be better expressed than through a liberal use of the facilities we offer.

## Announcement and Invitation

N 1912 our Vice-President, Mr. Luther Adams Breck, and his wife, spent several months in Holland where they had ample opportunity to become acquainted with the most noted growers of Bulbs, their methods and their wonderful productions.

Mrs. Breck was so fascinated by the fields of glorious color and the whole atmosphere surrounding the growing of these beautiful flowers that since her return to this country she has conceived the idea of reproducing something of what she saw on the other side-a Dutch Garden with its setting of meadow, waterside, hedges and evergreens, surrounding a small thatched house of modest mien.

So last Autumn, encouraged by one of the leading growers of Leiden, who had confidence in Mrs. Breck's ability to make the Gardens a success, we reserved for her use a delightful spot on the shore of the pond at our Nurseries.

But we will let Mrs. Breck speak for herself and tell you about her aspirations and plans:

"The opening of my Trial Gardens at Lexington, in the spring, marks the realization of a desire cherished ever since my delightful sojourn in Holland at that most entrancing season of the

year when spring bulbs are in bloom!

"There has always been a demand for the best quality of bulbs in England and, notwithstanding the growing appreciation and enthusiasm in the past few years in this country for the more refined varieties, it has been my wish to encourage and stimulate interest here by growing in a quaint garden, of Dutch atmosphere, a choice selection of the old favorites and the loveliest of the newer sorts, together with a few seedlings, novelties and exclusive importations not offered by the trade. This rare advantage is made possible only through the interest and kindness of my friends in Holland, who are willing to hold in reserve for me limited quantities of their best and largest bulbs. These are selected from their choicest stocks and can be supplied only until the middle of July before orders for the regular Trade are filled. It is necessary, therefore, for my customers to place all orders for these extra quality bulbs before the middle of June.

"As I shall import only to order, I am able to exhibit at Lexington a far wider range of the finer and more expensive varieties than if I carried large stocks, for there is no danger of surplus bulbs being left on hand at the end of the

season.

"Prices will be quoted, if desired, on any varieties not included in my special list of Hyacinths, Tulips, and Narcissi; orders may also be placed for new and superior seedlings of Crocuses and the miscellaneous spring flowering bulbs so attractive for rock work and borders.

"At my Trial Gardens visitors have the opportunity of studying the form and characteristics of the individual flower, and of selecting color harmonies which will reflect in their gardens some-

thing of their own personality. The Darwin Tulips, particularly, offer unlimited scope in creating exquisite color effects. The beauty of their pastel tones fills one with a passion for arranging soft color contrasts, isolated groupings against dark backgrounds or intermingling with other hardy flowers in the border.

"There will be in the Spring some thirty or forty thousand bulbs in bloom. The Daffodils, Hyacinths, and Early Tulips are in flower ordinarily from the end of April to the middle of May, while the Darwins and late Tulips come from the middle of May to the middle of June.

"Notice will be sent, on request, of the exact dates upon which the flowers are to be seen at their best. Visitors are welcome on any week day. Tea is served on the Terrace under the trees."

#### MARGUERITE BRECK.

My garden is located on the grounds of the Breck-Robinson Nurseries, Lexington (Munroe Station), Mass., where letters or inquiries may be addressed to me. Telephone: Lexington, 260.

it may be reached by motor over the Paul Revere Route, via Massachusetts Avenue from Boston through Cambridge.

By train from the North Station.

By any Electric Car connecting at Harvard Square.

## Golden Giant

(DE LUE'S)

## Sweet Corn

The most important Horticultural acquisition of recent years. Awarded a SILVER MEDAL for povelty and excellence by the

before been awarded for Sweet Corn.

Golden

Golden

Cross Section of Golden Giant Corn

Cross Section of Golden Bantam Corn

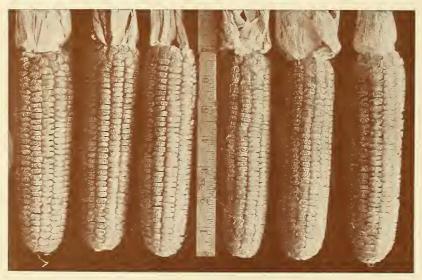

GOLDEN GIANT is the result of eleven years' selection by Dr. Frederick S. DeLue of Boston, Mass., from the product of "Howling Mob" crossed with "Golden Bantam."

Golden Giant, with its 12 to 16-rowed ears, gives nearly four times the yield per acre that the Golden Bantam does with its smaller 8-rowed ears. The stalks are short and frequently produce two ears each.

It is richer in color, more delicious in

flavor and is equally early.

When you experience the satisfaction of sinking your teeth into this tender, juicy Sweet Corn of most attractive orange golden color and realize how early it is and how productive, we are sure you will appreciate the thoughtful care and labor Dr. De Lue has expended during the eleven years required for the perfection of this corn and agree with us that he deserves a high place in the annals of Horticulture and Agriculture.

Golden Glant Sweet Corn

To introduce the Golden Giant we offer a limited quantity in packets containing 25 kernels each at

#### 25 cents the packet

Postpaid anywhere in the United States or its possessions.

but the supply this year being so small we cannot furnish more than four packets to any one customer.

Our 170-page Annual Catalog and Gardener's Guide, 450 illustrations, several colored plates and cultural directions, will be mailed on application.

### JOSEPH BRECK & SONS

New England's leading Seed Store for nearly 100 years

51 and 52 NORTH MARKET STREET

BOSTON, MASS.

#### To Our Friends and Customers

\$7 \$2

OR nearly a century the Brecks (father, sons, grandsons and great-grandsons) have striven to furnish the choicest seeds, the most up-to-date implements and machines and to give the best possible service in every department of their business. In this they have been ably seconded by men carefully selected and especially trained for the purpose.

From Joseph Breck's garden in Lancaster, Massachusetts, and the little Boston seed store of 1822, the business under this management has attained to very creditable proportions, occupying at present warehouses in Boston with a floor space of 80,000 square to connection with Mr. A. F. Pohinson, operating purposters and tale beyonds in Lorichtee

feet, and in connection with Mr. A. E. Robinson, operating nurseries and trial grounds in Lexington covering 88 acres.

Our business has grown proportionately; employing over 250 persons during the busy months.

The practice of dealing honorably and liberally with customers, growers, manufacturers and employees alike, adopted 95 years ago, is rigidly adhered to and will be so long as anyone "by the name of Breck" is connected with the house.

That the expression "Breck's Seeds are Best" has become a common saying among cultivators is not to be wondered at when one thinks what the intensive work of four generations in the same business means. In no line are knowledge and experience more necessary than in the seed business.

From planting to harvest, from harvest to distribution to customers every process is under the supervision of experts. Moreover all seeds that we sell are tested in our laboratory and greenhouses and field-tested in our trial grounds at Lexington so that we KNOW what we are selling. When our friends plant Breck's Seeds or use their Implements, Fertilizers, etc., they do so with the assurance that they are planting and using the best that an experience of 95 years can furnish.

We solicit your favors confident in our ability to serve you faithfully and well.

CHARLES HENRY BRECK JOSEPH FRANCIS BRECK (Grandsons of Joseph Breck) LUTHER ADAMS BRECK
C. HENRY BRECK BRACKETT
(Great-grandsons of Joseph Breck)

JOSEPH BRECK & SONS, Corporation,

Per Charles # Brech Pres

ALTHOUGH the volume of the 1916 crops in the United States was much below the normal, yet their value was record-breaking; amounting to nearly \$9,000,000,000, according to the United States Department of Agriculture, and AGRICULTURE, be it remembered, is the very FOUNDATION OF PROSPERITY.

We should carefully consider, however, what the reduction in volume means; for example, "INSUFFICIENT FOOD MENACES THE WORLD. FAILURE OF 1917 HARVEST WOULD BE A CATASTROPHE. Every nation will have to exercise close economy in Wheat, Rye, Barley, Oats and Corn in order to show margin of surplus food left at the beginning of the next harvest year, according to calculation made by the International Institute of Agriculture in Rome,"

This startling report, printed in a recent issue of the New York Commercial Bulletin, brings forcibly to mind the importance of planting as large an acreage during 1917 as the farm, supply of labor, seed and fertilizer will permit.

A large well-planted home garden is the best way to lower the present abnormally high cost of food and at the same time to increase the general supply, thereby helping, not only the individual family, but the world at large. Fortunately for the farmer and gardener, reliable stocks of seeds, with the exception o Beans, Potatoes, Sweet Corn and a few varieties of Flower Seeds, are in good supply with prices not much advanced over 1916.

Having placed contracts years in advance, and with world-wide sources of supply, we have secured large and reliable stocks of seeds, plants, bulbs and fertilizers, and are now in position to fill orders for Spring shipment with goods of our usual high quality.

Transportation, both by rail and express, is badly congested by the huge volume of business being transacted the country over. Conditions are not much improved over last year, therefore we urge our friends and customers to favor us with their orders as soon as possible after the receipt of this catalogue. We can defer shipment, if requested, but by placing orders early, customers will be reasonably sure of having their favorite selections on hand when planting time arrives.

OUR NURSERY AND SEED TRIAL GROUNDS ARE CONDUCTED BY

BRECK-ROBINSON NURSERY CO., Munroe Station, Lexington, Mass.

Especial Attention paid to Landscape Designing, Planting, Forestry, Horticulture, Etc. Catalogs Free.

### WHITE WONDER MILLET

The seed of this wonderful Millet was brought to this country from China by a Russian soldier who served in the Japan-Russian war. He recognized the many desirable qualities of this Millet and brought a little of the seed to this country.

It has been raised in Western Kansas for several years but this is the first year that it has been produced in sufficient quantities to justify our offering it to our customers.

The most striking feature of White Wonder Millet is the size of the heads. The heads of this variety will run from eight up to eighteen inches and a single head will have as many as 15,000 seeds. The head shown in the illustration measured just twelve inches when straightened out.

The yield of White Wonder Millet is very heavy and this variety will yield fully half again as much as German Millet and some growers state that it will outyield other millets three to one.

Another very desirable feature is its earliness. White Wonder Millet is much earlier than German Millet and is almost as early as Siberian Millet.

The foliage is very heavy and the leaves broad, resembling those of corn. It produces an immense amount of excellent fodder which cures very readily.

On account of the earliness, the immense yield of both grain and fodder, and the very vigorous growth, White Wonder Millet will be in great demand.

Price 12c. per lb.; \$10.00 per 100 lbs.

### **BRECK'S GLADIOLI**

Our acquisition of the entire business of Chamberlain and Co., Gladiolus growers, of Wellesley, Mass., carly last season, makes it possible for us to offer a stock of remarkably fine bulbs. These were grown at Lexington under the direction of Mr. Chamberlain, and include only those varieties which have proved themselves satisfactory both as to form and color. A cordial invitation is extended to our friends to visit our grounds at Lexington during the blooming season (August and September); to those not familiar with these wonderful flowers the striking combinations of color will be a revelation.

Gladioli will succeed in any sunny location; the soil should be reasonably rich, though any soil which will grow potatoes is suitable. The best time for planting is May or June, after the ground becomes warm. Take them up in the Fall after the tops turn brown, and store in a dry place, cool but free from frost.

In addition to the following, many new sorts will be found listed in our special Gladiolus catalog.

## NEW AND CHOICE NAMED VARIETIES

America. A most charming, soft, delicate pink, tinted lavender. 50c per doz.; \$3.00 per 100.

Attraction. Deep rich crimson, with beautiful white throat. \$1.00 per doz.; \$7.00 per 100.

Augusta. Pure white, blue anthers. 50c per doz.; \$3.00 per 100.

Badenia. One of the most beautiful varieties in existence. Was awarded certificates at both Haarlem and London and won a medal at Chicago. The flowers are very large, finely expanded and many open at one time; color a beautiful true lavender-blue. \$1.25 each; \$12.00 doz.

Baron Hulot (Blue Jay). The best blue variety, very large violet blue. 50c per doz.; \$3.00 per 100.

Brenchleyensis. Vermilion scarlet. 50c per doz.; \$3.00 per 100.

Comanche. Vivid scarlet, large spike, tall growing, early flowering variety. \$1.00 per doz.; \$7.00 per 100.

Cardinal King. Bright, cherry-red, of rich tone; large flower. \$1.50 per doz.; \$10.00 per 100.

Clarice. Soft rose pink, flaked with a deeper tint; flowers large, four or five open at one time, spikes straight and strong. \$1.50 per doz.; \$10.00 per 100.

Daisy Rand. Soft rose pink, splashed with a darker tone, the lower petals have a blotch of buff. A most beautiful variety. 15c each; \$1.50 per doz.; \$10.00 per 100.

Dawn. A most beautiful shell pink, slightly pencilled in the throat, a great favorite as a cut flower. \$1.50 per doz.; \$10.00 per 100.

Europa. Snowy white, the finest pure white variety yet offered. Awarded certificate of merit at London, Berlin and Paris. \$1.50 per doz.; \$10.00 per 100.

Giant Lavender, or Mary Fennell. Deep lavender, shading to a paler tint, lower petals primrose yellow with pencilling of lavender. 15c each; \$1.50 per doz.; \$10.00 per 100.

Golden King. Golden yellow with crimson patch on petals, an excellent garden variety. \$1.00 per doz.; \$7.00 per 100.

Halley. Delicate salmon pink predominates with a slight rosy tint, the lower petals bear a creamy blotch with a stripe of red through the centre, the whole producing a delightful effect. 50c per doz.; \$3.00 per 100.

Harvard. Rich velvcty maroon of enormous size. \$1.00 per doz.; \$7.00 per 100.

Independence. Beautiful deep rosy pink, the petals are of a velvety texture and the vigor of the plant enables it to hold its color a long time. It is used extensively for design work. 50c per doz.; \$3.00 per 100.

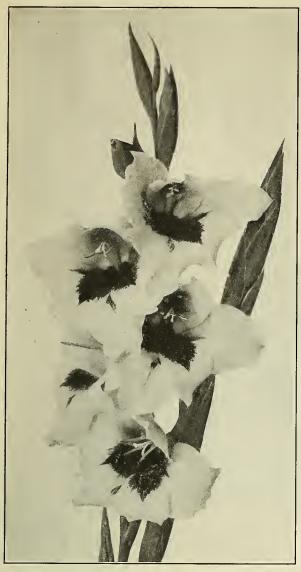

Jean Dieulafoy. Soft cream color with carmine blotch. \$1.00 per doz.; \$7.00 per 100.

Jessie Palmer. Pure snow white, relieved by a patch of glistening carmine, flowers of medium size and graceful form. 15c each; \$1.50 per doz.; \$10.00 per 100.

Lily Lehmann. Glistening white of graceful habit, free blooming. \$1.00 per doz.; \$7.00 per 100.

May. White, flaked crimson, a very useful variety. 50c per doz.; \$3.00 per 100.

When cash accompanies order, bulbs at the single or dozen rate are delivered by parcel post free of charge.

Mrs. Frank Pendleton, Jr.

#### BRECK'S GLADIOLUS—Continued

Mrs. Francis King (The Original). A most beautiful flame pink; immense flowers on a spike, growing 4 feet high, with from 18 to 20 flowers, 6 to 8 open at one time. One of the finest varieties in cultivation. 50c per doz.; \$3.00 per 100.

Mrs. Frank Pendleton, Jr. A most beautiful variety, producing large, well expanded flowers of an exquisite shade of salmon pink, heavily blotched with red in the throat. This variety should be in the garden of all lovers of Gladiolus. 15c each; \$1.50 per doz.; \$10.00 per 100.

Mrs. Malcolm Mackay. Cherry red with a patch of white on the lower petals; very effective and excellent for cutting. 20c each; \$2.00 per doz.; \$12.00 per 100.

Mrs. Watt. Beautiful brilliant wine color. One shade; nice large spikes of well opened flowers; lasting a long time when cut; an excellent variety for decoration purposes. \$1.50 per doz.; \$10.00 per 100.

Navajo. Magnificent bright rich red, blossoms large, six or eight opening at one time, spikes straight and tall and of vigorous growth. \$1.50 per doz.; \$10.00 per 100

Niagara. Color cream, blending at base of petal to a canary yellow, stamens are purple and the stigma pale carmine. \$1.00 per doz.; \$7.00 per 100.

Panama (Seedling of America). Long spike, color deeper pink than America, admired by all who have seen it in flower. \$1.00 per doz.; \$7.00 per 100.

Peace. Beautiful large pure white, tinted with lilac. \$1.00 per doz.; \$7.00 per 100.

Pink Beauty. Beautiful rose pink, very early bloomer. 50c per doz.; \$3.00 per 100.

Pink Perfection. Large blooms, fine form, long spikes. Color, apple blossom pink. A very lovely, soft shade. Altogether one of the most popular varieties. \$1.50 per doz.; \$10.00 per 100.

Premiere. Creamy white suffused with soft crimson, the lower petals bear a crimson blotch, very early bloomer. 50c per doz.; \$3.00 per 100.

Primulinus Hybrids. The colors are most pleasing on account of their delicacy, slenderness and peculiar form. Graceful flowers of medium size with the upper segments somewhat drooped, making a quite distinct hooded form. The flowers range in color from pale, yellow, bright salmon, apricot to light scarlet. \$1.00 per doz.; \$7.00 per 100.

Princeps. Immense wide open flowers of a bright scarlet, marked with white on lower portions which intensifies the brilliant color. 50c per doz.; \$3.00 per 100.

Shakespeare. White with pale rose, good forcing variety. \$1.00 per doz.; \$7.00 per 100.

Spring Song. Pale primrose yellow, suffused with soft pink. The lower petals with blotch of canary yellow. One of the most beautiful of the new varieties. 10c each; \$1.00 per doz.; \$7.00 per 100.

Sulphur King. The finest yellow variety, color clear sulphur yellow, long spike and flowers well arranged. \$2.50 per doz.; \$18.00 per 100.

Wachusetts. Pale apricot suffused with soft pink, throat and lower petals pencilled with a deeper tint of pink. 10c each; \$1.00 per doz.; \$7.00 per 100.

Wm. Falconer. Has a spike of great length and large clear pink flowers. \$1.50 per doz.; \$10.00 per 100.

#### GLADIOLUS MIXTURES

Breck's Exhibition Mixture. A superb collection, giving a wide range of color of wide open flowers, beautifully marked and including many of the named varieties. Especially selected as to combination and blending of colors, so that they may be used for cut flowers as well as for massing. \$1.00 per doz.; \$5.00 per 100.

Breck's Garden Mixture. A good mixture containing almost every shade known in the Gladioli family. 50c per doz.; \$3.00 per 100; \$20.00 per 1000.

Groff's Hybrids. A splendid mixture, flowers of large size, and vigorous growth. 40c per doz.; \$3.00 per 100.

Lemoines Hybrids. Choice mixture. 40c per doz.; \$3.00 per 100.

Where orders are accompanied by cash WE DE-LIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—

Vegetable and Flower Seeds at the package, ounce, ¼ pound, ½ pound and 1 pound prices.

Bulbs at the single and dozen rates. Books and other publications.

See special gladiolus catalog for additional varieties.

## NOVELTIES AND SPECIALTIES

## FLOWER SEEDS AND BULBS

Cyclamen Eileen Low

#### 199. Aquilegia Spurless or Anemone-Flowered

This is a novelty of great merit, especially in the perennial class; it is perfectly hardy and will blossom by Memorial Day. The color is a beautiful light blue. Per pkt. 50 cts.

#### 558. Calendula **Breck's New Giant Orange**

This is a very choice strain, grown specially for us. It is quite distinct from any other variety. The color is a very deep orange. The flowers are extra large and are borne on good stout stems. Per pkt. 25 cts.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:

Vegetable and Flower Seeds at the package, ounce,  $\frac{1}{4}$  pound,  $\frac{1}{2}$  pound and 1 pound prices.

Bulbs at the single and dozen rates.

Books and other publications.

#### 971. Cyclamen Eileen Low

The most extraordinary break which has been obtained in Cyclamen since hybridists commenced to work on the original variety from

A lovely shade of pink (Rose du Barri), a tone of color which so appeals to those of most æsthetic taste; but the great attraction lies in the distinct blush-white margin and blush-white crest on each petal which, on account of the great contrast, gives an attractiveness found in no other Cyclamen.

Price 50 cts. per pkg.

#### **Cyclamen Cherry Ripe** 972. (New Bright Red)

The brightest red Cyclamen in cultivation, of the most free flowering habit. 50 cts pkg.

#### **Gyclamen Pink Pearl** 973.

A very free flowering variety. Lovely pale salmon flowers, foliage hard and prettily tesselated, a delightful color either by day or artificial light. One of the finest in cultivation. 50 cts. pkg.

#### Cyclamen St. George 974. The Silver Leaf Cyclamen

A variety with marbled foliage. The flowers are of a pale salmon pink which contrast well with the foliage of the plant. 50 cts. pkg.

Aster "New Rochester"

#### Aster "Autumn Glory" 346

Color, pure shell pink and similar to Semples pink, except that it has a better and more substantial flower. The plant itself is larger and stronger than the Semples variety. Autumn Glory will bloom after other late Asters and before the early Chrysanthemums are ready. The flowers hold their shape and color for a remarkably long time, making it a most desirable sort for general cultivation, flowering as it does at a time when good flowers are extremely scarce. 20 cts. Pkt.; 2 Pkts. 35 cts.

#### Aster "Vick's Perfection"

This is a great improvement on the mid-season varieties, flowers are exquisite in form and the plants are taller than those of the late upright branching. Average diameter of the blossom fully four inches. Plants are extremely vigorous with unusually broad dark green leaves and stout stems. They carry about twelve large double flowers on long stems free from side branches. When they are in full bloom the flower is strongly whorled with the outer row of petals straight; producing a charming effect, which is quite distinct from any other Upright Asters.

#### Aster "New Rochester"

The new varieties of this type are more double and more Chrysanthemum-like than those of the original Lavender Pink Rochester. The long narrow petals fall over one another in a charming cascade of color, forming a wonderful shaggy mass that cannot be equalled for richness of effect.

347. Lavender Rochester. A beautiful shade of clear light

34%. Lavender Rochester. A beautiful shade of clear light lavender. Pkt. 20 cts. 2 Pkts. 35 cts.

348. Purple Rochester. Rich shade of deep purple. Pkt. 20 cts. 2 Pkts. 35 cts.

349. Shell Pink Rochester. A beautiful shade. Pkt. 25 cts.

2 Pkts. 40 cts.

#### Aster "New Triumph Comet"

A magnificent new class of mid-season Asters with extra long stems and large fluffy full double flowers of the finest type. The introducer considers this variety a very great improvement on the Astermum both in size and quality.

Overmead Garden, Readville, Mass.

Joseph Breck & Sons, Nov. 10th, 1916.
Gentlemen:— Among the collection of Asters I had from you the past season, your New Early Non-lateral Branching and Concord Varieties were excellent. All your Vegetable and Flower seeds were good and true to name

Yours truly,

JAMES METHVEN.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

## 744. **Chrysanthemum New Single Hybrids**

With the introduction of this hybrid, we have a new race which, with the most simple practice, begins to flower in July without any special treatment. The sowing should take place in February or March, transplanting as soon as they are strong enough and the weather will permit. The grower will find all possible shades amongst these hybrids. The plants resemble very much the Marguerite. We are sure this variety will be very popular with every gardener and amateur; they are of high value and strongly recommended. Pkt. 25 cts.

#### 862. Cosmos Giant Blush Queen

A very large flowered and early variety of quite a new type. The color is a beautiful blush, flaked with a rosy lilac tint, deepening towards the centre. The height of the plant is 3 to 4 feet, and the large graceful flowers, borne on long stems, make it an excellent variety for cutting. It is very free flowering. Pkt. 25 cts.

#### 997. Breck's Superb New Hybrids

Saved from a magnificent strain of all the best varieties, they range in color from delicate lavender through all shades to the most intense blue. Pkt. 25 cts.

#### 998. Delphinium "Azure Fairy"

This is a variety which is the result of several years of careful selection; will be found a useful addition to the annual class of plants. The plants grow to a height of about 12 inches, and are covered with a profusion of Cambridge Blue flowers, which resemble the variety blue Butterfly in habit; have been very much admired in the recent International Show in England. Pkt. 25 cts.

#### 1093. Digitalis Purė Yellow

Grows like the other varieties, 4 to 5 feet tall, and has the most beautiful clear yellow flowers. A great acquisition to the Digitalis family. Pkt. 25 cts.

Chrysanthemum, New Single Hybrids

Delphinium "Azure Fairy

#### 1109. **Dimorphotheca Aurantiaca** Hybrida Fl. Pl.

This is a semi-double and double flowering variety. The colorings of this new variety are rich and varied, those of the single sorts ranging from white to light and dark yellow, and from rose to orange, producing about 60% double flowers. Pkt. 25 cts.

#### 1390. Gypsophila Paniculata Fl. Pl.

Seeds offered of this variety produce about 70% double flowering plants, and if the same are sown in January or February, and the seedling transplanted about the middle of April a bright display of bloom can be expected in Autumn. Of course, the effect of an immense quantity of white will be obtained the next year. This is a rare addition to the hardy Perennial and is highly recommended. Pkt. 25 cts.

#### 1482. Hibiscus Grandiflorus Sunset

A beautiful greenhouse plant; flower very large, pale yellow, black centre. Flowers 6 inches across. Pkt. 15 cts, oz. \$1.25.

#### 1483. Hibiscus

#### New Giant Flowering Marshmallow

A greatly improved form of marshmallow or rosemallow. The flowers are of enormous size, sometimes measuring 12 inches in diameter. The colors comprise rich dark red, soft mallow pink and pure white. The plants grow from 5 to 8 feet high and bloom from early July until late Autumn. They are perfectly hardy. If seed is sown early the plants will blossom the first year. Pkt. 15 cts.

## 1991. **Mignonette Breck's Pride of the Market**

This year we have secured what we believe is the best strain of forcing Mignonette ever developed. The seed we offer is grown under glass, and will produce enormous spikes of reddish-green, deliciously fragrant flowers. Pkt. 50 cts.

## 3241. **Pansy Breck's Giant Matchless**

An excellent exhibition strain. Flowers are very large, of great substance with a wide range of the richest colors. A variety unsurpassed for frame culture and does equally as well out doors. Pkt. \$1.00.

## 1252. Gaillardia Breck's Exhibition Strain

This is an exceedingly showy and effective strain of perennial Gaillardia, producing large handsome flowers of various colors, including clear golden yellow, brilliant crimson, edged gold and others banded with gold. Pkt. 25 cts.

#### 1614. Lavatera "Splendens Sunset"

For some years a well known firm of seed growers in England have been working to improve the Mallows and Lavatera. They have succeeded in introducing several very beautiful varieties. We consider Lavatera Sunset the best of the lot, plant growing to a height of from 2 to 2½ feet. An annual; flowers deep rosy crimson, making a most compact and effective bedding plant; also used by many as a cut flower, holding its color and form well for some time after cutting. A great favorite with all flower lovers who have given it a good trial. We hope it will find a place in every flower garden. Pkt. 25 cts.

#### 1709. Lychnis Arkwrightii

A cross between Lychnis Chalcedonica and Haageana, resulting in something different and better than either parent. Has the upright habit of the former with the flower form of the latter, but greatly improved; the weekly growth of Haageana is entirely eliminated. Height 2 to 3 feet, requires no staking; covered with bloom of rich effective colors. A most decided acquisition for herbaceous borders. Will flower first season if sown early; second year attains perfection. As a summer bedding plant it is admirably adapted and will soon command a leading place. Pkt. 25 cts.

## 904. **New Morning Glory Double Snow Fairy**

This is a magnificent and unique flower. It grows as vigorously as the other varieties. It begins to bloom early and continues freely until frost. The flowers appear like large snow white tassels. Upon examination, however, it will be seen that there is a well formed single white morning glory in the centre which is completely surrounded by numerous white petals, the whole forming a most unique and beautiful tassel-like blossom. Pkt. 15 cts., \$1.00 oz.

#### 2104. Nigella, Miss Jekyll

Pure white. This is quite a contrast to the sky blue of the original variety. A valuable flower for decorative purposes. Pkt. 15 cts.

## 2327. **Petunia Velvety Violet Blue (True)**

This is a great acquisition to the Petunia family, and should be grown by all lovers of flowers. It is extensively used in Europe for window boxes. This seed is especially grown for us, and is true to name and color. It grows about I foot high. Pkt. 50 cts.

#### 2483. **Primula Fimbriata Giant Mauve Oueen**

Delicate Mauve, the edge of the petals slightly deeper, with rich green foliage and red stems. The eye of the flower is a greenish yellow, well defined. A strong grower and very free flowering. Pkt. 50 cts.

## 2734. **Schizanthus Bridal Veil**

Grows about 16 inches high and very compactly formed; is entirely covered with glistening snowy white flowers, which present a striking contrast to the bright green lacinitated foliage. As potted plants these cannot be over-estimated, and will surely please the growers with their handsome appearance. Pkt. 25 cts.

## 2929. **Streptocarpus Breck's New Giant Mixture**

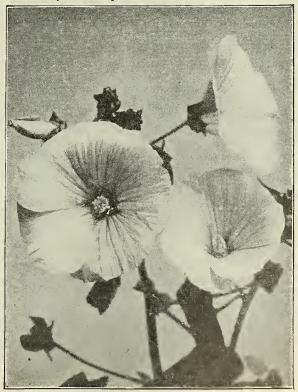

This strain is specially saved for us in England. Without doubt one of the finest strains of this beautiful plant ever sent out, including the charming varieties raised and shown by Mr. Edwin Beckett, and a fine selection of some of the best hybrids raised from Messrs. Veitch's strain, embracing the newer and rarer shades of red and the clear throated varieties. Pkt. 50 cts.

## 1425. **Sunflower Miniature Golden Fleece**

The cactus shaped flowers are of a clear golden yellow, with a dark centre, long stems, excellent for cutting. The height of the plant is 3 to  $3\frac{1}{2}$  ft. Pkt. 25 cts.

## 3199. **Verbena Grandiflora, Helen Willmott**

This variety of Verbena is without doubt the very finest under cultivation and is unequalled for bedding. The flowers are very large and the color is a beautiful bright salmon rose with white eye. Pkt. 25 cts.

Lavatera "Splendens Sunset"

SWEET PEAS

New Early Flowering Long Season Spencers

The following new varieties of Sweet Peas begin to blossom 106 days after planted at the planted at the seed in the open ground; six weeks earlier the seed of the seed planted at the same time. They usually blossom for four full months.

- 4072. Early Morning Star. The color is a deep orange-scarlet or flame color in standard, with rich orange-pink wings. It does not burn badly out in the open and under glass is magnificent. The flowers are large and of the best Spencer form, and borne in threes and fours in wonderful profusion ..... 25c. per pkt.
- 4073. Early Song Bird. The flower is the same color as Florence Morse Spencer. The placing of the flower is splendid for packing and they are borneon long stems in threes and fours. We think this will be the leading pale pink for florists. .....25c. per pkt.
- 4071. Early Melody. This is a deeper shade of pink than Early Song Bird, on white ground, closely resembling Countess Spencer. It is very free flowering and sure to be a favorite ... 25c. per pkt.
- 4070. Early Spring Maid. The color is a light pink on a cream ground and the blossoms have the same splendid characteristics as "Mrs. Hugh Dickson" for a florist's flower. It is a most effective flower, and like the other Early Flowering Spencers now being offered it carries a great wealth of blossoms borne in fours on long stems ...... 25c. per pkt.
- 4074. Early Snow-Flake. This is the best Early Flowering white-seeded White Spencer we have seen. The blossoms are very large and of the best-waved Spencer form. The flowers are borne in wonderful profusion on long stems. As a market variety it will be in great demand...... 25c. per pkt.
- 4075. Early Heather Bell. This will be one of the most popular shades with all florists, as it will be so useful for making up for any occasion. The flowers are very large on long, stout stems. The color is a rich but pleasing mauve. After standing in water the color becomes a beautiful mauve lavender...25c. per pkt.

## SWEET PEAS NOVELTIES AND NEW VARIETIES

3980. Fiery Cross (1916). "Fiery Cross" has all the appearance of live fire, the color being a scorching fire-red or scarlet, without any shading, and which scintillates and glitters in bright sunlight, thus adding a glowing fire-like sheen which radiates over the flower. Unlike most orange-scarlet varieties it does not scorch or burn even during extended periods of intense sunshine. 25c. per pkt.

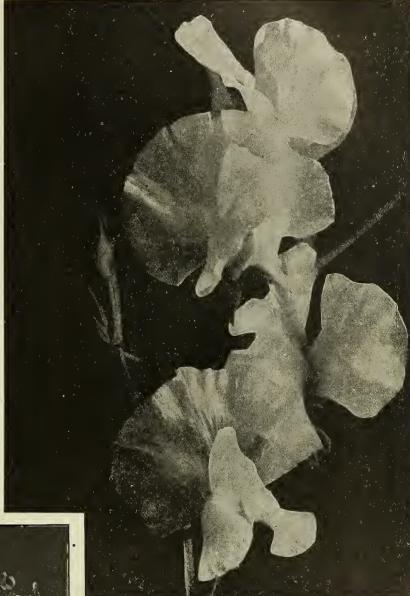

3985. Farnham Lavender (1916). Pure lavender self, very free, giving mostly four flowers well placed on fine long stems ........................25c. per pkt.

3990. Hilary Christy (1916). Standard frosted orange-cerise with crenulated fiery-scarlet edge, wings rosy-carmine, keel delicate fawny-lemon; its rich though subdued colorings are very chaste and refined. The plant is strong-growing and very free flowering, producing its large, beautifully-shaped flowers on long, strong stems..............25c. per pkt.

3995. Lord Fisher (1916). A rich, red maroon without a tinge of purple shade in wings or keel. A strong grower, giving four flowers to a stem, well placed and of full exhibition size.......25c. per pkt.

3990. "The President" (1916). The name given this magnificent Novelty is most appropriate, as amongst orange-scarlet Sweet Peas it undoubtedly takes top place. The intensely rich and dazzling orange-scarlet color of the flower equals in brilliance the Oriental Poppy. Large and true Spencer form. Both for exhibition and garden decoration "The President" is the most striking and valuable addition to Sweet Peas that has been offered in recent years 25c. per pkt.

One packet of each of the above or five varieties for \$1.00, Post Paid.

Snow=Flake

### Begonias-Winter Flowering

Every spring we import from England a fresh stock of these beautiful plants, and each year the demand for them is greater. For the greenhouse or conservatory they are unsurpassed. All who saw the beautiful plants of this type at the 1916 Chrysanthemum Show in Horticultural Hall, Boston, Mass., could not help but admire them. Upon request we will be glad to furnish special culture directions.

## GREEN MOUNTAIN PEDIGREED SEED POTATOES

These Potatoes have been bred and grown for us by Arthur W. Gilbert, Professor of Plant Breeding at Cornell University, and author of a recent book on the "Potato." The very latest methods of hill-selection were used in producing this remarkable strain.

The ideal hill is the hill that produces the maximum number of smooth, uniform tubers of marketable size. A hill may produce one or two excellent potatoes and many small ones. Hence, the hill and not the individual tuber is the true unit of selection.

Several times during the growing season the fields are carefully gone over in order to mark the hills that show most vigor. At digging time, the potatoes of any hill that fails to meet the standard of uniformity and high yield are discarded for seed purposes. Professor Gilbert has bred these potatoes for several years on the Gilbert Farms and his seed stock has given entire satisfaction wherever used.

In the basket shown below at the right, are some of this seed which took the Grand Sweepstakes Prize at the National Corn Exposition.

Unselected

Hill Selected

From the same field

#### **GREEN MOUNTAIN**

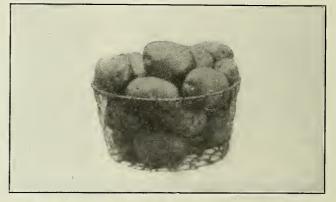

is the variety which in New England at least has superseded other sorts as the main crop table potato. It is a large, handsome, whitefleshed tuber that cooks dry and mealy; moreover, it yields well on all types of soil.

### FIRST OF THE SEASON

New Extra Early English Grown Wrinkled Pea

Prolific, extremely early, blue wrinkled variety. Growing about 30 inches high, vines stout and vigorous, pods large, containing on an average eight peas of the most delicious flavor.

We have secured a part of the originator's 1916 crop, which was very limited, and since we wish as many of our customers as is possible to give this variety a good trial during 1917, we are offering it only in large sealed packages and in no other way. We hope you will include at least one of these trial packages in your Spring order.

In sealed packages only, 25c. each, postpaid.

#### BRECK'S TEWKSBURY DWARF HORTICULTURAL BUSH BEANS

Due to the unusual beauty and size of its pods, this variety brings consistently higher prices than any other Horticultural Bean sold on the Boston Market. When ready to pick, the yellowish surfaces of the pods are beautifully marbled and splashed with bright crimson. The vines bear great numbers of long pods, inclined to curve slightly, generally containing six beans each, although seven are not unusual. Until they have attained full size the pods are comparatively dull and inconspicuous, the color intensifying rapidly as maturity is reached. It is characteristic of the vines to throw out tendrils like those of pole beans, but the plants are distinctly dwarf and upright, displaying no tendency to climb or sprawl over the ground. The variety was developed by Mr. French, of Tewksbury, Mass., some years ago; since then its growth has been confined to certain localities in the neighborhood of Boston. It is the leader of the Horticultural Bush Beans and may be distinguished easily from other varieties. In the cut at the top of the page a single plant is shown; the pods at the left are actual size. Our seed stock, which is of the original strain and true to type, is grown expressly for us by one of the most experienced bean specialists in this State. Pkt. 15 cts., Pt. 35 cts., Qt. 60 cts.

## BRECK'S CRACKERJACK WAX BUSH BEANS

For about ten years this Bean of great merit has been a money-maker for market gardeners in the West. We feel confident that when the variety becomes generally known, its merits will make it a leader on New England markets. It is a profuse bearer and the beans ship remarkably well. The plants are strong and erect, bearing bunches of pods well above the ground. The pods, which ripen fully as early as those of Wardwell's Kidney Wax, resemble them in shape, but are rounder and more fleshy; they are of a handsome, bright golden yellow peculiar to the variety. The beans are yellow.

Pkt. 15 cts., Pt. 45 cts., Qt. 85 cts.

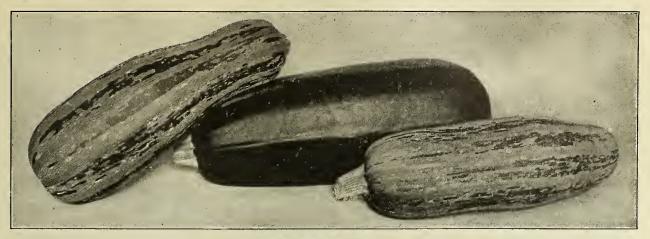

Nov. 22, 1916.

Jos. Breck & Sons, Boston, Mass.

Gentlemen: — The seeds you sent me last spring have proved very satisfactory, especially Old Glory Pea. It is a splendid early variety.

(Signed) ALFRED B. CROSS, Supt. E. G. Howes Estate, No. Cohasset, Mass.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

Boston Greek Squash

#### **Haco Cabbage**

The earliest Danish Red Cabbage, heads round "solid as a bullet," weighing from 8 to 10 pounds. Our seed stock from the originator at Copenhagen, Denmark. All who prefer the Red Cabbage should give "Haco" a good trial. We can recommend highly "Haco," having given it a careful test in our seed trial grounds at Lexington.

Pkt. 10 cts., oz. 75 cts., 1/4 lb. \$2.50.

#### Copenhagen Market Cabbage

The only large, round-headed Cabbage which is really early; it matures positively as soon as Charleston Wakefield. The short-stemmed, compact, yet vigorous plants, have few outer leaves and may be grown close together, insuring very large yields. Heads of this variety are unusually solid, often weighing ten pounds each; they mature all at the same time and are of excellent quality. Commercial and private growers alike agree that in its class Copenhagen Market Cabbage is supreme. Pkt. 10 cts., oz. 50 cts., 14 lb. \$1.75, lb. \$6.00.

#### **Boston Greek Squash**

A very desirable Summer bush Squash introduced by our friends from Southern Europe. The fruits are oblong and average about 12 in. in length; color, dark green, often striped or mottled with lighter green or yellow. They may be prepared for the table in the same way as is any Summer squash, but are most delicious and palatable when sliced and fried like Egg Plant. Picked young and cooked in this way, the Greeks and Italians esteem it a great delicacy.

We grew it during the past Summer in our trial grounds at Lexington and consider it a most desirable addition to our list of squashes.

Pkg. 10 cts., oz. 50 cts., 1/4 lb. \$1.75, lb. \$6.00.

#### Honey Dew Musk Melon

A large, light-colored, smooth-skinned melon having a rather unusual shape and appearance. The fruits often weigh from 8 to 10 lbs. each and have a thick, light green flesh. Delicious honey-like flavor.

Pkg. 10 cts., oz. 50 cts., 1/4 lb. \$1.50.

#### **Breck's Balshire Tomato**

This variety resulted from crossing Balch's Fillbasket and Lister's Prolific. It is far superior to the latter parent in that it is a heavier cropper, of better shape, and shows less tendency to crack. In a recent trial under glass some of the plants carried at least 40 lbs. of fruit. We recommend it strongly either for forcing or for out-door culture.

Per Pkt. 25 cts.

## Breck's Market Garden Danver's Half-Long Carrot

Our market garden seed is the choicest stock from a most carefully developed strain of this popular variety. The rich, deep orange roots, averaging from six to eight inches in length, taper gradually to a blunt point and are exceptionally smooth and handsome; their crisp, tender flesh is of fine flavor. Being of medium length, the roots are easy to dig. This variety adapts itself readily to all types of soil and is enormously productive.

Pkt. 10 cts., oz. 25 cts., 1/4 lb. 60 cts., lb. \$2.00.

#### Barker's Strain Edmand's Blood Beet

A superior strain of Edmand's Blood Beet; uniform in size and of splendid shape and color. Its flesh, which is usually tender and free from any stringy or woody characteristics, is of a deep crimson ringed or marked in a beautiful manner, making it most attractive when sliced for the table. In the latitude of Boston this strain may be sown as late as July 20th with good results.

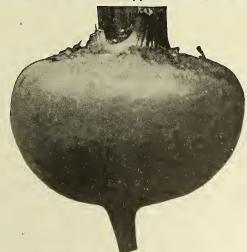

Customers wishing a finely-flavored, early beet should include some of this seed in their order.

Pkg. 10 cts., oz. 20 cts., 1/4 lb. 60 cts., lb. \$2.00.

#### Breck's Arlington Grown Crosby's Egyptian Beet

An extremely early, special strain of this well-known variety. The roots are smooth and very uniform in shape and color; their sweet, fine-flavored flesh is unusually tender. For market-gardening purposes our strain is most desirable.

Pkt. 10 cts., oz. 25 cts., 1/4 lb. 75 cts., lb. \$2.50.

Arlington Grown Crosby's Egyptian Beet

Harvesting Mondamin Corn on World's End Parm

#### **Breck's Mondamin Corn**

This is a variety particularly adapted to New England conditions, since it will ripen in an average season within 100 days after planting. Although we have offered Breck's Mondamin Corn for some ten years, the demand for seed far exceeds the supply.

Breck's Mondamin is an eight-rowed yellow flint Corn. The kernels are large, and the ears, many of which reach a length of 15 inches, are filled to the very tips. The stalks are firm and solid, averaging about nine feet in height. It has been definitely established that this Corn, which produces 18 to 20 tons of fodder. per acre, yields greater food value than some of the mammoth dent varieties which produce 25 to 28 tons per acre. This greater concentration of nutriment is an important factor in maintaining the efficiency of the silo. Our stock has been grown from selected ears, in Massachusetts, about thirty miles north of Boston.

Qt. 25 cts., Pk. \$1.25, Bu. \$4.00.

#### Pilot Pea

An extra early, round-seeded or smooth Pea. Can be planted as soon as ground can be worked. Pods as large as the Gradus, very prolific, highly recommended as an extra early market sort.

Pt. 25 cts., Qt. 45 cts., Pk. \$3.00.

#### Pioneer Pea

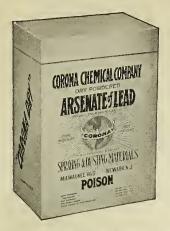

An improvement on the popular Laxtonian. Vines about 20 inches high, color light green. Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than Laxtonian.

Pt. 35 cts., Qt. 60 cts. Pk. \$4.00.

#### **Quite Content Pea**

Considered the latest maturing variety in cultivation. Quite Content was of English origin and known in England as the Giant Podded Main Crop Marrowfat. The pods are larger and longer than any other sort, but closely resembling Alderman in general appearance. Of good quailty, prolific, rank growth of vine requiring plenty of room for best development. Pods are usually borne in pairs.

Pt. 30 cts., Qt. 50 cts., Pk. \$3.00.

## "CORONA DRY" Arsenate of Lead

The "Standard" for Convenience, Economy, Efficiency

### For Applications with Water on Fruit Trees, Potatoes, etc.

#### Largest and Most Progressive Growers have Rendered the Verdict

The ease with which Corona mixes in water makes preparing for the spraying application a simple as well as accurate operation. It is unnecessary to make a paste of Corona and pass it through a strainer to know that the lumps are thoroughly broken up. Experience has shown that it is only necessary to shake the proportional amount of Corona into the spray tank and the agitator will quickly make an even and smooth mixture. For example—in spraying for codling moth, fill the spray tank with 50 gallons of water; weigh out one pound of "Corona Dry" and shake it into the tank; a short period of agitation will give a thorough mixture ready to apply on the trees. A measure sufficient to hold the proportional amount of Corona to the water in the tank will do away with the weighing each time.

It is distinctive for quick poisoning—even application and great adhesiveness.

Its purity and unusual chemical activeness give it highest poisoning power.

Its fineness of subdivision and great suspension properties not only make "Corona Dry" cover more thoroughly, but cause it to adhere to the foliage longer.

One pound of "Corona Dry" will do the work of three pounds of paste and do it better.

It can be kept indefinitely—will not freeze, dry out, cake or lose its strength.

"Corona Dry" contains no water, therefore there is no shrinkage, seepage or evaporation.

It is pure, containing nothing but Lead Oxide and Arsenic Oxide. Every package contains full net weight.

#### Prevent Insect Pests on Vegetables, Fruits, Flowers, Shrubs and Trees

Try the best known method of protecting your plants. Use "Corona Dry" dusting powder and put an end to insect pests. This universal insecticide prevents their getting a start, or destroys them after they appear.

Ideal for the home garden, small and large fruits, flowers and ornamental trees and shrubs. Kills all leaf-eating insects on ornamental and fruit trees. Does not "burn" the foliage.

#### BEST FOR POTATO BUGS

Superior to Paris Green because it covers the plant much more thoroughly. You can do the work twice as fast. It gets under the leaves better and kills the hidden bugs. Rain does not wash it off easily. "Corona Dry" is applied in dry dust form with a Hand Duster. The work can be done at any time of day. Keep it on hand. Will not lose strength. Absolutely safe to use. "Corona Dry" kills Corn Ear Worms, Currant Worms and dozens of other pests.

SEND FOR CORONA BOOKLET "GARDEN PESTS AND THEIR CONTROL."

## Corona Dusting Sulphur for Fungus Pests

### Pure Refined Superfine Flour Sulphur

#### No Other Ingredients

This pure sulphur is especially prepared for dusting. It can be used for all purposes of commercially pure sulphur. There are many insects, and even more fungus diseases, that have no known remedies at the present time. The fungus diseases are the harder of the two to handle, but some of the most common ones can be easily controlled by the use of an efficient sulphur product.

METHOD OF APPLICATION:—"Corona Dry" and Corona Dusting Sulphur are applied to growing plants, trees, shrubs, etc., in exactly the same way. The dry powder is placed in the powder reservoir of the powder gun, or duster, and is blown over the foliage. The dust is so light, fine and uniform that it comes out in a cloud, and spreads over the plant much more rapidly than wet sprays can be applied. The foliage and fruit is covered with the protective dust very completely, and in about one-fifth of the usual time. The dust sticks just as well as a wet spray, and gives a much more even and thorough covering. In fact, dusting methods have proven far superior to wet methods for control of many insect injuries such as codling moth, etc., and the danger due to injury from "burning" has been practically eliminated.

Prices subject to market changes.

### ENRICH YOUR SOIL AND KEEP IT RICH

To Insure a Stand, Enrich Your Soil, Increase the Yield, Always Treat Your
CLOVERS, ALFALFA, PEAS, BEANS, VETCH, SOJA BEANS, COW PEAS, FIELD PEAS, SWEET PEAS AND
ALL LEGUMES

## Inoculation of Legume Seeds with Farmogerm

Is a simple process; no fuss, no bother. Just moisten the seed with FARMO-GERM, pure cultures, allow them to dry, and plant. Seeds for 20 acres can be treated in a few minutes and the results will surprise you. In order to obtain the maximum yield Legume (or pod bearing) crops, seeds must be supplied with Nitrogen-Gathering Bacteria. FARMOGERM supplies these Bacteria, guaranteed alive and efficient, and shipped in a form to be conveniently applied to the seeds. Their use will increase the yield of the crop and make it richer in protein or feeding value. Your stock will relish FARMOGERMED Legume Fodder.

#### Cost of Farmogerm

Extra Farm Size	100 acre <b>s,</b>	\$100.00
Farm Size	50 acres,	50.00
Small Farm Size	5 acres,	5.00
Trial Farm Size	1 acre,	1.50

Always specify crop when ordering.

Insist on FARMOGERM. It insures live, active Bacteria. Cultures in sealed bottles are not to be depended on.

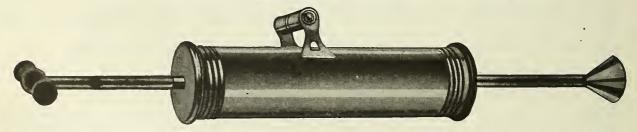

Ask Us for Interesting Literature

Atmospheric Nitrogen is free. The supply is unlimited. Why not make use of it and save the high cost of Nitrogen Fertilizer?

For those who are accustomed to using a culture of legume bacteria in a dry medium and who prefer that type of preparation we can now furnish "ALLCROP FARMOGERM." This contains all the various strains of legume bacteria in a single can and will inoculate any legume crop. In addition it also contains a large number of strains of bacteria which fix nitrogen in the soil independently which makes "ALLCROP FARMOGERM" of benefit to any crop—legume or non legume.

1 Acre Size Can, \$1.00; 5 Acre Size Can, \$4.00. Postpaid.

### THE NEW CORONA HAND DUSTER

The new Corona Hand Duster is a mechanically perfect apparatus which emits powders in clouds of right consistency from any position and in any direction, downward, upward or horizontally. Entirely different principles of mechanics have been brought into play, than have been used heretofore on such outfits. This principle is a pulsating measurement of the dust co-incident with the piston of the pump producing the air jet. It is made of the best materials obtainable. It will last a life time, always giving perfect service. The pump mechanism operates directly within the dust reservoir. Its construction virtually eliminates mechanical friction, the packing being accomplished by the air movement. It is double acting and at each movement of the piston automatically measures and ejects a sufficient amount of dust for that one air pulsation. It is very light in weight and easily held in the hands in the most natural position. A handle is provided for each moving member of the pump so that the direction of the cloud of dust can be easily controlled.

The dust Mixture is placed very easily within the Duster by unscrewing the specially designed cylinder end and sliding it on the tube a sufficient distance from the cylinder. This gives an unusually large opening for filling the cylinder hopper into which a sufficient amount of dust can be placed. It is most convenient to fill the cylinder hopper by using a tablespoon or like utensil. Close the gun by screwing the cylinder end into place, making everything

air tight.

In working the Duster use a very easy short stroke. The gun will give strong action and if worked too hard will throw too much material and be wasteful.

Price, \$2.50 each. Sent by Parcel Post to any Post Office in New England States on receipt of price.

# BRECK'S — HIGH GRADE— VEGETABLE SEEDS

THIS IS OUR NINETY-FOURTH ANNUAL CATALOG. We believe our knowledge and reputation acquired during all these years is of value. Through integrity and experience we have built up a business which stands second to none in reliability, and which is exceeded in volume by that of only one or two concerns in this country. The Golden Roll of Honor attests our ability to serve the gardening and farming public satisfactorily, else we would not be privileged to retain these gentlemen as customers for so many decades. If you want any information regarding horticultural or agricultural matters write us, or better still, call if possible and your inquiries will receive intelligent attention. Our policy is to do business in the good old-fashioned way, giving the best service and selling only goods of the highest quality at fair prices. If you have never dealt with us, surely some of your neighbors can tell you about our goods. If you desire "the best" send us a trial order; one small transaction will convince you.

NOTICE-We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any Nursery Stock, Seeds, Bulbs or plants we sell, and will not be in any way responsible for the crop. If the purchaser does not accept these goods on these terms, he must return them at once, and all payments therefor will be refunded. JOSEPH BRECK & SONS, Corporation.

#### Artichoke

(Cynara Scolymus)

German, "Artischoke."—French, "Artichaut." Spanish, "Alcachofa"

CULTURE. A rich sandy loam is desirable, but any soil made fine by deep culture and enriched with plenty of well-rotted manure will answer. Sow seed in hot-bed early in spring, in rows 6 inches apart; trans-plant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, 2 feet between the plants and 3 feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection until the cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second summer. One ounce of seed will sow 30 feet of drill.

Pkt. Oz. 1/4 lb. Large Green Globe. The best and most popular sort ......\$0.10 \$0.50 \$1.50 

#### Jerusalem Artichoke

(Helianthus tuberorus)

A species of sunflower. A tuber that thrives well upon light, dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an acre. Qt., 25c; pk., \$1.00, net.

#### Asparagus

(Asparagus officinalis)

German, "Sparget."—French, "Asperge." Spanish, "Esparragos"

For prices on Asparagus Roots, see Vegetable Plants.

Although Asparagus is grown satisfactorily on various types of soil, it does best on sandy loams. Two or more years may be saved by planting a bed with roots instead of sowing seed. Roots may be set in the spring in trenches 8 or 10 inches deep and 3 or 4 feet apart, leaving 12 or 15 inches between plants in the row. The bed should be thoroughly worked over to a depth of at least 18 inches, forking in a liberal quantity of manure. It is well to spread the roots over a low mound of fine soil, rather than plant them directly in the hard bottom, of

the trench. Cover the crowns with not more than 2 or 3 inches of moist soil, firming it well over the roots and as the young shoots appear and grow, fill in the trench gradually. Either in the spring or after cutting season, fork in a good dressing of stable manure between the rows. The bed may be cut two or three times the second season after planting, but only a small percentage of the shoots should be taken.

Seed may be sown in drills 2 feet apart and 1 inch deep, as early in spring as the ground can be worked. One ounce of seed will sow 60 feet of drill.

#### BEANS—DWARF OR BUSH

(Phaseolus)

German, "Bohne."—French, "Haricot."—Spanish, "Frijorenano"

To obtain a continuous supply of beans throughout the season, make plantings every two weeks from early May until about the middle of July. Beans are usually planted 2 inches deep in drills sixteen or eighteen inches apart. Many growers claim, however, that larger yields are obtained if three or four beans are planted in a hill, the hills being about eight inches apart in the row. Cultivate frequently, but not deeply, and only when the plants are dry, as earth scattered on the foliage or pods when moist will often cause the development of rust.

One quart of beans will sow 100 feet of drill.

#### Beans—English

(Vicia faba)

German, "Grosse Bohnen."—French, "Feve de Marais."— Spanish, "Haba"

Plant as early in spring as the ground can be worked. The rows should be three feet apart; set the seed in the rows six inches deep, four inches apart. As the pods get formed, top the plants, thereby preventing too much running to vine.

Broad Windsor. Large, seeded, standard variety. Pkt., 15c; qt., 40c.

Stringless Green Pod

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

#### Beans-Green Podded Varieties

For two consecutive years the Seed Bean Crop has been destroyed or rendered unfit for seed purposes by continuous wet weather and early frosts, resulting in a shortage of beans of all descriptions without precedent.

Prices have advanced to a higher level than during 1915. This is especially true of the wax podded varieties. It has been most difficult to obtain even a small percentage of a normal supply of reliable seed stock. The varieties we offer on the following pages have been selected with care. The seed is of good quality and all carefully handpicked. We offer them subject to being unsold and as being the best the season of 1916 has produced.

Rust Proof Golden Wax Bush Beans

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

#### Beans-Pole or Running

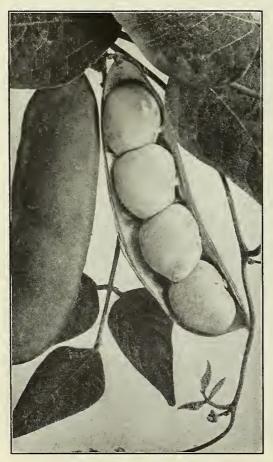

German, "Stangen Bohne."—French, "Haricots a Rames." Spanish, "Jidas"

It is good policy to plant Pole Beans at least a week later than the first planting of dwarf varieties because they are not as hardy. The poles are usually set at the time of planting. Plant four or five beans to a hill, in hills three or four feet apart, each way. Some growers raise the hills a little to insure good drainage. Hillapplications of well composted manure are of value. One quart of Limas will plant 100 hills; one quart of the smaller seeded sorts about 200 hills. All large seeded Limas should be planted eye down to insure quick growth.

We supply packets of beans at 10 cents each.

Breck's Arlington Grown Crosby

#### BEET

(Beta vulgaris)

German, "Runkel Rube."—French, "Betterave."—Spanish, "Beteraga"

Any well-prepared, light garden soil will grow good beets. Sueeessive plantings ean be made from April until the middle of July. Sow in drills about one inch deep and 12 or 15 inches apart. The young plants are usually thinned to four inches apart in the row before they begin to erowd; many gardeners wait until the plants are six inches high so that those removed ean be used for greens. One ounce of seed will sow 50 feet of drill.

Breck's Barker Strain Edmands

Breck's Mammoth Long Red

## MANGEL-WURZEL AND SUGAR BEETS

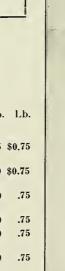

Sow in May or June in rows 18 inches to 2 feet apart and thin to 8 inches in the row. The value of these for stock feeding cannot be over-cstimated. For sheep, dairy-stock, and fattening of cattle, experience has proved the Mangel-Wurzel to be at once healthful, nutritious and economical. From 6 to 8 pounds will sow one acre.

#### SLUDSTRUP BARRES

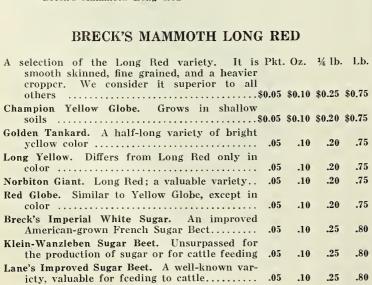

Giant Mangel-Wurzel. The seed we offer is Danish grown and Sludstrup has been repeatedly awarded the highest honors in Danish Agricultural Exhibitions. While the roots do not grow to as great a length as Mammoth Long Red the growth is more above ground, thicker and heavier, frequently weighing 15 pounds and more; color reddish yellow. A most desirable stock feed. Pkt., 5c; Oz., 10c; ¼ lb., 25c; Lb., 75c.

## USE MAPES POTATO MANURE 1916 BRAND

THE fertilizer for Beets, Mangels, Sugar Beets and Carrots.

Golden Tankard

#### Borecole or Kale

(Brassica oleracea, acephala)

German, "Blatterkohl."—French, "Chou Vert."
Spanish, "Breton"

The Kales are very hardy, and make excellent greens for late fall and early spring use. Sow about May first in prepared beds, transplant in June, proceeding as with Cabbage plants. Siberian Kale may be sown late in August and handled like Spinach for spring greens. One ounce of seed will sow 150 feet of drill.

Dwarf Green Curled Scotch. Leaves bright green, closely

Dwarf Green Curled Scotch. Leaves bright green, closely curled, very tender. Quality is improved if the plants are touched by frost before being used. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., \$1.50.

Dwarf Brown. Similar to the preceding but darker color, very hardy. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., \$1.50. Siberian or German Greens. Pkt., 5c.; oz., 15c; ¼ lb., 50c; lb., \$1.50.

Tall Green Curled Scotch. Similar to the dwarf, but more vigorous growth. Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., \$1.50.

#### Broccoli

(Brassica oleracea, botrytis)

German, "Spargelkohl."—French, "Chou Brocoli." Spanish, "Broculi"

Closely resembles the cauliflower, but is hardier. Like Cabbage and Cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. Seed should be sown at the same time and plants receive the same general culture as cabbage. Completes its growth from seed in from 120 to 140 days. Five to ten degrees of frost will not injure the plants when they are approaching maturity. One ounce of seed will produce about 1500 plants.

Pkt. Oz., ¼ lb.

 head
 .10
 .35
 1.25

 White Cape. Like Purple Cape, but of a creamy white color.
 .10
 .35
 1.25

#### Swiss Chard or Sea Kale Beet

This variety is cultivated solely for its leaves. The midrib is stewed and served as asparagus, the other portion of the leaves being used as spinach. Especially desirable for the home garden, as it is a vegetable always ready for use.

Giant or Perpetual. Broad light green leaves.

Dark Green Curled. Leaves large crumpled, white midrib.

Blonde. Broad white midrib, yellowish green leaves. Lucullus. Very large crumpled leaves, general favorite. All 5c pkg; 10c oz.; 30c ¼ lb.; \$1.00 lb.

Lucullus Swiss Chard

Amager Market Brussels Sprouts

#### **Brussels Sprouts**

(Brassica oleracea, gemmifera)

German, "Sprossenkohl."—French, "Chou de Bruxelles." Spanish, "Berza de Brusela"

This interesting vegetable produces small heads resembling miniature cabbages all over its tall stem. The sprouts, either cooked or pickled in the same way as cauliflower, are esteemed a great delicacy. Seed may be sown in May in a seed bed, and the plants afterward set out and cultivated like cabbage. Being small and hardy the sprouts are not in the least injured by frost. One ounce of seed produces about 1500 plants.

#### Chervil

German, "Gartemkerbel."—French, "Corfeuil."

Spanish, "Cerafolio de Cafe"

Chervil Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly in May, in drills ½ inch deep, 1 foot apart. Per pkt., 5c; per oz., 20c; per ¼ lb., 50c.

Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. Per pkt., 5c; per oz., 25c; per ¼ lb., 75c; per lb., \$2.00.

#### Chives

Allium Schoenoprasum. Resembles the Onion in growth and of the same family. Used largely as salad and for flavoring soups. Can be cut repeatedly during the growing season. Pkt., 10c; oz., 50c.

Gentlemen:-

For over twenty years I have planted your seed and l can truthfully state that all seeds were genuine and gave good results. No matter whether I take charge of small vegetable gardens or large gardens my orders are Breck's seeds, for I know the difference, as I have tested other seeds along in rows with the Breck seeds and yours were better in all respects.

Yours truly, F. I. LOGAN, farmer, Parker Farm, S. Framingham, Mass.

Copenhagen Market

Breck's Winchester Savoy

#### Cabbage

(Brassica oleracea, capitate)

German, "Kopfkohl."—French, "Chou Pomme." Spanish, "Berza"

Cabbage will do well in any deep, rich, well-drained, and abundantly manured soil. Sow seed of the early varieties in hot beds about February first, and prick out into other hot beds as soon as the plants are strong enough, or set in cold frames in March. When danger of frost is past, transplant to the open ground. The late or winter crop seed can be sown in seed beds in May and plants set in the field in July. Late varieties are usually planted in rows 30 inches apart with 2 feet between plants; early sorts may be set 15 by 24 inches or even closer. One ounce of seed should produce about 2500 plants.

#### BRECK'S WHITE BOUQUET CAULIFLOWER

Breck's White Bouquet Cauliflower. For early or for main crop, those who have grown it, private and market gardeners alike, agree that Breck's White Bouquet Cauliflower has no peer. It will head when other varieties fail; moreover it is a strain well-adapted for forcing under glass during winter and spring. The plants are comparatively short-stemmed, have small leaves, and produce medium to large close-grained, snowy-white heads of the finest quality. We feel confident that no better strain has ever been developed, and that it is the earliest and most reliable variety for New England. Pkt., 25c; oz., \$4.00; 1/4 lb., \$12.50.

Breck's White Bouquet Cauliflower

#### Cauliflower Brassica oleracca, botrytis

German, "Blumenkohl."-French, "Chou-fleur."-Spanish, "Coliflor"

(Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious member of the cabbage family. Although the ideal soils for this vegetable are well-drained, rich, moist, heavy loams, it will do well in any soil that grows good cabbage. Plants from seed sown in the hot-bed late in February will be ready for the open ground about the first of May. The seedlings should be transplanted as soon as they are strong enough; later, when the time for setting in the field is approaching the plants should be gradually hardened by exposure. For late plants sow the seed sparingly in a well-prepared seed-bed in May, selecting a cool place; treat the seedlings as if they were Cabbage, but exercise greater care. In the field make the rows 30 inches apart and set the plants 18 inches apart in the row. When the heads are forming tie the tops of the leaves together with roffea or soft twine in order to shut out the sun and rain; pure white attractive heads can not be grown without protection.

"Pakeen," Canton, Mass., Jan. 2, 1917.

Messrs. Joseph Breck & Sons, Corp., Boston, Mass.

Gentlemen :-

The past season was a poor one from a gardening stand-point and the garden here is heavy and lies low, but your seeds were satisfactory despite these drawbacks. I have always found them reliable; the unfailing courtesy of your house, coupled with good goods, make it a pleasure to deal with "Breck's."

FREDERICK CAVE.

Breck's Market Garden Danvers Half Long

#### Cardoon

(Cynara cardunculus)
German, "Kardon."—French, "Cardon."

Cardoon is grown for the edible midrib of the leaf, which requires blanching in the same manner as celery. Sow sparingly, early in spring, in drills 1 inch deep and 4 or 5 feet apart; later, thin out the young plants to about 2 feet apart in the row.

Large Smooth Spanish. Grows about Pkt. Oz. Lb. four feet high............\$0.05 \$0.20 \$2.00

Chicory

thin out to six inches apart, treat as Endive until end of summer, when it should be banked up like Celery. The blanched stalks are used as a salad. It is also used as a boiled vegetable prepared in the same way as Cauliflower.

#### **CARROTS**

(Daucus carota)

German, "Mohre."—French, "Carotte." Spanish, "Zanahoria"

Carrots are grown extensively both for culinary purposes and for stock feeding: the "Horn" and medium varieties for the former; the long sorts for the latter use. Fine, mellow, sandy loams, which have been manured liberally for some previous crop, such as potatoes or onions, will produce smooth, well-shaped roots. Carrot seed may be sown towards the end of April, in May, or for late crops for table use, up to the middle of June, in drills 12 or 15 inches apart and not over 1 inch deep. For an early crop sow the "Horn" or medium varieties as early in spring as the ground can be prepared. If a horse cultivator is to be used the rows should be 28 or 30 inches apart. Thin out the plants from 3 to 5 inches apart, according to the variety. As Carrot seed is slow in germinating, cultivation may begin earlier if a little radish seed is sown with the carrot to mark the rows. One ounce of seed will sow 100 feet of drill; 4 pounds,

#### Collards, or Colwort

German, "Blatterkohl."—French, "Chou Cabu." This vegetable is allied to the cabbage family.

Sow seed as for cabbage, at intervals of about three weeks during May, June and July. When a month old, set out the plants in the garden in rows 3 feet apart, leaving 2 feet between the plants. The leaves are esteemed as greens. One ounce of seed will produce about 3000 plants.

Georgie. Per pkt., 5c; oz., 10c; lb., \$1.00.

#### Corn Salad, or Fetticus

(Valerianella olitoria)

German, "Lammersalat."—French, "Mache." Spanish, "Macka Valerianilla"

Sow very early in spring in shallow drills 1 foot apart. For an early spring crop, sow in September and winter over in cold frames, or cover with litter. One ounce of seed will sow 100 feet of drill.

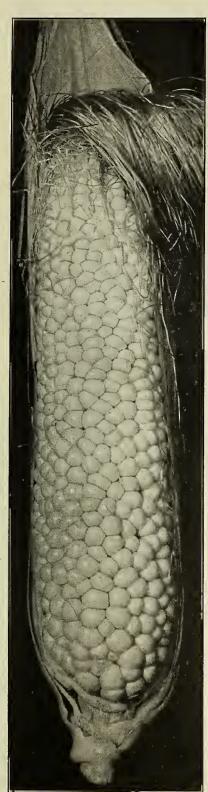

Large-Leaved. Per pkt., 5c; oz., 10c; lb., 80c.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

### SWEET CORN

(Zea mays)

German, "Mais."—French, "Mais."—Spanish, "Mais" Large packets, all varieties, 10c each.

While sweet corn is often grown in hills, experienced gardeners prefer drills. Make the first planting the latter part of May in a rich warm soil; successive sowings should be made at intervals of about ten days until July. Sow in drills from  $2\frac{1}{2}$  to  $3\frac{1}{2}$  feet apart, according to the height of the variety, and thin out the plants to 10 or 12 inches apart in the row. If grown in hills, 3 or 4 feet apart each way gives ample space; never allow more than four plants to remain in one hill.

One quart of seed will plant 150 feet of drill, or about 200 hills.

One quart of seed will plant 150 feet of diffi, of	about	200 IIII	15.

SELECTED EARS, 10c EACH.

Country Gentleman Sweet Corn

#### SWEET CORN—Continued

#### GOLDEN GIANT SWEET CORN

The most important Horticultural acquisition of recent years. Awarded a Silver Medal for novelty and excellence by the Massachusetts Horticultural Society.

Ears twice the size of Bantam, and, being from 14 to 16 rowed, give nearly four times the yield per acre; richer in color; more delicious; equally early.

The result of eleven years selection by Dr. Frederick S. De Lue of Boston, Mass., from a product of "Howling Mob crossed with Golden Bantam."

To introduce Golden Giant we offer a limited quantity in packets containing 25 kernels each at 25c per package postpaid.

For complete description with illustrations, see colored insert in front of catalog.

#### BRECK'S SELECTED MASSACHUSETTS GROWN GOLDEN BANTAM

The most popular variety of yellow sweet corn ever offered; also one of the earliest and hardiest. It can be planted safely earlier than other varieties. The plants rarely grow over 31/2 feet in height, and usually bear at least two ears, 5 or 6 inches long, on each stalk. Many people assert that Golden Bantam is the sweetest of all corns; its plump, rich, cream-yellow kernels are tender, milky, and delicious. All our Golden Bantam seed is Northern grown, making it especially valuable for growth in sections where the summers are cool and short. Pt., 30c; qt., 50c; pk., \$3.00.

SELECTED EARS, 10c EACH.

#### RED COB GOLDEN BANTAM CORN

A true descendant of the Golden Bantam. It was discovered several years ago by Mr. Briggs of Newton, Mass., and on account of its extreme sweetness and tenderness was given the opportunity of proving its worth. The dry seed is of crimson hue but when in the green state if placed side by side with the Golden Bantam, could not be told from it, except that the ears and kernels average somewhat larger. Aside from its sweetness and tenderness, another point in its favor is that the kernels have practically no hulls. The cob is of a decided crimson color and the foliage is streaked with red. Matures at the same time as its parent stock.

> Price per Packet, 30c. Postpaid. Sold only in Sealed Packets.

#### WHITE RICE POPPING CORN FOR SEED

Choice, selected, New Hampshire Grown White Rice. Per lb., 12c; per 100 lbs., \$10.00.

Manchester, N. H., April 6, 1916.

Messrs. Breck & Sons, Boston, Mass.

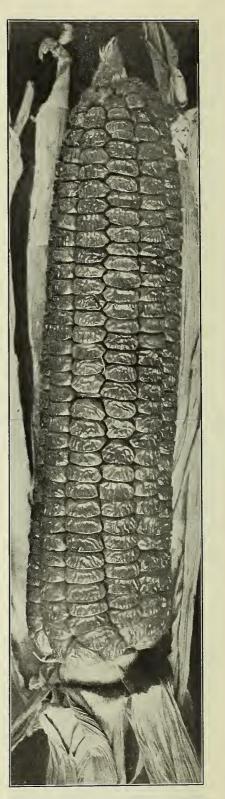

Gentlemen: - Enclosed find order. If I do as well with your seeds this year as last, shall be perfectly satisfied. Had a fine piece of spring wheat and a good catch of clover coming, notwithstanding a bad season.

Wishing you many years of success, I remain, Very respectfully.

MR. ELMER W. ROBERTS,

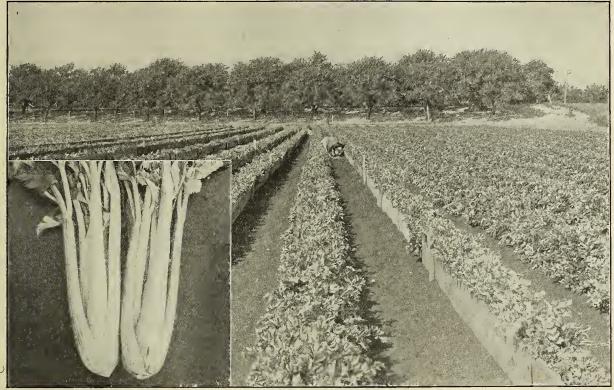

R. F. D. No. 3.

Manchester, N. H.

Breck's Massachusetts Grown Golden Bantam Sweet Corn

For Field and Ensilage Corn see Page 49.

Golden Self-Blanching Celery

#### Celery

(Apium graveolens)

German, "Sellerie,"-French, "Celeri."-Spanish, "Apio" (For price on Celery Plants, see Vegetable Plants.)

Since celery seed is extremely small and rather slow in germinating, it is important that the seed-bed be of good rich soil, thoroughly prepared. About the middle of April sow thinly in a hot-bed or cold frame, in rows 2 inches apart, taking care to cover the seed with not more than 1/8 of an inch of fine soil. Place pieces of burlap over the bed until the seeds have germinated, and water by sprinkling the burlap. When the seedlings are  $2\frac{1}{2}$  or 3 inches high transplant into a moist seed-bed, setting the plants 4 by 4 inches. To ensure stocky plants the tops may be cut back once or twice before setting in the field. Celery does well in any deep, richly-manured soil. Make the rows about 4 feet apart, and leave 5 or 6 inches between plants in the row. Cultivate frequently, but not deeply, to keep down weeds and to conserve moisture. With the advent of cool fall weather, begin to draw earth up about the plants, keeping the stalks well together; continue this process of ridging until late autumn when only the tops of the leaves should remain uncovered. The golden Self-Blanching variety is usually blanched by means of boards 12 or 15 inches wide set on edge on either side of the row. Celery should be stored where the air will remain cool and fairly moist. Simply set the plants close together in an upright position with sevcral inches of soil about the roots. Cold frames, when dug to the proper depth, afford very satisfactory conditions for storing this crop. The frames should be covered with boards, lapped to shed the rain; if sash is used, under the boards, it can be blocked up slightly on mild days to give ventilation. The turnip-rooted variety, which does not require blanching, may be planted in rows about 15 inches apart.

One ounce of seed should produce about 3000 plants.

Breck's Golden Self-Blanching. The variety most extensively grown in all sections of the country, for all purposes, by both market and private gardeners. The plants are compact with abundant foliage, short, thick stems, and large, solid hearts. The stalks, which are rich in flavor, tender, crisp and brittle, may be blanched readily to a beautiful creamy white. Our selected strain of this grand variety is a favorite among commercial growers in this locality. Pkt., 10c; oz., \$1.50; 1/4 lb., \$5.00.

#### Cress—Curled, or Peppergrass

(Lepidium Sativum)

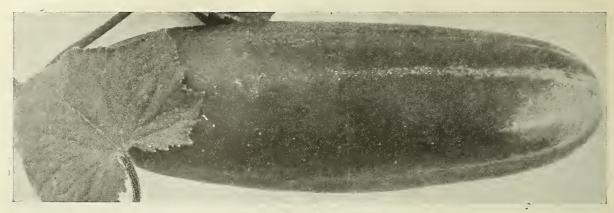

The popular sort. Sow thickly in drills, 1/4 of an inch deep and a foot apart as early in spring as the ground can be prepared. One ounce will sow about 100 feet of drill. Pkt., 5c; oz., 10c; 1/4 lb., 25c; 1 lb., 80c.

#### Upland Cress

(Barbarea vulgaris)
A perennial variety resembling Water Cress. Pkt., 5c; oz., 15c; ¼ lb., 50c; 1 lb., \$1.50.

#### Water Cress (Nasturtium officinale)

This variety succeeds only in damp soils on the border of ponds or streams, or where its roots are partially submerged in water. Seed should be sown about a quarter of an inch deep. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25; 1 lb., \$4.50.

Improved White Spine Cucumber

#### Cucumber

(Cucumis sativis)

German, "Gurken."—French, "Concombre." Spanish, "Pepino"

Seed should be started under glass about May 1st, for an early crop in order to have plants ready to set out in the garden 3 or 4 weeks later when the ground has become thoroughly warm. Plant the seed in paper or earthen pots not less than 4 inches in diameter, in berry baskets, or other receptacles which can be handled easily and carried to the field without disturbing the young plants; leave only the 3 or 4 strongest seedlings in each Well-rotted manure or fertilizers may be dug into the hills a week or two before planting time. In every good soil the distance between hills should not be less than 4 by 5 feet; in less fertile soils 4 by 4 feet will answer. It is generally safe to plant seed in the garden until late in May; for pickles the middle of June is early enough. Cultivate often, and continue as late in the season as is possible without injuring the plants. Always pick cucumbers before they begin to turn white or yellow. One ounce of seed will plant about 50 hills.

English Frame Varieties

These are grown chiefly by private gardeners. They attain a length of from 12 to 30 inches, and are of fine quality.

Tender and True, Blue Gown, The Rochford. Each, per pkt., 25c.

Dandelion

(Taraxacum officinale)
German, "Pardeblum."—French, "Pisse-en-lit."
Spanish, "Amargon"

When growing in deep rich soil cultivated varieties produce large, tender leaves much superior to those of the wild dandelion, both in size and flavor. Sow seed early in May in shallow drills about a foot apart; later, thin the plants to 6 inches apart in the row, and cultivate to keep down the weeds. If blanched with soil the leaves make excellent salad. The plants may be held over winter by covering with litter, after the ground freezes, but before the advent of severe weather.

Egg-Plant

(Solanum melongena)
German, "Eierpflanze."—French, "Aubergine."
Spanish, "Berengena"

(For price of Plants, see Vegetable Plants).

Owing to their extreme tenderness egg-plants should not be set out in the garden much before the middle of June. This vegetable may well be planted in soil heavily manured for some earlier crop such as radishes. Sow in a hot-bed about April first, transplant into another bed, and later shift into 4 or 5 inch pots. In warm, settled weather transfer to the garden, setting the plants 2 by 3, or 3 by 3 feet. Conservation of moisture is important. One ounce of seed will produce about 1000 plants.

Pkt. Oz. ¼ lb. Lb. Black Beauty. Early, fruit jet black, round in form and very solid....\$0.10 \$0.50 \$1.75 \$6.00 Early Long Purple. Differing only in shape from the foregoing;

Hittinger's Belmont Forcing Lettuce

#### Endive

(Cichorium Endiva)

German, "Endivien."-French, "Chicoree." Spanish, "Endiva"

Although endive is sown chiefly in the latter part of July for winter use, an early crop may be started in April. Sow in shallow drills a foot apart in rich, moist soil, and later thin the plants to one foot apart. Unless wanted for soups, the leaves should be blanched when 6 or 8 inches long by tying the tops together around the heart with coarse twine or raffia. This should be done heart with coarse twine or raffia. This should be done only when the plants are dry or they will rot. Moreover, do not blanch the plants faster than they can be used. Blanching usually requires 15 or 20 days. Before freezing weather the plants may be lifted with some earth adhering to the roots, and reset in a cool cellar or shaded cold frame. Stored in this way endive may be preserved well into the winter. One ounce of seed will sow 150 feet of drill.

Pkt. Oz. 4 lb. Lb. Broad Leaved (Escarolle). A very sweet variety for fall and winter use .....\$0.05 \$0.25 \$0.75 \$2.00 Green Curled. The standard sort, suitable for fall and winter..... .05 .75 2.00Moss, or Parisian Curled. A small,

#### Florence, or Sweet Fennel

(Foeniculum dulce)

Fenouil de Florance. Finnochio di Napoli

A delicious Italian vegetable which tastes quite like Celery, but is a little sweeter and more delicate in flavor. The enlarged leaf-bases are usually boiled in preparation for the table.

Sow at intervals in the spring, in rows 18 inches apart. Thin the seedlings to 6 or 8 inches apart in the row, and cultivate frequently. Later, blanch the bottom and stalks by earthing-up like celery. Pkt., 10c; oz., 50c.

#### Kale-See Borecole

### Lettuce

(Lactnea Sativa)

German, "Lattich-Salat."-French, "Laitue." Spanish, "Lechuga"

(For price on Lettuce Plants, see page 43).

Lettuce is the most popular of all salad plants, and, at the same time, is one of the easiest to grow due to its comparative freedom from diseases and insects. While all types of lettuce thrive in properly enriched, loose, light loams, they will grow satisfactorily in any good garden soil; heading varieties, particularly, should never be planted in compact heavy soils. A satisfactory way of starting the early crop is to sow in hot beds in March, and transplant to 2 by 2 inches preferably in flats, which may be transferred to cold frames when the plants are strong enough. Plants that have been properly hardened in cold frames may be set out of doors as early as the ground can be prepared; the rows should be made 12 or 15 inches apart, with plants 1 foot apart in the rows. Seed may be sown in the open from the latter part of April until the middle of August.

Most of the Cos varieties will be of finer quality if blanched by tying the tops together with soft twine or roffea when the plants have nearly attained their growth.

Breck's Boston Market, Big Boston and Hittinger's Belmont are especially suitable for growing under glass.

One ounce of seed will produce about 4000 plants.

Pkt. Oz. ¼ lb. Lb. Big Boston. Suitable for cold frames or open ground.......\$0.10 \$0.25 \$0.75 \$2.00

#### Kohl-Rabi (Turnip Rooted Cabbage)

(Brassica oleracea canlorapa) German, "Kohl Rahi."—French, "Chou-Spanish, "Col de nabo o Nabicol" "Chou-Rave."

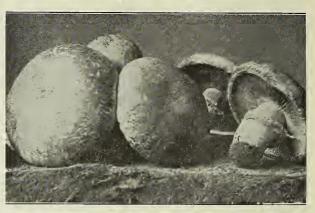

This vegetable, the enlarged stems of which are superior to the turnip in flavor, is closely related to cabbage, and no more difficult to grow. Early plants can be started in hot beds in the same manner as cabbage. Seed may be sown in the garden in May, June and July, in shallow drills 18 inches apart; later, thin the plants to 8 inches apart in the row. Kohl-Rabi should be eaten when about 3 inches in diameter, before the flesh becomes woody. One ounce of seed will sow 150 feet of drill.

#### Mushroom (Agaricus campestus)

German, "Champignon."—French, "Champignon." Spanish, "Hongo"

Mushrooms may be grown in cellars, sheds, under greenhouse benches, or wherever the temperature will range hetween 50 and 65 degrees and is fairly uniform. Fresh stable manure, composed of about equal amounts of horsedroppings and straw or litter, is the best material of which to make the beds. Mix three parts of manure with one part of fresh loam. Before this mixture is used it should he piled in heaps ahout 3 feet high and moistened throughout, but not drenched. Every 4 or 5 days fork the heaps over carefully and tread them down. In from 2 to 3 weeks when the temperature in the heaps has dropped somewhat, the hed should he made. Spread a thin layer of the mixture and tramp or pound it firm; repeat this process until the bed is 10 or 12 inches deep; leave it thus for a few days until the temperature inclined to rise suddenly at first, has declined to about 70 or 75 degrees. Conditions will then be suitable for spawning, which is done by making holes about 3 inches deep and one foot apart each way; into each hole insert a piece of spawn about 11/2 inches square and fill in the hole with compost. In about ten days, when the spawn has had time to diffuse itself through the bed, spread a layer of fine loam over the surface to the depth of 1 or 11/2 inches. A light mulch of straw will help to conserve moisture. Ordinarily, mushrooms should begin to appear in from six to ten weeks and continue to come for about two months. If the surface of the bed becomes dry, sprinkle it with water at a temperature of about 80 degrees. When the bed is apparently exhausted it may often be stimulated to further production by spreading over it ½ an inch of fresh loam and watering thoroughly, using warm water to which sheep manure has been added at the rate of ½ a pound to 3 gallons.

One brick of Spawn is sufficient for ten square feet of bed.

Pure Culture Spawn can be relied upon to produce mushrooms of a uniform type and color. Its use positively precludes all danger of growing poisonous varieties. The culture with which the bricks are innoculated are taken from carefully selected, prolific mushrooms of the most desirable cream white variety-the sort preferred by connoisseurs. There are two kinds of bricks, Direct and Standard; the former are innoculated directly from an original culture; the latter from a pure culture produced from an original.

All bricks are fresh, being received at frequent intervals from the lahoratory.

#### Muskmelon

(Cucumis melo)

German, "Melone."-French, "Melon."-Spanish, "Melon"

Good muskmelons may be grown in almost any soil if it is skillfully handled; a sandy loam that was heavily manured the previous year for some other crop such as onions, or carrots, is ideal. Begin to prepare the soil early in spring. Late in May, when the ground is warm, plant the seed 1 inch deep in hills 5 or 6 feet apart each way, putting in 8 or 10 seeds per hill. Frequent and shallow cultivation is essential to success. Much trouble with insects is often avoided by starting the plants under glass. Plant the seed in berry baskets, pots or other containers from which the seedlings can be removed easily, and without disturbing the soil about their roots.

Tobacco or plaster dust sprinkled on the plants makes them distasteful to insects. The striped cucumber beetle is perhaps the most destructive pest likely to attack melon vines. One ounce of seed will plant about 50 hills; 2 to 3 nounds, 1 acre.

#### Martynia

The seed pods are used for pickling, and should be gathered when green and tender. Although some gardeners prefer to start the plants in hot beds, sowing can be made out of doors late in May.

It is customary to plant several seeds together at 3 foot intervals in rows 3 feet apart. Later thin out so that the plants will stand 3 feet apart each way.

Pkt. Oz. ¼ lb. Lb. Martynia Proboscidia .......\$0.05 \$0.30 \$1.00 \$3.50

Breck's Yellow Globe Danvers Onion

#### Onion

(Allium cepa)

Ger., "Zweibel."-Fr., "Ognon."-Spanish, "Cebolla"

The onion requires a very fertile soil for the best development of its bulbs. While muck and peat soils are ideal, sandy loams properly enriched with well-rotted manure furnish excellent conditions. Onions should always be grown on practically level land, or considerable loss may be sustained from washing. As early in spring as the land can be worked, sow seed sparingly in drills 1 foot apart and about ½ inch deep. Unless the soil is quite moist it should be pressed firmly down on the seed to insure rapid and uniform germination. Weeding and thinning must be done by hand; at the first weeding, thin out to about 8 plants per linear foot of row. Cultivation should be shallow and frequent. When all the tops are yellow the onions are usually pulled and left on the ground, for 10 days or more if the weather is favorable, until the outer skin of the bulbs is dry; after the first three or four days, stir them occasionally with a wooden rake to hasten the process. One ounce of seed will sow 100 feet of drill; from 4 to 5 pounds, 1 acre.

### Mustard

(Brassica)

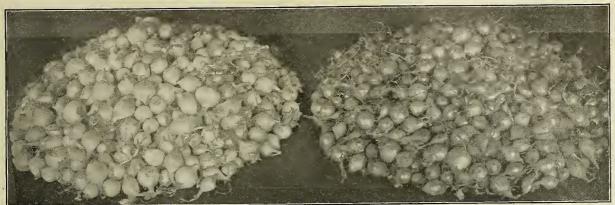

Ger., "Senf."-Fr., "Moutarde."-Spanish, "Mostaza"

Mustard is usually cultivated for salad purposes, but may also be used for greens. Seed may be sown from April to August in shallow drills 12 or 15 inches apart. The leaves should be cut for use when about 2 inches long. One ounce of seed will sow 50 feet of drill.

Egyptian or Perennial Tree, for fall planting		1.00

#### Okra, or Gumbo

(Hibiscus esculentis)
German, "Essbarer."—French, "Gumbo."
Spanish, "Quibombo"

This warm weather vegetable grows freely in any ordinary garden soil. Its tender young seed-pods are used in soups and stews. About the middle of May, sow seed sparingly in drills 3 feet apart and 2 inches deep; later, thin the plants to 12 or 15 inches apart in the rows. One ounce of seed will sow 50 feet of drill.

#### Parsley

(Carum petroselinum) German, "Petersilie."—French, "Persit." Spanish, "Perejil"

Parsley is the most beautiful vegetable grown for garnishing and flavoring purposes. It will thrive in any fertile garden soil; a single row forms an effective edging for beds and walks. Sow early in spring, or at intervals until June, in shallow drills about 1 foot apart; when the plants are 2 inches high, thin out to 6 or 8 inches apart in the row. The seed germinates very slowly, and sometimes three weeks elapse before the seedlings appear. For winter use the plants may be set in protected cold frames. The Turnip-rooted variety should be treated in the same way as Carrots. One ounce of seed will sow about 150 feet of drill.

#### Yellow Onion Sets

#### Parsnip

German, "Pastinake."—French, "Panais." Spanish, "Pastinaca"

Parsnips need a long growing season in order to reach maturity; consequently the seed should be sown early in spring. Any of the lighter types of soil, high in fertility, will grow smooth roots. Sow thickly in drills 15 or 18 inches apart and 1 inch deep; when the plants are well started, thin out to 5 or 6 inches apart in the row. Since parsnips are perfectly hardy, and freezing improves their quality, it is customary to dig in the fall only enough roots for winter use, leaving the balance of the crop in the ground until spring. One ounce of seed will sow about 100 feet of drill; 5 pounds, 1 acre.

Ailsa Craig Onion
(For description see page 38)

#### **PEAS** (Pisum sativum)

German, "Erbse."-French, "Pois."-Spanish, "Chicaros"

The pea is one of the few vegetables which almost invariably find a place in home gardens. Peas mature earliest in light, fertile loams, but will give good results in any well-prepared garden soil. Sow the smooth sorts as early in spring as the ground can be worked; after that, make successive plantings every ten days until about the middle of June, giving the wrinkled sorts the preference. From the middle to the end of July, when the driest and hottest weather of the season is usually over, plantings of the extra early varieties may again be made with reasonable hope of a crop. Plant in trenches, or wide furrows, 3 or 4 inches deep and from 18 inches to 4 feet apart, acording to the height of the variety.
Brush, or supports of some kind,
should always be provided for the vines of tall growing sorts.

One quart of peas will plant about 100 feet of drill.

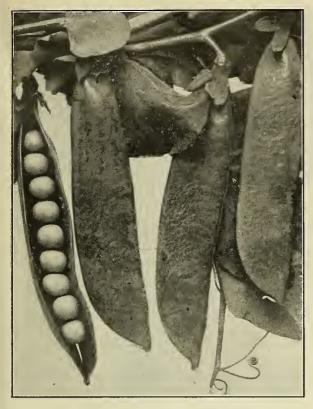

We supply all varieties in large packets, price 10c each.

Laxtonian Peas

Irish Cobbler

Early Obio

Green Mountain

#### **BRECK'S SEED POTATOES**

(Solanum Tuberosum)

(Prices subject to market changes.)

F. o. b. Boston.

A deep, mellow loam, rich in humus, furnishes ideal conditions for growing Potatoes, but good crops are raised on both heavier and lighter types of soil. Early varieties may be planted as soon as the ground can be prepared. Cut the tubers into pieces the size of hen's eggs; drop a piece of seed every 15 inches in furrows 3 feet apart, and cover to a depth of 3 or 4 inches. Cultivate at intervals of a week or ten days, gradually throwing earth up around the stalks after the plants are 4 inches high. For potatoes, fertilizers are unquestionably better than barnyard manure.

We furnish only Aroostook Grown Potatoes from hill selected seed stock, carefully inspected during growing season, sorted and graded to size.

#### EARLY VARIETIES

#### Sweet Potato Plants

Plant rooted slips or cuttings the last of May or 1st of June in hills about 5 feet apart and 6 inches above the garden level. Light, rich warm soil is required. Nansemond. Best sort for New England. Per 100, 75c; add 15c per 100 if wanted by parcel post.

When planting Breck's Seed Potatoes use Mapes Potato Manure and insure a profitable crop.

#### Pumpkin

(Cucurbita)

German, "Kurbis."—French, "Courge." Spanish, "Calabaza"

Plant 1 inch deep in hills 8 by 8 feet apart, late in May, in any highly enriched soil that is not clayey. When the plants are beginning to run, remove all but the two strongest from each hill. Farmers find field pumpkins a valuable addition to their stock feed, and commonly grow them in the cornfield, planting a few seeds in every third or fourth hill in alternate rows. One ounce of seed will plant about 30 hills; 4 pounds, 1 acre.

Highland House & Cottages, E. Hayes Small, Lessee & Mgr., North Truro, Mass.

Joseph Breck & Sons, Corpn.

Gentlemen:—I have already planted my last order of alfalfa which you sent me and it has taken hold nicely.

I realize that the unusual damp season which we are having here is the time to put in alfalfa. I had great success with piece I put in last year and know I am the only one as far down on the Cape having a stand of alfalfa. July 14, 1916. (Signed) E. Hayes Small.

Sweet Upright Pepper

#### Pepper

(Capsicum annum)

German, "Pfeffer."-French, "Piement." Spanish, "Pimiento"

Sow the seed in hot-beds about the middle of March, and transplant the seedlings to 2 by 2 inches apart as soon as they are strong enough. It is an advantage to shift the plants again, two or three weeks later, into pots of proper size. In the latter part of May, when the ground is warm, plant in the garden in rows 2 feet apart, leaving 12 or 14 inches between plants in the row. Peppers should be cultivated in the same way as egg-plants, and will thrive in any well-drained soil.

One ounce of seed will produce about	200	0 pla	nts.
Cayenne, Long Red. The pods of this variety are from 3 to 4 inches in length,	kt.	Oz.	¼ lb.
cone shaped, and coral red when ripe\$	0.05	\$0.25	\$0.75

right on plants, which are small and			
compact	05	.30	.80

#### Radish

(Raphanus Sativus)

German, "Rettig," "Radieschen."—French, "Radis," "Rave,"
"Petit Rave."—Spanish, "Rabano"

Loose, fertile, light loams are to be preferred for radishes; in distinctly clayey soils, the crop not only matures slowly, but the roots are usually rough, ill-shaped and of inferior quality. For a constant supply, sow at intervals of two or three weeks from early April until September. An early crop may be grown in the hot-bed in February. For use during the winter, the roots may be stored in earth in a cool cellar, but should be placed in cold water, for an hour or so, before they appear on the table.

One ounce of seed will sow 100 feet of drill; 10 pounds, one acre.

#### Rhubarb

(Rheum Rhaponticum) German, "Rhabarber."—French, "Rhubarbe."—Spanish, "Rhubarbo Bastardo"

(For price of Rhubarb Roots see Vegetable Plants.) Seed may be sown early in spring in shallow drills one foot apart; when the plants are 3 or 4 inches high, thin to about a foot apart in the rows. In the fall, or preferably the following spring, transplant into deep, rich soil, setting the plants about 3 by 3 feet apart. If propagated by dividing the roots, the work may be done either in spring or fall.

One ounce of seed will sow 100 feet of drill. Linnaeus. Early, large and tender. Pkt., 5c; oz., 25c;

4 lb., 75c. Victoria. Very large, later than Linnaeus. Pkt., 5e; oz., 25c; ¼ lb., 75c.

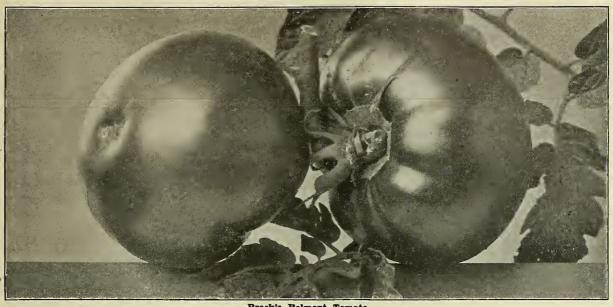

Breck's Selected Blue Hubbard Squash

#### **SQUASH**

(Cucurbita Pepo and C. maxima) German, "Kurbiss."—French, "Courge."—Spanish, "Calabaza Tontanera"

Squash seed should not be planted until the ground has become thoroughly warm and the weather is settled. A rich, warm, mellow soil is conducive to high yields and early maturity, but squashes grow satisfactorily in almost any well-drained soil. If possible, enrich each hill with one or two forkfuls of rotted manure. For bush types, the hills should be at least 4 x 4 feet apart; for the running varieties, 10 x 10 feet. It is customary to plant 8 or 10 seeds in each hill, and thin out, later, to two or three strong plants. During the early stages of growth keep the plants well sprinkled with tobacco or plaster dust to make them distasteful to insects; the way to deal with the squash vine borer is to cover the joints with an inch or two of soil so that secondary roots may develop.

Breck's Belmont Tomate

#### Salsify, or Oyster Plant

(Tragopogon porrifolius), "Boksbart."—French, "Salsifis." German, "Boksbart."—French,
Spanish, "Ostra Vegetal"

The demand for this vegetable is increasing from year to year, but as yet its good qualities are not widely known. In preparation for the table the roots are usually fried, boiled or stewed, but may be sliced raw for salad purposes.

The methods suggested for growing and keeping Parsnips apply equally well to this crop.

One ounce of seed will sow 50 feet of drill.

Breck's Improved Long White. Roots of Pkt. Oz. 1/4 lb. medium size, white and smooth......\$0.10 \$0.25 \$0.75

Mammoth Sandwich Island. Twice as large as the preceding, and of fine 

#### Scorzonera, or Black Salsify

(Scorzonera Hispanica)

This vegetable should be cultivated in the same manner as salsify, but being a little more difficult to raise, is rarely grown except by private gardeners. Though the roots have black skins, the flesh is white and very tender. Scorzonera may be cooked in the same ways as Salsify, and many people consider it superior in flavor. Pkt.. 10c; oz., 50c.

#### Tobacco

Connecticut Seed Leaf. Best adapted to Pkt. Oz. Lb the climate of the Northern and Middle ......\$0.05 \$0.25 \$2.00 

#### Tomato

(Lycopersicum esculentum) German, "Liebsapfel."—French, "Tomate." Spanish, "Tomate"

(For Tomato Plants, see Vegetable Plants.) Sow the seed sparingly about the middle of March, in drills ¼ of an inch deep and 2 inches apart, in a hot-bed, or sunny window where the temperature will not fall below 65 degrees. When the seedlings are two inches high, they should be transplanted to 3 inches apart each way in other flats of soil 3 inches deep, in which they may remain until time for planting in the garden. If a very early crop is desired, transplant again three weeks later, preferably into 4-inch pots of very rich soil. About the first of June the plants may be set in the open

ground. A heavy soil is conducive to high yields but the crop matures much earlier on fertile, sandy loams; in the former, set the plants four feet apart each way; in the latter, 3 by 3 feet will give ample space.

One ounce of seed will produce about 2000 plants.

American Improved Ruta Baga

# Turnip (Brassica rapa) German, "Steckrube."—French, "Navet." Spanish, "Navo Comun"

Turnip seed may be sown at all seasons from April until the middle of August in our climate; but the roots will be of finer quality if seed is sown early in spring for the summer crop, and about August first for the fall and winter crop. A light soil, well-manured the previous year, furnishes ideal conditions; no manure should be applied at the time of sowing, unless it be well rotted compost, or the turnips are apt to be strong flavored, or bitter. The ground should be dug or plowed deep, and made mellow and fine. Sow the seed in drills ½ inch deep and from 12 to 18 inches apart, dropping one good seed to every inch of furrow. Plants of the early varieties should be thinned to about 3 inches apart, while those of the larger late varieties should not be left closer than 5 inches apart in the row. Cultivate often, and keep the crop free from weeds. The Ruta Baga sorts, which are generally grown for winter use, may be sown from the 20th of June to the middle of July. For stock feeding, the late crop is often sown broadcast on well-prepared soil and raked in lightly.

One ounce of seed will sow 150 feet of drill; two pounds, one acre in drills. From 1 to 1½ pounds will sow one acre broadcast.

#### Spinach

(Spinacea oleracea)

German, "Spinat."—French, "Epinard."—Spanish, "Espinaca"

Spinach thrives in rich soil, and may be planted as soon as the ground can be prepared in spring. Sow the seed in drills one inch deep and 12 or 15 inches apart. The main crop, for spring consumption, is sown in late August or September, the plants being protected during the winter by a covering of straw or litter. A single sowing of New Zealand Spinach will supply greens of excellent quality throughout the summer; plant the seed, 3 or 4 in a hill, in hills 3 feet apart each way. Seeds of this variety are enclosed in very hard shells and should be soaked in hot water before sowing.

One ounce of seed will sow 50 feet of drill;

#### AGRICULTURAL GRAINS

(Prices subject to market changes).

#### Breck's King Oats

A close or cluster headed variety. Our 1916 crop was grown in Northern Montana on irrigated land; thus insuring seed free from fungus diseases, bright colored, large size, strong germination, and weighing over forty pounds to the measured bushel, an exceptionally fine crop grown especially for seed purposes.

Breck's King Seed Oats have given satisfaction during the past ten years and we can highly recommend seed

stock just secured.

Plant King Oats and secure a good yield of heavy grain and a crop of stout, straight, clean straw.

Price, \$1.50 per bu. of 32 lbs.; 10 bu. lots and over @ \$1.25 per bushel.

#### Breck's Alberta Prolific Seed Oats

This popular Canadian Seed Oat is an early ripening variety, close or cluster headed, straw of strong, heavy, sturdy growth, regarded in the western states and in the Canadian northwest, particularly in the province of Alberta, as one of the earliest and most prolific varieties. We have secured for our 1917 seed stock a choice stock of exceptionally bright color, grain plump, clean and of uniform grade, weighing 40 to 43 lbs. and more to the measured bushel. Price per bushel of 32 lbs. \$1.50; 10 bushels and over \$1.25; f. o. b. Boston, bags extra at value. (Seed shipped 3 bushels to the bag if required).

#### White Montana Oats

A short seeded variety, grain bright colored, heavy, close headed, tall growing. Our seed stock grown on the irrigated farms of northern Montana, where on account of total lack of rain during harvesting season, can be obtained oats of strong germination, free from rust or smut. Our stock has been carefully recleaned to take out all foreign seeds except now and then a trace of wheat. Price per bushel of 32 lbs., \$1.40; 10 bushels and over \$1.20 a bushel, f. o. b. Boston. (This stock will weigh nearly 45 lbs. to the measured bushel and can be shipped 3 bushels to the bag).

Samples of both the above sent on request.

Wild Rice (Zizania aquatica). Price quoted on application. Not kept in stock. Seed must be kept moist until sown.

Buckwheat	bu.
Silver Hulled	3.00
Japanese. Enormously productive	3.00

#### MARQUIS SPRING WHEAT

A variety produced by scientific cross breeding of the old Calcutta and the frost-resisting Red Fyfe variety. First introduced by the Central Experiment Station in Ottawa, Canada, and has since rapidly displaced many other varieties in the North West and in Canada. In appearance Marquis Wheat is similar to Red Fyfe, but the heads as a rule are heavier and the stalks shorter, making it less likely to lodge. The kernel is flinty, a little darker red and more plump than Fyfe. It is beardless having smooth yellow chaff, but its most valuable feature lies in its earliness as it matures a week or ten days earlier than Red Fyfe. Thrashing reports from the North West, indicate yields of 40 to 50 bushels per acre, weight 64 to 66 lbs. per measured bushel, and they report it to be of the highest milling quality. Not in many years has such a valuable variety been introduced. Our stock is strictly Canadian grown and of the highest purity and germination. Farmers who planted Marquis Wheat in New England last season had most satisfactory returns.

Price, qt., 25c; pk., \$1.00; bu., \$3.50.

#### Winter Wheat

Dawson's Golden Chaff. One of the hardiest wheats we know of; heads bald, color of grain white (inclined to light amber), straw of medium length.. 3.50

#### Barley

Twα-Rowed 2.50
Four or Six-Rowed 2.25
Success Beardless. A six-rowed variety that is prac-

tically free from the poisonous beard. It is early, hardy, large grained, strong of straw; productive 2.50

#### Rye

#### FIELD CORN

Prices subject to market changes. Customers pay transportation charges on all varie-Quotations on large quantities. Bags as per schedule on third page of cover. Our seed corn grown for us under contract and especially for seed purposes. We

wish to call particular attention to our fine stock of Improved Leaming and also Virginian grown Eureka Ensilage. Stock of both the above are extra choice this year.

grown Eureka Ensilage. Stock of both the above are extra choice this year.

Breck's Mondamin. The earliest and best Yellow flint variety; eight-rowed ears, well-filled to the tips. For complete description see page 24. 25c qt.; \$1.25 per pk.; \$4.00 a bu.

Breck's Angel of Midnight. One of the earliest Yellow Flint varieties, of the early Canada type. Ears long, with comparatively deep kernels. 20c qt.; \$1.00 pcr pk.; \$3.00 bu.

Brewer's Yellow Dent. This variety originated in New England and is unquestionably the best strain of dent corn to grow for grain in the latitude of Boston; it is also valuable

for ensilage. The stalks average from ten to twelve feet in height; the ears have about twenty rows of closely-packed kernels. At the National Corn Exposition at Omaha this strain, with 133 1/3 bushels, took first prize for the largest yield of shelled corn from a measured acre. Our seed is strictly New England grown. 15c qt.; \$1.00

pk.; \$3.00 bu.

Blunt's Prolific. A leafy, eight-rowed, white dent corn, desirable for ensilage. 15c qt.; 75c pk.; \$2.00 hu.

Early Yellow Canada. An extra early eight-rowed flint variety with large kernels and small cobs. Ears of medium size. A popular variety in Northern New England. 15c qt.; 75c pk.; \$3.00 bu.

Early Sanford. A popular white flint variety, equally valuable for ensilage or grinding.

The eight-rowed ears average from 9 to 10 inches in length and have broad creamwhite kernels. 15c qt.; 75c pk.; \$2.25 bu.

Eureka Ensilage. One of the most popular White Dent varieties among dairymen. It is enormously productive of both foliage and ears. Our Virginian grown seed has given great esticated the property of the second of the second

great satisfaction throughout New England. 15c qt.; 75c pk.; \$2.50 bu.

Improved Leaming. A yellow dent variety very valuable for ensilage. The plants are tall with a large amount of foliage. Each stalk usually produces two good long ears with small red cobs, well filled with large, deep, golden kernels. 15c qt.; 75c pk.; \$2.50 bu. Longfellow. The variety most widely grown in New England. An early eight-rowed flint

corn with long ears and comparatively small cobs, filled to the tips with large, broad kernels. 15c qt.; \$1.00 pk.; \$3.00 bu.

Pride of the North. An exceptionally early dent variety. Stalks of medium height with broad leaves. The ears, which average 7 or 8 inches in length, have from 12 to 16 rows. Grains long and deep yellow, making meal of extra good quality. 15c qt.; 60c pk.; \$2.50 bu.

Red Cob Ensilage. A red-cobbed, white dent corn with heavy foliage; popular among dairymen in northern New England. 15c qt.; 60c pk.; \$2.00 bu.

White Southern. A tall growing dent variety with leafy stalks; valuable for ensilage and fodder. 15c qt.; 75c pk.; \$2.50 bu.

and fodder. 15c qt.; 75c pk.; \$2.50 bu.

Sweet Fodder. Unexcelled for cutting green and feeding to stock. It should be included in all soiling schedules. 15c qt.; 75c pk.; \$3.00 bu.

#### Winter Vetch

(Vicia Villosa)

Growth and appearance like Spring Vetch.

Valuable as a cover crop or for early spring forage. In this latitude seed should be sown before Sept. 15th, so that the plants may become well established before cold weather. It is customary to sow from two to four pecks of Winter Vetch with six pecks of either Winter Wheat or Winter Rye. If sown alone, broadcast one bushel per acre. Weight 60 lbs. per bushel. Price, 22c per lb.; per 100 lbs., \$20.00 net.

Prices subject to market changes.

### Spring Vetch or Tares (Vicia Sativa)

Very much like common peas in growth and general appearance. An annual legume. Valuable as a summer forage when sown early in spring on well cultivated and enriched ground at the rate of 1/2 bushel Vetch and 2 bushels Grain, Barley or Oats per acre. Can also be sown alone at the rate of about 80 lbs. per acre as cover crop for orchard. Weight per bushel 60 lbs.; \$6.00 bushel net, subject to market changes.

Mondamin Corn

### **ALFALFA**

Prices Alfalfa seed variable; we recommend that you write for special quotation stating quantity required when in the market.

Grimm Alfalfa, Dotshome Farm, Favetteville, N. Y.

#### ALFALFA, or LUCERNE

(Medicago Sativa)

Alfalfa, the greatest known forage crop, is now grown successfully in all parts of the world and is steadily gaining favor with the intelligent New England farmer, for it is proving to be of the greatest value to him not only as a forage crop, but as a soil improver. It is a legume, taking free nitrogen from the air and storing it up in the

deep growing roots. As green fodder or cured hay Alfalfa is relished above all other forage crops by stock. To grow a good field of Alfalfa, it is important to select deep, loamy, well-drained land with loose sub-soil, as standing water will soon kill out the young plants. Plow and harrow the land thoroughly, and with the first harrowing apply at least one ton of Agricultural Lime per acre, thereby correcting any acidity in the soil and, what is more important, making conditions favorable to the is more important, making conditions favorable to the activity of nitrogen-gathering bacteria upon the presence of which success depends. Continue to harrow the land at short intervals for some weeks, thereby thoroughly pulverizing the top soil and at the same time working out and killing the old grass roots and weeds that would otherwise get a quick start and choke out the young Alfalfa. If possible, give the ground a fair dressing of barnyard manure, and a short time before sowing the seed harrow in 600 or 800 lbs. per acre of high grade commercial fertilizer. Either the seed should be inoculated with Farmogerm before sowing, or soil from an lated with Farmogerm before sowing, or soil from an old Alfalfa field should be sown broadcast at the rate of 300 to 500 lbs. per acre.

It has been found that in this latitude seed sown the last of July or early in August will escape being hindered by weed growth, and get a good stand before cold weather. Sow broadcast at the rate of 20 lbs. per acre. Never cut Alfalfa before buds have appeared close to the ground at the crowns of the plants; always judge the

time to cut by the presence of these basal shoots or buds and not by the period of bloom. Do not cut closely the first season; cut, allow the plants to wilt, put up in cocks and cure in the cock.

#### Northwestern Dry Land Alfalfa

Since many New England farmers prefer Northern grown common American Alfalfa, we have secured a stock of Northern grown dry land Alfalfa from grower in the northern part of Montana. This seed will test over 99% pure and of high germination. Price, 25c per lb.; \$22.00 per 100 lbs.

#### Genuine Grimm Alfalfa

As a result of extensive trials of numerous varieties of Alfalfa, at various Experiment Stations and on many farms, in the Northern States, the unanimous conclusion is that the Grimm strain is hardier and more productive than any other known variety. It originated in northern Minnesota from seed brought from the fatherland and sown by Ferdinand Grimm, a German farmer. During the many years he allowed his fields to remain in Alfalfa, the more tender plants winter-killed; from those which survived he saved seed, little thinking that by natural selection he was developing a strain of Alfalfa more valuable to the American farmer than any yet discovered. Professor Hayes, before being appointed Assistant Secre-Professor Hayes, before being appointed Assistant Secretary of Agriculture, recognizing the superiority of Grimm Alfalfa for sections where ordinary varieties fail, took measures to have the Grimm strain kept pure and to have it tested in other parts of the country. In 1904 the Government contracted with Mr. F. E. Dawley of Dotshome Farm, Fayetteville, N. Y., to grow 18 varieties of Alfalfa, one of which was Grimm, devoting an acre to each strain. The original stand of Grimm is still in existence. In 1914 it yielded a total of over 6 tons of cured hay in four cuttings. During the first three years of the contract no 1914 it yielded a total of over 6 tons of cured hay in four cuttings. During the first three years of the contract no seed was allowed to ripen on this plot, but since then a seed crop has been harvested every year until 1914. At the present time there are over 60 acres of Genuine Grimm Alfalfa on Dotshome Farm. Although Alfalfa occupies nine-tenths of the meadows in the Fayetteville section, no diseases or insect enemies have appeared. The seed, which is true to name, clean, and absolutely free from Dodder, never leaves the farm until shipped to us. Notwithstanding its higher price, we feel confident that our Grimm seed is the most economical for all farmers who desire to grow Alfalfa. Price, per lb., 80c; 20 lb. lots and over. 75c per lb. lots and over, 75c per lb.

#### INOCULATING SOIL

For inoculating new land we can supply soil from healthy old Alfalfa fields where the root-tubercles are abundant. To ensure its reaching our customers in the best possible condition, all soil will be shipped direct from the Dotshome Farm in strong, full-weight sacks of 100 lbs. each. Use 300 lbs. to 500 lbs. per acre. Price 100 lbs. bears 5100 lbs. to 500 lbs. per acre. Price 100 lbs. co. 5100 lbs. co. 5 100-lb. bags, \$1.00; 500 lbs. for \$3.25; per ton, \$10.00; f. o. b. shipping point.

Mammoth Yellow Soja growing in our trial ground at Lexington, season of 1916, ripened seed 115 days

#### Clovers

(Prices variable, subject to market changes).

Clovers are the foundation of permanent agriculture in the North and East. They have the faculty of taking nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap-roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red (Trifolium pratense). This is the common Red Clover and by far the most important variety for the practical purposes of agriculture. 60 lbs. to the bushel. Price per lb., 30c; per 100 lbs., \$28.00.

Mammoth Pea Vine (Trifolium pratense magnum). Of ranker growth than Medium Red and usually lasts longer; excellent for plowing under to improve exhausted soils. 60 lbs. to the bushel. Price per lb., 35c; per 100 lbs., \$30.00.

Alsike, or Swedish (Trifolium hybridum). The hardiest of all clovers; it resists cold and extreme drought, and for low, wet land is invaluable; excellent for bees. 60 lbs. to the bushel. Price per lb., 25c; per 100 lbs., \$22.00. White Clover (Trifolium repens). This variety should be

white Clover (Trifolium repens). This variety should be included in all mixtures for lawns and permanent pastures. It is adapted to all soils. 60 lbs. to the bushel. Price per lb., 60c; per 100 lbs., \$50.00.

Crimson Clover (Trifolium incarnatum). Also known as Scarlet, or Carnation Clover. A rapid-growing annual of great value where only one crop is desired; excellent as a cover crop in orchards, or for plowing under to improve poor soils. 60 lbs. to the bushel. Price per lb., 20c; per 100 lbs., \$18.00.

Yellow Trefoil (Medicago lupulina). An annual or biennial suitable for pastures in wet meadows or stiff clayey soils which are too poor for other clovers. 60 lbs. to the buckel. Price part by 25c; per 100 lbs. \$20.00.

the bushel. Price per lb., 25c; per 100 lbs., \$20.00. Yellow Sweet Clover (Melilotus officinalis). More suitable for turning under than the White variety. A good crop with which to prepare land for Alfalfa. Height about 2 feet. 60 lbs. to the bushel. Price per lb., 30c; per 100 lbs., \$25.00.

#### Soja Beans

One of the most valuable and important forage and soil-improving crops.

The use of this crop is increasing everywhere. Soja Beans make a larger growth than Cow Peas and can be cut and cured to better advantage. They also furnish a richer and more fattening feed than the Peas, since they contain larger amounts of oil and protein. These properties make Soja Beans particularly valuable as a feed for milch cows and as a general forage crop. When cut together with Corn for the silo, they greatly improve the quality of the feed.

Yellow Soja. A large-growing, yellow-sceded variety, especially suitable for ensilage and plowing under. Sow at the rate of one bushel per acre. Qt., 20c; pk., \$1.25; bu., \$4.00.

Medium Green. An earlier maturing variety than Mammoth Yellow. Producing a larger yield of Shell Beans but not such a rank growth of forage. Recommended for planting in New England because of its earliness. Price, per qt., 25c; per pk., \$1.50; per bu., \$5.00.

#### Southern Cow Peas

(Vigna Catjang)
Make Poor Land Rich

The plowing under of green crops is one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soils. Seed should be sown in May or June at the rate of 1½ bushels per acre and the plants plowed under as soon as they have attained their full growth. Although this crop is already widely known and appreciated its merits are so marked that it can undoubtedly be planted to advantage far more frequently than it is at present. There is no cheaper or surer method of improving the soil than by sowing Cow Peas. Being nitrogen gatherers, their use permits the farmer to dispense with fertilizers containing this element; nitrogen or ammonia in commercial fertilizers is valued at about 18c per pound.

(Prices subject to market changes).

Clay, or Wonderful. Has matured in New England. Qt., 20c; bu., \$4.50.

New Era. Early and large yielder. Qt., 20c; bu., \$4.50. Southern Black Eye. Immense cropper. Qt., 20c; bu., \$5. Whippoorwill. One of the earliest. Qt., 20c; bu., \$4.50.

#### Rape-Dwarf Essex, English

Is easily grown, perfectly hardy and possesses remarkable fattening properties. Under ordinary field conditions the plants reach height of about 4 feet; the roots being strong growing, penetrate the soil to a considerable depth.

Rape is especially adapted to cool, moist conditions, such as prevail in New England, and for its best development requires a loamy soil, moist and rich; ground that has produced good crops of corn, turnips and cabbage will be found very suitable for Rape. Plant seed in New England from May 1 to middle or last of July in average seasons.

In preparing the land for the seed, take every care possible to have it free from noxious weeds. Have the ground well pulverized with a harrow, thereby giving a deep, mellow seed bed.

Dwarf Essex Rape will be found to resist summer drought if care is taken to get the plants well started before extreme summer heat may be expected. For sowing in drills, about 10 lbs. of seed per acre is required; broadcast 15 lbs. per acre. Pcr lb., 20c; per 100 lbs., \$15.

#### White Sweet Clover

Bokahara (Melilotus alba). Will grow on very poor soils; excellent for plowing under as green manure. Valuable for bee keepers. 60 lbs. to the bushel. Price per lb., 30c; per 100 lbs., \$25.00.

#### MISCELLANEOUS SEEDS

#### For Forage Crops, Plowing Under, Etc.

(Prices subject to market changes.)

Peas, Canada or White Field. Unsurpassed as a green feed for milch cows. Usually sown with oats. \$1.25; bu., \$4.50.

Broom Corn, Long Brush Evergreen. Succeeds best in good, deep, moderately moist soil. Sow 12 quarts per acre, after danger from frost is past. Lb., 15c; 10 lbs.,

Lupins, Yellow. In spring when the ground has become warm, sow at the rate of 80 pounds per acre. Valuable for plowing under to improve poor sandy soils. Lb., 20e; 100 lbs., \$15.00. Lupins, Blue. Valuable for turning under. Lb., 20e; 100

lbs., \$15.00.

Spurrey (Spergula arvensis). Annual. This plant will grow in land too dry and too thin to support clover. The crop may be fed either green or as hay. It grows very rapidly and is in condition to pasture sheep or cattle on about six weeks after sowing. Sow broadcast, 20 pounds per aere. Lb., 20c; 100 lbs., \$15.00.

#### Sudan Grass

Very closely related to the sorgbum family, is a native of Sudan, Egypt, where it has withstood hot winds and drought for years. The United States Department of Agriculture, in their search for a valuable hay or forage plant, discovered it and in 1909 secured a half pound of seed for experimental purposes. From this small beginning it has become one of the principal forage crops of the Southwest, and last season was grown successfully in many parts of the country, and experimentally in perhaps every state of the Union. Under these wide and varied climatic conditions the results were so satisfactory that it is not only destined to be one of our greatest hay and forage plants, but is already firmly established as such.

Description.—Sudan Grass is an annual of quiek growth -the first crop being ready to cut in fifty to seventy days after planting, depending upon the length of seasons and moisture; the second and third crops about forty-five or fifty days later, respectively. It stools freely, sometimes as many as one hundred stems coming from one seed. It dies with killing frost, and has a short stalk root, which is easily eradicated. It is a strong drought resister.

It does well almost anywhere, and especially flattering results have been obtained under irrigation. When seeded broadcast or in drills, it averages three to five feet in height, with stems about the size of a lead pencil. lf grown in rows and cultivated, it reaches a height of six to nine feet, with somewhat larger stems. sorghum, it is easily injured by frost, and the number of cuttings depend upon the length of the growing season. In favorable years where growing period is long, as many as three and sometimes four cuttings can be obtained in one year. But in Northern sections where seasons are shorter, perhaps but two cuttings can be

Soil.-Sudan has been grown successfully on almost every class of soil from heavy clay to light sand, doing best on a rich loam, but, of course, on light sandy soil a light yield may be expected. In any case, it should be well drained.

Seeding.—The ground should be prepared as for corn and the seed not planted till soil becomes warm. It can be planted in this latitude from about May 1st to July 1st. Sown broadcast use sixteen to twenty-four pounds of seed per acre. If planted in drills 18 to 24 inches apart, from four to six pounds per acre will be sufficient.

The trial plot illustrated above was planted on the dryest, poorest piece of ground we could find in our trial ground; the growth and crop was most surprising. We found that all farm animals relished Sudan Grass whether as green forage or hay. Two good crops were obtained from this trial plot.

Price, per lb., 60c; per 100 lbs., \$55.00.

Part of a trial plot of Sudan Grass planted in our trial ground at Lexington, season of 1916

#### Millets

Hungarian Grass (Panicum Germanicum). This species of Millet is comparatively small and fine in its habit of growth. It is one of the most profitable hay and soiling crops, often yielding over three tons per acre. No other Millet adapts itself so readily to various conditions of soil and moisture. Broadcast at the rate of one bushel per acre. Weight 48 pounds per bushel. Per lb., 10c; \$3.50 per bu.

Japanese Millet, Japanese Barnyard Grass (Panieum Crus Galli). Distinct from other varieties. An enormous cropper growing over 6 feet in height; excellent either green or as cured hay. Broadcast at the rate of 25 pounds per acre, or in drills 18 inehes apart, sow 15 pounds to the acre. Weight about 35 pounds per bushel. Per lb., 10c; \$9.00 per 100 lbs.

German, or Golden Millet (Panicum Miliaceum var.). An improved, medium early variety, growing from 3 to 5 feet high. The heads are closely condensed though the spikes are numerous. During the past few years, the fact has been established beyond doubt that Golden Millet seed grown in Southern latitudes will produce much larger yields of hay than seed grown in Northern or Western sections of the country. All our seed is Weight 50 pounds per bushel. Per Southern grown.

1b., 8c; \$3.25 per bu.

Pearl Millet. A valuable and productive fodder plant.

Seed should not be sown until after danger from frosts is past. Sow about 10 pounds per aere in drills 18 inches apart. Per lb., 20c; \$15.00 per 100 lbs.

Sorghum

Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 pounds per acre. Early Amber Sugar Cane. Will ripen where Indian corn

matures. Per lb., 12c; 100 lbs., \$8.00.

Red Kaffir Corn, or Sorghum. Non-sacchavine. The plants which are stocky and perfectly erect cure into excellent fodder, or may be fed green during all stages of growth. Per lb., 12c; per 100 lbs., \$8.00. White Kaffir Corn. Per lb., 12c; per 100 lbs., \$8.00.

Timothy, or Herd's Grass

#### Cover and Soiling Crops for Orchards

One of the most important points in successful orcharding is the intelligent use of proper cover crops, and the orchardists of New England are giving this particular subject more and more careful attention, as the proper use of such crops conserve the nitrates in the soil after the growth of fruit trees is stopped, which would otherwise be washed away by the heavy fall or winter rains. They also help to break up, during time of their growth, the old sod, and later in the season when plowed under, furnish humus for the soil.

We can recommend the following cereals and legumes as the best suited for cover crops under New England climatic conditions:

Winter Rye. Sow at the rate of 1½ to 2 bushels per acre; this can be sown from the middle of August up to the time the ground freezes late in the fall.

Japanese Buckwheat. Sow at the rate of 1 to 1½ bushels per acre. Especially valuable where it can be sown early in spring on newly plowed sod land, as it is very effective in rotting down the old sod and at the same time enriching the soil.

Yellow Soya Beans. 1½ to 2 bushels per acre. These do best if sown in drills about the middle of June and cultivated several times to promote vigorous growth.

Winter Vetch (Vicia villosa). If sown alone, use 1 bushel to the acre broadcast. In this latitude it should be sown before September 15th, so that it may be well rooted and established before cold weather. One of the best to cover and protect the ground during the winter.

Crimson Clover. Sow at the rate of 15 to 20 lbs. per acre the last of June or first of July, and plow under early the following spring.

#### AGRICULTURAL GRASSES

(Prices quoted are subject to market changes, net

f. o. b. Boston, bags extra).

The following list of Agricultural Grasses includes the varieties used most extensively in permanent pasture and other grass mixtures.

We make a specialty of mixtures for permament pasture and mowing lands, to which we would call attention. Directly following these descriptions is a set of tables giving complete information about our special mixtures.

Awnless, or Smooth Brome Grass (Bromus inermis). An erect-growing perennial that attains a height of from three to five feet. It is especially recommended for dry and arid soils where the more delicate grasses will not grow. Weight, 12 lbs. per bushel. 15c lb.; \$12.00 100 lbs.

Creeping Bent or Firoin (Agrostis Stolonifera). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low bottom-lands, especially if they are somewhat sandy. It is rapid of growth and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant trampling. Being of fine texture, it is one of the most valuable of our lawn grasses. Weight, 15 lbs. per bushel. 50c lb.; \$48.00 100 lbs.

#### TIMOTHY

Timothy (Herd's Grass or Catstail) (Phleum Pratense). Perennial. Roots are fibrous in moist soils, but in dry soils often become bulbous; blooms in June and July. While this grass is commonly known as Timothy, it is frequently called Herd's Grass, as this is the name under which it was originally cultivated. It is the most valuable grass for hay, especially in the North, thriving best on moist, loamy soils of medium tenacity. Grows very readily and yields, on favorable soils, three or four tons of best quality hay per acre. Should be cut just when the blossom falls. Weight, 45 lbs. per bushel. 12c lb.; \$5.00 per bu., subject to market changes.

Bromus inermis

Red Top

Orchard Grass (Dactylis glomerata). Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, its luxuriant aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, it withstands droughts better than most species. Weight, 14 lbs. per bushel. 30c lb.; \$25.00 100 lbs.

Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass) (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, although some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North; in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. As Kentucky Blue Grass requires two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, it is not suited for alternate husbandry, where the land is to remain in grass two or three years and then to be plowed up. Weight, 14 Ibs. per bushel. 25c lb.; \$20.00 100 lbs.

Red Top (Herd's Grass) (Agrostis Vulgaris). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils, producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the clover soon disappears, followed by the Timothy, the Red Top usually taking their places, and with some wild indigenous grass forming a close sward. When sown alone, 4 bushels of unhulled, or 20 pounds of the clean seed per acre are required. Weight, unhulled, 10 lbs. per bushel; fancy or clean, 40 lbs. per bushel. Price, unhulled seed, 15c lb.; \$12.00 100 lbs. Fancy, or clean seed, 25c per lb.; \$20.00 per 100 lbs.

Italian Rye (Lolium Italicum). Annual. In nutritive value, earliness and quickness of growth after it has been mown, it far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry, but as it does not last over two years it is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile and tenacious or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant crops. Weight, 18 lbs. per bushel. 16c lb.; \$14.00 100 lbs.

Meadow Foxtail (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering. Weight, 8 lbs. per bushel. 40c lb.; \$35.00 100 lbs.

Crested Dog's-Tail (Cynosurus cristatus). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures for lawns. Weight, 28 lbs. per bushel. 45c lb.; \$40.00 100 lbs.

Meadow Fescue, or English Blue Grass (Festuca pratensis). Root crccping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses. Weight, 15 lbs. per bushel. 25c lb.; \$20.00 100 lbs.

Sheep's Fescue (Festuca ovina). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures. Weight, 12 lbs. per bushel. 40c lb.; \$38.00 100 lbs.

Fine-Leaved Fescue (Festuca Tenuifolis). This is really a variety of Festuca ovina with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for permanent pasture on high and dry situations. Weight, 22 lbs. per bushel. 80c lb.; \$75.00 100 lbs.

Tall Fescue (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils. Weight, 15 lbs. per bushel. 60c lb.; \$50.00 100 lbs.

Rough Stalked Meadow Grass (Poa trivialis). Root flbrous; perennial. This grass is valuable on account of its quick growth, productiveness and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. Weight, 14 lbs. per bushel. 50c lb.; \$48.00 100 lbs.

Orchard Grass

Rhode Island Bent (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and lawns. Soil and treatment same as for Red Top (A. vulgaris). Weight, 10 lbs. per bushel. Price, 40c lb.

Perennial Rye (Lolium perenne). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers. Weight, 24 lbs. per bushel. 12c lb.; \$10.00 100 lbs.

Hard Fescue (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists summer drought, and develops remarkable verdure during winter. It should form a part of every mixture for lawn or pleasure grounds, as well as for permanent pasture and alternate husbandry. Weight, 14 lbs. per bushel. 40c lb.; \$38.00 100 lbs.

Sweet Vernal (Anthoxanthum odoratum). Root fibrous; perennial; flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, being largely used for this purpose. Weight, 11 lbs. per bushel. 65c lb.; \$60.00 100 lbs.

Red or Creeping Fescue (Festuca rubra). This grass grows on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures. Weight, 13 lbs. per bushel. Price, 40c lb.; \$38.00 100 lbs.

Yellow Oat Grass (Avena flavescens). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils. Weight, 11 lbs. per bushel. 95c lb.; \$90.00 100 lbs.

Tall Meadow Oat Grass (Avena Elatior). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds best on deep, sandy lands, and is suitable for sowing in orchards or other shady places. Weight, 15 lbs. per bushel. 30c lb.; \$28.00 100 lbs.

Wood Meadow Grass (Poa nemoralis). Root fibrous; flowers in June and July. This grass, as its name implies, is found naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, on pleasure grounds. Weight, 14 lbs. per bushel 80c lb.; \$75.00 100 lbs.

Various Leaved Fescue (Festuca heterophylla). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a valuable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root-leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. Weight, 15 lbs. per bushel. 40c lb.; \$38.00 100 lbs.

Perennial Rye Grass

#### ALTERNATE HUSBANDRY

All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, in consequence, would be very much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it

has however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equalled first crops of Timothy.

While it is true that the mixtures which we recommend are seemingly much more expensive than those commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ordinary sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

#### Breck's Special Mixtures for Permanent Pastures

Table showing the proper quantities to Sow on an Acre of Light, Medium or Heavy Soils, for Permanent Pasture.

Kind			No. 1 Light Soils	No. 2 Medium Soils	No. 3 Heavy Soils	No. 4 For Orchards and shady places

#### PERMANENT GRASS SEED MIXTURES FOR GOLF LINKS

In order to better serve our customers and give them Golf Mixtures that are best adapted to the soils and climate of New England, we have made careful study and comparison of the mixtures used on the finest Golf Links in Scotland and England. Our mixtures are the result of many years' experimenting and study in search of grasses that would make the finest and most permanent courses and greens.

Some of the largest and best golf clubs in this section of the country have used our mixtures and we have yet to hear of unsatisfactory results.

No. 1. For Putting Greens. This mixture should be sown at the rate of 80 pounds per acre. Per lb. 25 cts.

No. 2. For Fair Greens upon light and dry soils. Per lb. 28 cts.

No. 3. For Fair Greens upon low and damp soils. Per lb. 25 cts.

Mixtures Nos. 2 and 3 should be sown at the rate 50 pounds per acre.

Sargent Camp, Inc. A Summer Camp for Girls.

Railroad Sta. and Express Office Eastview, N. H. Post Office Peterboro, N. H.

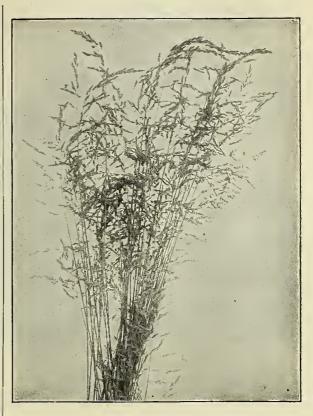

JOSEPH BRECK & Sons, INC., Boston, Mass.

Dear Sirs: — A year or two ago we bought of you some grass seed which was of a special kind to be used for golf greens. It was excellent for the purpose and we could ask for nothing more satisfactory. Have you any of these seed in stock at the present time, and if not, can you inform us where we can get it or something equally good? Please quote prices.

(Signed) SARGENT CAMP, INC.,

July 7, 1916.

## Breck's Lawn Grass Seed

Smooth, firm, ever-green lawns from Breck's Lawn Grass Mixtures

Gentlemen: — For the past 29 years I have used Breck's Seeds in my business of market gardening. I take pleasure in advising that your seeds have given most satisfactory returns during the 29 years. They are certainly reliable and it is a pleasure to recommend them. (Signed) S. O. Nelson, Market Gardener.

#### Breck's Standard Lawn Grass Seed

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the pro-

per blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

One peck will sow 2,400 sq. ft.......Price per pk. 1.50 One bush. will sow 10,000 sq. ft.....Price per bush. 5.00

Four bushels will sow one acre.

#### Boston Park Lawn Grass

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them.

Per pound\$0.30
Per peck, 8 pounds 2.25
Per ½ bushel, 16 pounds 4.25
Per bushel, 32 pounds 8.00
Two bushels will sow one acre.

#### Breck's "Shady Spot" Lawn Grass

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such

locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt., 25c; pk., \$1.50; bush., \$5.00.

#### Breck's Bank and Terrace Grass Mixture

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt., 25c; pk., \$1.50; bush., \$5.00.

#### Sterlingworth Lawn Compound

Kills the weeds but not the grass and makes the lawn green and velvety.

It seems incredible that a preparation can be made which will kill the weeds in lawns without injuring the grass. This is exactly what "STERLINGWORTH LAWN COMPOUND" will do and also it will help the grass to grow green and greatly improve the sward. It absolutely destroys Dandelions, Plantain, Chickweed and all weeds with hairy surfaces or broad leaves. It is a dry sandy

powder to be applied by sprinkling over the grass.

Five pounds will dress 500 to 700 square feet. Full directions for use on each package. Prices: 5-lb. cans, 60c; 10-lb. cans, \$1.00; 50-lb. kegs, \$4.00; 100-lb. kegs,

### Valuable Table for Planting

NAME OF	WHEN	TO PLANT	DEPTH to PLANT	DISTANCE APART	TIME OF

Tomato	March	June	1/4	Transplant 36 x 36	100 to 150 "				
Turnip		April to August	1/2	Thin to 4 x 18	60 to 75 "				

#### Directions for Making and Caring for Hot-beds

Early in March obtain a good quantity of fresh horse manure, mix with it one-third to one-half its bulk in leaves, and by tramping down the mass in layers, make a large pile, so that the fermentation will continue even in very cold weather. When this fermentation shows, by the escape of steam from the pile, turn it over and allow it to remain so for a few days or until the second fermentation shows; then place the manure in a pit at least  $2\frac{1}{2}$  feet deep and tread it down firmly in layers to a depth of about 2 feet. Build your pit in a sheltered spot, facing the south or east if possible and line with heavy planks or concrete. The frame used to support the sashes covering the bed should be raised 6 inches higher at the back than the front, to give proper slope to the sash to catch the sunlight.

After the manure is firmly trodden down in the pit, scatter over the surface a good covering of air-slaked lime, to keep all slugs, worms, and other pests from infesting the surface soil. After this is done, fill in about 4 or 5 inches of good, rich, clean-sifted loam, level off and place a thermometer therein. Put on sashes and let the frame remain closed until the thermometer registers about 70 to 75 degrees and remains steady. Sow your seed, covering it lightly. Keep the surface moist by an occasional watering with a fine spray. As the seedlings appear it is advisable to allow them a little air each day to prevent them damping off; when the plants are large enough they can be thinned out, transplanted into boxes or small pots and placed back in the warm frame.

### BRECK'S HIGH GRADE FLOWER SEEDS

Our carefully revised list of species and varieties of merit, contains chiefly those of comparatively easy culture. A small sum expended for seeds of any of these plants will bring full measure of enjoyment and satisfaction to the purchaser. In general, the finest garden effects are produced by mass-displays, especially where the plants are set in borders or where the flowers will have backgrounds of shrubbery. The best use of individual specimens is in pot-culture. The present tendency in this country to bring hardy perennials into more general cultivation is encouraging, for it attests an increasing love of flowers among the people, but this trend should in no way cause annuals to decline in popular favor. Both groups are indispensable; the perennials for permanent effects; the annuals for variety.

HALF-HARDY PERENNIALS AND BIENNIALS.—It is usually best to start seeds of these plants indoors, but they may be sown in the open like those of hardy varieties.

STARTING PLANTS INDOORS.—Any fine, sandy loam will answer, but if possible make a mixture of equal parts of light soil, leaf-mould and sand. Boxes, two or three inches deep, shallow pots, and seed pans,-filled to onethird their depth with small pieces of broken pots or other coarse material, to insure good drainage—are satisfactory containers; fill them within about three-fourths of an inch of the tops, pressing the soil down firmly, and water thoroughly a day before sowing. Distribute the seeds evenly but not too thickly, cover not over an eighth of an inch deep, and press the soil down upon them with the hands or a piece of board; then water with fine spray. It is a good plan to cover each seed pan or flat with a sheet of newspaper, until after germination, to prevent the soil from drying out too rapidly, but see to it that plenty of air gains admittance. Keep in a sunny window near the glass in a temperature of from 60 to 70 degrees; water carefully when necessary, and before the seedlings begin to crowd transplant into two-inch pots or set them an inch or more apart each way in other shallow boxes or pans. It may be necessary to transplant a second time before the weather is suitable for setting out.

OUT-OF-DOOR CULTURE

PREPARATION OF THE SOIL.—Needless to say, thorough preparation of the soil is the first essential of successful flower-culture. Choosing a sunny situation, dig the ground deeply and mix plenty of manure or fertilizer with the soil, raking out all loose stones and tufts of roots or grass. When the surface is smooth and firm, the bed is ready for planting.

SEED SOWING.—Seeds should be sown in pulverized soil and covered lightly to a depth equal to about three times their diameter. Exceedingly small seeds often do not need covering; pressing them into the soil with a board is sufficient.

SUBSEQUENT CARE.—After the seed is sown little care is required beyond occasional watering and weeding, with enough loosening of the soil so that the plants may receive the full benefit of rains and dews.

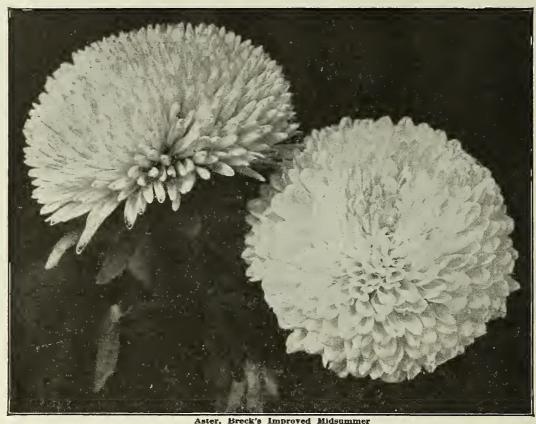

HARDY ANNUALS.—Plants of this class are of the simplest culture. Seeds should be sown out of doors as early in spring as the ground can be prepared properly. Frequently a second sowing is made a week or two later, to insure a longer flowering-season.

HALF-HARDY ANNUALS.—The seeds of these plants require a higher ground-temperature for germination than the preceding, hence they should be sown later,—usually during the latter part of May.

TENDER ANNUALS.—These seeds are sown indoors about March 1st, and the plants set out in the garden when the ground is thoroughly warm and the weather settled.

HARDY PERENNIALS AND BIENNIALS.—These may be treated like Hardy Annuals; or the seeds may be sown in July or August and the plants covered, after frost sets in, with a light litter of leaves or straw.

# Breck's Selected List of High Grade Flower Seeds

Aster, Breck's I	mproved Midsummer	
Breck's Choice	List of Asters	
BRECK'S CHOICE LIST OF ASTERS	¼ oz. I	Pkt
The demand for Breck's Asters from the leading commercial and private growers all over the United States is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded.	right habit, their growth is very vigorous and they produce long graceful stems to support their enormous flowers	.15
Cultivation.—Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, three inches apart.	of the plant seems given to the production of 12 to 18 long slender upright stems crowned with immense perfectly double flowers of the Ostrich Feather type. Pure white	.10
265. BRECK'S INTERNATIONAL PRIZE MIX- TURE.—This comprises all the best varieties and finest colors of large-flowering Asters. 4 oz. Pkt. Oz. \$3.50 \$1.00 \$0.10 ASTERMUM.—This is a beautiful new type of the Hohenzollern Aster. The flowers are of	EARLY WONDER.—These are the earliest Asters in cultivation. They are after the style of the Giant Comet and are destined to become the leading early Asters. They should prove a great boon to growers requiring large early blooms.	
'enormous size with very full centers. The plant is of sturdy growth with long, straight stems. This new departure in Asters should be welcomed by all Aster lovers.	257. Light Pink	.15
415. Lavender	260. BRECK'S DAWN OF DAY.—One of the earliest-flowering white Asters yet raised; it flowers about 10 days ahead of Qucen of the market. Of perfect form, erect growth, and	
253. PINK ENCHANTRESS.—The flowers of this new variety are always full and very double; the petals are wide and of medium length. The ones toward the centre folding in while those towards the outer edge gradually stand out more and more, the outside petals being almost flat. The plants are	long stems with pure white flowers  261. HERCULES.—This is an Aster raised from the large white variety of Hercules first offered in 1905. The plants grow in a semi-dwarf compact form about 20 inches high and produce immense and beautiful flowers of a rosy lilac shade. One of the most re-	.10
not of the branching, but more of the up-	fined of all Asters	.15

262. ECLIPSE.—The flowers of this beautiful and distinct variety are of immense size,		
often measuring 6 to 7 inches across. Pure white with thread-like florets and very	¼ oz.	
double		.15
SINGLE JAPANESE ASTER.—A new sort, reminding one of the single blooming Japanese		
Chrysanthemum; flowers in two colors,		
white and delicate rose, both having yellow		
central disks, encircled by long quilled petals, giving the bloom an unusually		
graceful and uncommon aspect. Plants		
make a large number of strong side stalks, right from the base of the main stem,		
making it a good sort for cut flowers, or		
for a late summer bedding variety.		
263. White		.15
264. Delicate Rose		.15
286. MAIDEN'S BLUSH.—A beautiful, extra		
large, light salmon pink, of branching habit; very free flowering		.15
		.1.9
287. GIANT WHITE EMPRESS.—This excellent variety is of very strong and sturdy		
growth. The flowers are of the purest		
white and very double, measuring five to six inches across		.15
		.10
266. BETTERIDGE'S QUILLED.—One of the finest Asters having quilled petals; flowers		
large and quite double. 2 ft	.30	.10
267. MAMMOTH MAUVE QUEEN.—This Aster		
is of the Giant Comet type. The flowers,		
which are extra large and very double, are		
borne on long stems. The color is pearl- gray, approaching lavender. It is an acquisi-		
tion to the Aster family. 2½ ftOz. 4.00		.10
BRECK'S GIANT JAPANESE.—An improved		
type of the Giant Comet, with long wavy, twisted petals, flowers of good substance		
and well formed. 2½ ft.

Antirrhinum

#### **ANTIRRHINUM** (Snapdragon)

(Snapdragon)

These showy perennials can be treated as annuals by sowing the seed under glass during January or February. The tall sorts are fine in borders. The dwarf make splendid beds. They prefer a light, warm, but a well enriched soil. Seed sown outdoors in May will produce satisfactory results. If grown indoors they require about the same temperature and require about the same temperature and treatment as carnations. Most of the varietics are fairly hardy and will live through winter if well covered.

Three good Greenhouse varieties which we consider the

here good Greenhouse varieties which best for use under glass:

Nelrose. A beautiful shade of silvery pink.

Phelps White. Very free-flowering pure white.

Silver Pink. True silver pink.

Each variety 35c pkt., 3 pkts. \$1.00

#### **AQUILEGIA**

#### (Columbine)

This family is one of the most beautiful and

popular among hardy perennials. The dif- ferent varieties present an unusual wealth of		
color and form. For growing in borders or		
filling up bays in shrubbery they are unsur- passed. Seed sown in the house, in March		
will frequently produce bloom the same year.		
It is best, however, to sow seed out of doors		
when ground warms up. Any ordinary gar- den soil is suitable for their growth. The		
flowers are fragrant.	1/4 oz	Pkt.
200. Alba, Fl. Pl. Double white, 2 ft		.10
201. Breck's Long Spurred Hybrids, 3 ft.		
Choice mixed. This strain is the finest we can procure. The colors range through the		
most beautiful combinations of blue, bright		
rosc, pink, mauve, white, yellow and orange.		.25

brilliant orange flowers. Hardy perennial. 2½ ft.	2.50	.10

### BELLIS PERENNIS

DOUBLE ENGLISH DAISY.—The English

Daisies are very popular spring-flowering,		
percnnial plants; they are very often used		
for bedding with Pansies, Forget-me-nots,		
Silenes, etc. They grow about 4 inches high and have a flowering season from		
May until Sept. They are easily grown.		
Seed can be sown either in spring or in		
mid-summer. They require protection in a		
cold frame during winter.	Oz.	Pkt.
486. Breck's Giant Double White. Larger		
than Snowball; each plant has very few		
flowers but they are enormous in size		.25
489. Breck's Giant Double Pink. Similar to		
above except in color		.25

Calendula (Pot Marigeld)

# CALENDULA

(Pot Marigold)

"The Marigold of Shakespeare's time." One of

the most popular and easily grown hardy		
annuals. The plants are free-flowering and		
do well in almost any situation, although		
they prefer a warm, loose soil. They bloom		
the whole season. It is usual to sow the		
seeds where the plants are intended to stand,		
but they will bear transplanting. Calendula		
make good pot plants and flower freely dur-		
ing the winter.	Oz.	Pkt.
559. Lemon Queen. (Special Strain). Large

Candytuft, Breck's Giant White

#### CANDYTUFT

(Iberis)

Very showy, branching annual plants that produce flowers which embrace nearly all shades of red, purple and white. A succession of sowings lengthens the season of bloom. Seed sown outdoors in spring will produce flowers from July until September. Is very effective for beds, borders, etc., and useful for pot culture during winter. Grown

extensively by florists for cutting.		
605. Breck's White Giant. The best large-flowered white variety. It produces giant	Oz.	Pkt.
spikes of pure white flowers. Excellent for greenhouse culture; for outdoor bedding it		
is unexcelled	1.00	.10

Campanula Calycanthema

#### **CAMPANULA**

Very well-known, useful and attractive annuals, biennials and perennials. The annual varieties should be sown in April or May, the biennials in May or June, and the perennials in June and July.

#### Biennial Varieties

CALYCANTHEMA (the popular cup and saucer Canterberry Bell).—It is without doubt the finest type of this old-fashioned and beautiful garden plant. The calix, which is extra large and of the same color as the trumpet, enhances the beauty of the flower and gives it the appearance of a cup and saucer. When grown in pots for conservatory decoration the plants are very effective; they transplant Oz. ¼ oz. Pkt. well. 21/2 ft.

Centaurea

#### **CENTAUREA**

C. Cyanus is the favorite Bachelor's Button, or Ragged Sailor. This class is of the easiest culture and produces an abundance of bright colored and beautifully formed flowers throughout a very long season. The strain of seed we offer embraces everything desired in color and form. Sow seed early outdoors and thin out the plants to 6 or 8 inches apart, or in boxes in the house, and transplant when large enough.

CYANUS (Bachelor's Buttons).         Hardy annual, 1 ft.       1/4 lb. Oz. Pkt.         Single Varieties         666. Emperor William. Blue       1.00       .30       .05         667. CENTAUREA (Continued)		
MOSCHATUS (Sweet Sultan).	Oz.	Pkt.
691. Rosea. A new variety of annual Sweet		
Sultan which grows about 3 ft. high; the		
color of the flower in opening is a delicate rosy-white changing to tender rose-pink		
later. The plants are of the same size and		
form as the white and purple varieties. This is a splendid variety for cutting purposes	2.00	.15
695. Choice Mixed	.60	.05
696. Suaveolens. Yellow	1.00	.05
697. Blue	1.00	.05
698. White	1.00	.05
680. Americana. Flowers rosy-lilac often measuring 4 inches across, 3 ft	¼ oz.	Pkt. .10
681. Americana Alba. Pure white	.50	.25
700. Odorato Chameleon. Yellow and rose,		
very fragrant, 1½ ft		.10
701. Margaret. Flowers pure white, 2½		Pkt.
inches across	1.25	.10
These varieties are widely used for carpet-		
bedding and edging and thrive almost any-		
where. A little care is necessary in watering young seedlings.		
704. Candidissima (Dusty Miller). Broad,		
silvery foliage, 1 ft% oz. 1.00		.20
706. Gymnocarpa. Narrow silvery foliage,	1.00	10
1 ft	1.00 ¼ oz.	.10 Pkt.
702. Montana Blue. Large blossoms of deep	/4 UZ.	I Kt.

pretty plant with curious heads of pink flowers. Hardy annual. 2 ft	1 50	* ^
flowers. Hardy annual. 2 ft	1.50	.10

#### **CHRYSANTHEMUMS**

#### Annual Varieties

All the summer flowering chrysanthemums are very effective and showy plants for beds and borders, besides affording an immense material for cutting. Sow seed where the plants are wanted to bloom and thin out to 9 inches apart; earlier flowering plants can be had by sowing early in March in a cold frame, and transplanting when large enough.

#### **COREOPSIS**

(Calliopsis)

A species of very showy annual and perennial
plants that are invaluable for garden decora-
tion and cutting. They enhance the color
of the garden by the wealth of bright yel-
low flowers, which is strengthened in some
sorts by disks of rich crimson, maroon and
various shades of brown. The perennials are
all hardy border plants and well worthy a
place in every garden. The flowers last
well when cut.
884. FIRE KING.—The flowers are of a deep

384. FIRE KING.—The flowers are of a deep bright scarlet. Very free flowering, the plant being a mass of blooms. As many as 700 blooms have been counted on one plant. 18 in. high

#### COSMOS

(Cosmea)

We especially recommend Breck's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades. Sow seeds of Breck's Early Flowering varieties in open ground, in light warm soil, early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine for successful growing. High-grade fertilizer, rich in potash, such as Breck's Lawn and Garden Dressing, gives best results. Seeds of the later varieties should be sown early in March in a hotbed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot into 4-inch pots. Transplant to open ground in June.

BRECK'S NEW EARLY GIANT.—This wonderful New Cosmos makes a bushy plant and grows 4 to 5 feet high. It begins to bloom about the middle of July and bears large flowers 4 inches or more in diameter. The foliage is the same as the Late Flowering. Seeds should be sown in house or hotbed

but can also be sown outdoors early in May.	¼ oz.	Pkt.

(Umbrella Plant)

970. A greenhouse plant. The leaves, which are borne on long stems at the top, spread in the form of an umbrella.....

> Ravine House, Randolph, N. H., Sept. 28, 1916.

MESSRS. JOS. BRECK & SONS,

Dear Sirs:

Dear Sirs:—

The seeds you supplied me have produced a most wonderful display of flowers and have been the admiration of all who have seen them and I have received many compliments which I feel is part due to the "House of Brecks" for supplying really reliable seeds.

Yours truly,

(Signed) FRANK HILL.

Cyclamen, Breck's Imperial Strain

#### CONVOLVULUS

(Morning Glory)

Convolvulus Major is the old favorite, and grows rapidly to a height of 10 feet. The other two sorts are new and fine, especially the Japanese Morning Glory. They bear large and wonderfully colored flowers. The dwarf Morning Glory is suitable for growing in clumps or beds, and fine for hanging

baskets, window boxes, etc.

Dianthus (Annual Pinks)

Digitalis or Foxglove

# **DIGITALIS**

(Foxglove)			
Excellent hardy perennials, producing long clusters of tubular flowers. Splendid for			
shrubberies, shady places and borders.	Oz.	Pkt.	
1094. Breck's Selected Mixed. Giant spikes of	f		
flowers in a splendid variety of color, 4 ft.	1.00	.10	
1095. Gloxiniaflora. Mixed, 4 ft	.60	.05	
1096. Grandiflora. Yellow, 4 ft	.60	.05	
1097. Maculata Superba (Ivory Spotted), 3 ft.	.75	.05	
1098. Purpurea (Common Red Foxglove).			
Purple, 3 ft	.40	.05	
1099. Alba. White, 3 ft	.60	.05	
1100. Rosea. Pink, 3 ft	.75	.05	
1101. Monstrosa Superba. Mixed, 3 ft	1.50	.10	
1102. Mixed. 3 ft	.50	.05	
DICTAMNUS (Dittany, or Gas Plant).—An old garden favorite with fragrant, glossy foliage that gives forth an odor like lemon when rubbed in the hands; a great favorite with bees.			
1090. Fraxinella. Purple	.50	.05	
1091. Fraxinella Alba. White	1.00	.10	

Dimor phothetic Huraniana 11, 51,140		
DIMORPHOTHECA (South African Daisy).  1103. Aurantiaca. A rare and exceedingly rich flowering annual of easy culture. The plants, which are of neat branching habit, grow from 12 to 15 inches high and produce Marguerite-like blossoms 3 inches in diameter. The color, a beautiful deep goldenorange, is rendered more conspicuous by the		
dark disc in the center	.60	.15
1104. Aurantiaca Hybrids. These new, se-		
lected hybrids are like the parent, Dimor-		
photheca Aurantiaca, in habit and growth.		
The colors range from white to bluish and		
pinkish white, sulphur to golden yellow,		
salmon to rose and other delicate tints.		
These hybrids are a valuable addition to the		
class of plants which may be easily grown		
from seed		.15
1108. Sinuata. This is a new and distinct		
variety. The flowers are clear satiny buff		
with a bluish disc; when fully expanded the		
under sides of the petals are purplish red.		
The light green foliage is obtuse and sinuate.		
A novelty of great merit		.25
1109. Dimorphotheca, Aurantiaca Hybrida		
Flora Plena. (For description, see Novelty		
page number)		.25
DAHLIA.—We offer seed from the finest col-		
lection in Europe. If the seed is started		
early in a hot-bcd an abundance of flowers		
will be produced the same season. Dahlias	_	ъ.
like a rich, deep soil. The roots should be	Uz.	PKt.
housed during winter.		
975. Cactus. Mixed		.25
976. Double Grandiflora. Mixed		.25
977. Pompon. Mixed, 2 ft		.25
978. Tom Thumb. Mixed, 1½ ft		.25
979. Double Glory. Flowers vary in size from		
1 to 3 inches and resemble Scabiosa		.10
980. Monarch. Dark crimson; cross between		
a double and cactus; very large, semi-double		.10
981. Breck's Single Perfection. Mixed		.10
982. Collarette. Single, mixed		.20
983. Paeony Flowered. Mixed		.20

DATURA (Trumpet Flower).—Handsome ornamental annuals with large trumpet-shaped		
flowers. 2 to 3 ft. In large clumps or bor-		
ders of shrubbery these produce an excel- lent effect. They do well on light sandy		
soil.	Oz.	Pkt.
990. Cornucopia. White, mottled with royal	1 00	
purple	1.00	.05
992. Humilis. Double, yellow	.60	.05
994. Annual Mixed	.50	.05
1105. DODECATHEON MEADIA (Cow-slip).—		
An old-fashioned perennial with drooping, purple flowers, 1 ft		.10
DOLICHOS (Hyacinth Bean).—A rapid-grow-		.10
ing, hardy annual climber with white or		
purple flowers which are followed by ornamental seed pods.		
1110. Lablab. Purple, 10 ft	.25	.05
1111. Alba. White, 10 ft	.25	.05
1112. Mixed. 10 ft	.25	.05
DRACAENA.—Beautiful ornamental foliage		
plants, useful for greenhouse and sub-trop- ical decoration; their graceful habit also		
makes them splendid bedding plants for		
lawns. Indivisa has narrow, green leaves. The under side of the midrib of Veitchii is a		
deep red.		
1120. Australis. Green	1.70	.10
1121. Indivisa. Green	1.50	.10
1125. ECHINACEA PURPUREA.—A free-flow-		•10
ering perennial with large reddish-purple		
flowers, 3 ft		.10
ber).—Rapid growing vine with bright green		
foliage and clusters of white flowers. One of the best annual climbers for covering old		
fences, trellises, etc. Soak the seed in water		
for 20 hours before sowing	.25	.05
1135. ECHINOPS RITRO (Globe Thistle).— Magnificent perennial with large thistle-like		
heads of light blue flowers, 3 ft	.60	.05
1145. EDELWEISS ALPINUM (Leontopodium Alpinum).—A hardy perennial plant from		
the Swiss Alps; star-shaped white flowers,		
6 inches		.25
1160. EREMURUS ROBUSTUS.—A stately plant with long spikes of soft flesh pink		
flowers, 8 ft		.25
1165. ERIANTHUS RAVENNAE.—Resembles Pampas grass; graceful plumes, and varie-		
gated foliage	.40	.05
1170. ERIGERON AURANTIACUS.—An excel-		
lent hardy perennial, producing orange flowers on stocky stems		.10
1175. ERYNGIUM AMETHYSTINUMHand-		
some ornamental hardy perennials, with beautiful thistle-like heads of azure blue,		
very finely cut foliage; excellent for winter		
houquets		.10
Handsome species with small round flower		
heads of pale blue		.10
A graceful greenhouse plant of very rapid		
growth; bluish foliage		.10
ing long graceful leaves and plume-like		
spikes of red-brown flowers; excellent for growing in clumps. Hardy perennials, 6 ft.		
1215. Japonica		.10
1216. Zebrina		.10
perennial bearing clusters of white flowers,		
2 ft.	1.00	.10

Large showy flowers in shades of yellow, orange, rose and white. The foliage is bluish green and very attractive. For a display in beds and borders as well as for cutting, these flowers are very satisfactory. The plants are fairly hardy and seed may be sown quite early where wanted to bloom.		
Hardy annual.	Oz.	Pkt.
1184. Erecta Crocea. Very fine double, large orange flowers, very like a Marechal Neil		
Rose	1.00	.15
1185. Erecta Compacta (Dainty Queen). Pale pink, lovely delicate shade	1.00	.15
1186. Erecta Diana. Rosy white petals, beau-	1 00	1.7
tifully fluted, delicate and attractive	1.00	.15
1187. Erecta Compacta (Mandarin). Rich, deep orange, shaded crimson; fine compact		
habit	1.00	.10
1188. Californica Alba. Pure white	.30	.05
1190. Californica (Golden West). An im-		
proved strain of Californica yellow; orange		
centre, 1 ft	.40	.05
1191. Californica. Rose cardinal	.60	.05
1192. Fine Mixed. 1 ft	.30	.05
1195. Breck's Giant. Mixed	1.00	.10
1198. Double. Choice mixed, including all the		
new and beautiful shades	1.00	.10
EUPHORBIA.  1225. Heterophylla. Glossy-green leaves, turning a brilliant orange scarlet about the middle of summer		.10
1226. Variegata (Snow on the Mountains). Fine for bordering, with its clusters of white flowers and foliage variegated green and		
white		.05
1240. FREESIA REFRACTA ALBA.—A fra- grant bulbous plant, extremely useful for		1.5
cut flowers. Tender perennial, white, 2 ft		.15

FUCHSIA.—A handsome bushy plant with numerous bell-shaped flowers. Tender per-		
ennial.	Oz.	Pkt.
1245. Hybrida. Singled, mixed		.50
1246. Hybrida. Double, mixed		.50
FUNKIA.—An excellent border plant with large leaves and clusters of fragrant flowers borne on spikes well above the foliage. Hardy perennial. 2 ft.		
1250. Alba. White Plaintain Lily		.10
1251. Coerulea. Blue	.60	.10
GAILLARDIA		
(Blanket Flower)		
A genus of most beautiful plants bearing many brilliantly colored flowers. The perennial varieties have many daisy-like blossoms, mostly in the yellow shades with dark centres. The annual varieties are very showy and are well adapted for garden decoration and cutting. 1½ ft.		
Annual Varieties		
1253. Lorenziana ("The Bride"). Double white	.80	.05

#### Gloxinia, Avalanche

GLOXINIA	
The Gloxinias are a magnificent race of sum-	1
er-flowering plants. Their rich velvety	
green leaves and graceful tubular flowers	
make them invaluable for greenhouse and	
conservatory decoration.	Pkt
1326. Avalanche. Pure white	.5
1329. Brilliant. Crimson	.5
1330. Defiance. Scarlet	.5
1331. Goliath. Purple	.5
1332. Hetherset Hybrids. Mixed colors	.5
1335. Breck's Giant Hybrids. Mixed. A mag-	
nificent strain saved from the newest and	
best sorts; the flowers are immense, of	
perfect form and beautiful colors. Hand-	
some foliage	.5
GERBERA (Transvaal Daisy).—A handsome	
plant with large daisy-like flowers, 3 to 4	
inches across, on 12 to 18 inch stems. Un-	
surpassed as cut flowers on account of their	
splendid lasting qualities. They are easily	
grown from seed and will flower the first	
year. Half-hardy perennial, 11/2 ft.	
1300. Jamesoni Gigantea. Scarlet	.2
1301. Hybrida. Mixed colors. A much im-	
proved strain of Jamesoni. The colors,	
which are exquisitely delicate and rich, in-	
clude salmon, yellow, orange, rose, cerise,	
white, violet, and ruby-red. The beautiful	
long-stemmed flowers are excellent for bou-	
quets. They last for a long time after cut-	
ting. When sowing it is advisable to plant	
each seed with the pointed end projecting	
just above the surface of the soil. 3 pkts.	
for \$1.00	.3
GEUMFine herbaceous plants, well adapted	
for the hardy border. They produce an	
abundance of flowers suitable for cutting.	

1½ ft.
1304. Geum, Fl. Pl. (Mrs. Bradshaw). Very large double flowers of the brightest scarlet

HELLEBORUS (Christmas Rose).—Hardy per-		
ennial plants that can be easily forced under		
glass and made to bloom at any desired		
time during the winter. They have large		
divided leaves and cup-shaped flowers about		
2½ inches across.		
1470. Niger. White, 1 ft		.10
1471. New Hybrids. Mixed, 1 ft		.20

Hollyhock, Breck's Silver Medal

# HOLLYHOCK (Althaea Rosea)

All selected English Grown

Breck's Silver Medal strain of seed is superior to any in vigor of growth, texture, quantity and range of color.

Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, cool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

Marigold

### MARIGOLD

#### (Tagetes)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the Dwarf French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. Sowings should not be made outdoors until danger from frost is passed.

1928. Moschata Alba. White. 2 ft	1.50	.10

#### MIGNONETTE

#### (Reseda Odorata)

Well known, fragrant favorites, delightful for

working into bouquets. For winter flowering seed should be sown in July or August. All the sorts we offer are very fine, but especial attention is called to Breck's Pride of the Market and Breck's Colossal as being particularly good and the most desirable for pot culture. A succession of bloom during both summer and winter may be had by repeated sowings. Oz. Pkt. 1991. Breck's Pride of the Market .- This year we have secured what we believe is the best strain of forcing mignonette ever developed. The seed we offer is grown under glass, and will produce enormous spikes of reddishgreen, deliciously fragrant flowers...... .50 1990. Breck's Colossal. Reddish-green...... 1992. Single Petunia

#### **PETUNIA**

Free-flowering, sweet-scented and easily cultivated. They are well-known favorites, effective and beautiful in borders, beds, vases, etc. They thrive in almost any soil and produce a brilliant array of color throughout a long season. Breck's Prize is an exceedingly fine strain of large fringed flowers that produces a large percentage of doubles. We call special attention to the collections offered. The seed is all saved from selected pot-grown plants, and we believe will prove perfectly satisfactory.

Shirley Poppy

# POPPY (Papaver)

Quite a number of the perennial varieties bloom the first year from seed if sown early. Our new strain of Shirley produces softer and more pleasing shades than we have offered hitherto. Sowings in May, and again several times during spring, produce a continuous bloom from early summer until frost. The seed should be sown where the plants are to bloom, as Poppies do not take kindly to transplanting. Cover seed very lightly, and firm the soil with a flat board. When large enough thin out the plants. A sandy loam and early spring sowings produce the best flowers.

Single Annual Varieties 2258. Shirley, Breck's Selected Mixed. An extra choice strain of these charming pop- pies. We pay special attention to the selec- tion of colors which contain pure white, pink, terra cotta, salmon, chamois, rosy carmine to deepest crimson, and rosy red. Many of the flowers are beautifully flaked or	Oz.	Pkt.

SALVIA	١
--------	---

(Flowering Sage)

Salvias are extremely popular and satisfactory bedding plants. The extreme brillianey and abundance of their flowers combined with their graceful branching habit makes them one of the most gorgeous and effective late summer and autumn-flowering plants. Seed should be sown in the greenhouse or hotbed during February or March in a tempera-ture of from 60 to 70 degrees. Cover the seed to a depth of only four times their size and press firmly with a board. Water with a fine spray as needed, never allowing them to dry out. Transplant to small pots when 2 or 3 leaves have formed. Set out in the open border when all danger from frost is passed. Oz. Pkt. 2658. Splendens, Bonfire (Scarlet Sage). Extremely handsome and effective variety producing large spikes of bright scarlet flowers. .20 hhP, 2 ft..... 2670. Splendens. Elegant tall-growing variety with immense flower spikes of dazzling scarlet. hhP, 3 ft..... .10 2672. Splendens, Triumph. Robust earlyflowering sort with scarlet flowers. hhP, 2 ft. .15 2674. Zurich. A splendid dwarf variety producing an abundance of long brilliant scarlet flower spikes throughout the summer. .25 hhP, 1 ft..... 2666. Patens. Splendid type with intense bright blue flowers. hhP, 2 ft..... .25 2786. SOLIDAGO LATIFOLIA (Goldenrod).-Hardy perennial producing large heads of deep golden-yellow flowers, often more than .05 a foot long; blooms late in summer. 3 ft. 2790. The following named varieties of Sweet Peas have been selected from those recommended by the leading specialists and we offer them as particularly desirable for general culture.

As early in the spring as the ground can be worked, sow the seed at a depth of 6 inches, in a trench which has been previously well prepared with manure to a depth of a foot or more. Cover the seed with an inch of soil; then, when the shoots appear thin out as necessary, and as the plants grow gradually fill the trench until nearly up to the level of the surrounding ground, the slight depression being left to retain moisture. Support the vines on brush or wire netting. Close picking of the flowers prolongs the season of bloom.

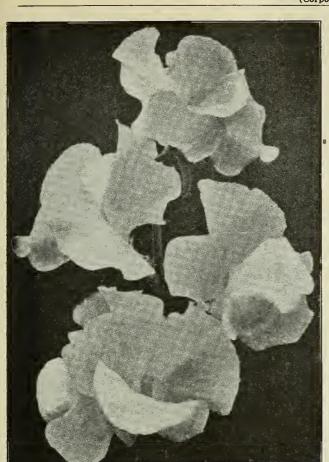

GIANT SPENCER, or ORCHID-FLOWERING VARIE-TIES.—The waved, or Spencer varieties of sweet peas represent the finest type yet introduced. Being of strong growth and bearing large flowers set on long stems, this type is preferred by gardeners and florists. The flowerstandard is round, with fluted or waved edges; as very few seeds are set, the blossoming season is lengthened.

1897. Giant Spencer, or Orchid-flowering ¼ lb.	Oz.	Pkt.
Mixture. This mixture contains in equal		
proportions colors of the finest varie-		
ties of Spencers. The flowers are large		
and waved, borne on sturdy stems; the

Verbena

#### **VERBENA**

Verbenas are the most popular and satisfactory bedding plants in cultivation. Their heads of brilliantly colored flowers are borne in constant succession from June until frost. The flowers are large and splendid for cutting.

To secure early plants the seed should be sown in the greenhouse or hot-bed in February or March and the seedlings transplanted to the open border in May.

Seeds may be sown in the open border when all danger from frost is passed. Oz. ¼ oz. Pkt. 3192. White

Zinnia

#### ZINNIA

One of the most popular and most extensively used of all our hardy annuals for beds, mixed borders and for cutting purposes. They require very little attention; will grow in any good garden soil. Seed sown early in heat will begin to bloom in June and continue until frost, or seed may be sown where they are intended to bloom as soon as frost has gone.

BRECK'S NEW GIANT (Grandiflora Plenissima).—The flowers of this variety measure from 5 to 6 inches across; are mostly very double, borne on long stiff stems. It is the finest strain of Zinnias we can procure.

#### BRECK'S COLLECTIONS OF FLOWER SEEDS

Collection "A," price 25c, contains one packet each of Mignonette; Alyssum, white; Sweet Peas, fine mixed; Phlox Drummondii, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

Collection "B," price 50c, contains the varieties in Collection "A," with the following additions. Nasturtium, Tom Thumb, fine mixed; Candytuft, finest mixed; Aster, fine mixed; Pansy, finest mixed; Eschscholtzia, fine mixed; Morning Glory, fine mixed.

Collection "C," price 75c, contains the varieties in Collections "A" and "B," with the following additions: Coreopsis, fine mixed; Balsam, fine mixed; Zinnia, fine mixed; Mourning Bride, fine mixed; Petunia, finest mixed; Calendula, "Meteor," yellow.

Collection "D," price \$1.00, contains the varieties in Collections "A," "B" and "C," with the following additions: Tall Nasturtium, fine mixed; Marigold, French, striped; Larkspur, dwarf Rocket; Poppy, double mixed; Convolvulus, dwarf mixed; Chrysanthemum, fine mixed; Antirrhinum, finest mixed.

Collection "E." This assortment produces a fine effect in the garden and all the sorts are suitable for bouquets. Price 50c. Abronia, Ageratum, Amaranthus Bicolor, Aquilegia, Aster, Chrysanthemum-flowered, Calliopsis, Collinsia, Dianthus Chinensis, Godetia, Mignonette, Phlox Drummondii, Zinnia.

Collection "F." The following kinds are specially suitable for growing in vases or hanging baskets. Price 25c. Alyssum Maritimum, Convolvulus Mauritanicus, Dwarf Nasturtiums, Lobb's Nasturtiums, Lobelia Gracilis, Mimulus Moschatus.

#### BRECK'S WILD GARDEN MIXTURE

Any one who has cultivated flowers in neatly laid out beds or carefully planted ribbon borders is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different scasons of bloom insuring something new almost every day. Pkt., 15c; oz., 25c; ¼ lb., 75c; lb., \$2.50.

#### SUMMER FLOWERING BULBS AND PLANTS

#### Amaryllis

Amaryllis. Lovely lily-like plants that produce flowers in almost every shade of color.

A. Belladonna Major. Rosy pink, fragrant. 25c each. A. Formosissima (Jacobean Lily). Blooms freely out of doors, flowers velvety crimson. 15c each; \$1.75

A. Johnsonni. Large crimson and white flowers. 75c each; \$4.00 per doz.

### Begonias. (Tuberous Rooted)

The flowers of these desirable bedding plants are not destroyed by rain storms, but seem to shine more brilliantly after every shower. The colors are varied and beautiful. Single flowered sorts are as follows: Red, Crimson, Scarlet, Rose, Pink, White, Yellow, Bronze, Striped. 5c each; 50c doz.; \$3.75 per 100; \$32.00 per 1000. Single Flowered Mixed. 4c each; 40c doz.; \$3.00 per 100; \$27.00 per 1000.

Double Flowered Sorts. Same color as the single kind. 10c each; \$1.00 per doz.; \$6.50 per 100; \$55.00 per 1000. Double Flowered Mixed. 8c each; 85c doz.; \$5.50 per

100; \$50.00 per 1000. New Single Frilled. The flowers of this variety are very large, borne on stout stems and beautifully frilled. In six separate colors. \$1.00 per doz.; \$7.50 per 100. 1 dozen our selection, \$2.50.

# Breck's Quality Cannas

Canna "Niagara"

Alice Roosevelt. 4 ft. A good old variety with dark green leaves and large salmon-scarlet flowers. 15c each; \$1.50 per doz.

Antoine Crozy. 31/2 ft. Green foliage; large red flowers, bordered with golden yellow. 15c each; \$1.50 per doz.

Beacon. 4 to 4½ ft. Green foliage; produces great masses of rich cardinal flowers. 15c each; \$1.50 per doz.

Beaute Poitevine. 3½ ft. Green foliage; dark crimson flowers of large sizc. 15c each; \$1.50 per doz.

Charles Henderson. 4 ft. Green foliage; flowers of deep crimson, with flame-yellow throat. 15c each; \$1.50 per doz.

Florence Vaughan. 31/2 ft. Green foliage; flowers rich golden yellow, thickly spotted with bright red. 15c each; \$1.50 per doz.

Gladiator. 4½ ft. Green foliage; large crimson flowers. Good for center or back of bed. 15c each; \$1.50 per

Hungaria. 3½ ft. Green foliage; flowers very large, blush pink with satiny sheen. 25c each; \$2.00 per doz. Indiana. 4 ft. Green foliage. An orchid-flowering variety; single blossoms, glistening golden-orange, often 6

inches across. 15c each; \$1.50 per doz.

Kate F. Deemer. 4 ft. Green foliage. A grand flower of rich, oriole-yellow, which gradually gives place to turkey-red in the centre. The throat is almost white. 25c each; \$2.50 per doz.

King Humbert. 4 ft. Bronze foliage with brownish green stripes, large thick and leathery. Flowers large, bright orange-scarlet streaked with crimson. 15c each; \$1.50 per doz.

Loveliness. 3 ft. Green foliage. The color of this exquisite Canna is difficult to describe, though "bright ruby crimson" will perhaps convey an idea of its loveliness. The blooms are formed on large heads in perfect form, and we consider it one of the finest Cannas in existence. 25c each; \$2.50 per doz.

Meteor (Wintzer's). 5 ft. Green foliage; flowers of a deep, dazzling crimson. Undoubtedly the best red Canna in existence. 50c each; \$5.00 per doz.

Mrs. Alfred F. Conard. 4 ft. Green foliage; the most popular pink Canna ever introduced; unsurpassed for planting either singly or in large beds. The salmonpink flowers are of the largest size. 30c each; \$3.00 per doz.

Mont Blanc. 31/2 ft. Green foliage; almost pure white flowers; the largest near-white Canna in existence. 25c each; \$2.00 per doz.

Niagara. 3 ft. Green foliage; flowers are rich, deep crimson with irregular border of golden yellow; a popular variety. 15c each; \$1.50 per doz. Nigricans. 6 ft. Bronze foliage; flowers brick-red. 15c

each; \$1.50 per doz.

Olympic. 5 ft. Green foliage; flowers are very large, of a captivating shade of rich orient-red, with centre of lighter shade and dappled carmine. 50c each; \$5.00 per doz.

Panama. 3 ft. Green foliage; flowers are of an unusual, attractive, rich orange red, with edge of bright golden yellow; the petals are almost round, being as broad as they are long. A very striking Canna. 35c each; \$3.50

Pennsylvania. 6 ft. Green foliage; flowers large, pure, deep scarlet. A very fine orchid-flowering variety. 15c each; \$1.50 per doz.

Pillar of Fire. 6 ft. Green foliage; the giant of its class; flowers bright crimson scarlet, borne in erect spikes like blazing torches. 15c each; \$1.50 per doz.

President Meyer. 4 ft. Bronzy foliage; flowers large, rich, cherry carmine. 15c each; \$1.50 per doz.

Rosea Gigantea. 4 ft. Green foliage. Rich rose-pink flowers of giant size; a prodigious bloomer. The color is unusually pleasing and is most popular. 25c each; \$2.00 per doz.

Richard Wallace. 4 ft. Green foliage; flowers large, pure yellow. 15c each; \$1.50 pcr doz.

Splendor. 41/2 ft. Green foliage. Very large, well spread-out flowers of intense scarlet. 25c each; \$2.50 per doz.

Wabash. 4 ft. Bronze-leaved. Flowers carmine pink, unusually large. Well described as the bronze-leaved Rosca Gigantea. 20c each; \$2.00 per doz.

William Saunders. 4 ft. Bronze leaved. A constant bloomer, the flowers often 5 inches across, bright scarlet. 15c each; \$1.50 per doz.

Wintzer's Colossal. 5 to 6 ft. Green foliage. Orchid flowers 8 inches across, vivid scarlet; the largest Canna in commerce. 35c each; \$3.50 per doz.

See Special Catalog of Gladioli, Cannas and Dahlias.

### **BRECK'S GLADIOLI**

(See pages 6 and 7 for additional list)

Gladioli Panama

# GLADIOLI MIXTURES

Breck's Exhibition Mixture. A superb collection, giving a wide range of color of wide open flowers, beautifully marked and including many of the named varieties. Especially selected as to combination and blending of colors, so that they may be used for cut flowers as well as for massing. \$1.00 per doz.; \$5.00 per 100.

Breck's Garden Mixture. A good mixture containing almost every shade known in the Gladioli family. 50c

per doz.; \$3.00 per 100; \$20.00 per 1000.

# Breck's Hardy Plants

Nursery Department conducted by BRECK-ROBINSON NURSERY CO. Munroe Station, Lexington, Mass.

An Effective Mass-Planting of Frau Karl Druschki

### ROSES

Roses are probably the most popular and satisfying of the out-of-door flowers. Given plenty of sunshine and water, they more than repay their cost in wealth of bloom the first season.

After May first, only potted roses will be supplied, as experience has shown that dormant plants can scarcely be relied upon for vigorous growth if set out later than that date. In early spring, dormant roses will be furnished at prices noted.

# Hybrid Perpetual Roses

Dormant Plants (before May 1st), 35c each; \$3.50 per doz.; \$20.00 per 100.

Potted Plants, 50c each; \$5.00 per doz.

(Unless otherwise priced.)

Alfred Colomb. Large, free-blooming; brilliant carminecrimson

Anne de Diesbach. Very large and fragrant; carmine. Baroness Rothschild. Well-shaped; hardy; light pink. Vigorous and extra fine; flesh, shaded with rosy pink.

Earl of Dufferin. Vigorous; velvety crimson, shaded maroon.

Frau Karl Druschki (Snow Queen). The best white rose. George Dickson. One of the darkest of the red roses; velvety black-crimson, heavily veined with deep crim-

son maroon. 75c. is Majesty. Often called the "Crimson Frau Karl His Majesty. Often called the "Crimson Frau Karl Druschki." Blooms large and full; deep, dark crimson,

highly perfumed. 50c.

George Arends (Pink Frau Karl Druschki). Like the foregoing, this retains the size and fullness of the famous white Druschki, but is a delicate pink in color.

General Jacqueminot. Fragrant; good forcer; scarletcrimson.

Hugh Dickson. Large and full; crimson and scarlet. John Hopper. Profuse bloomer; brilliant rosy crimson. Madam Gabriel Luizet. Large, cup-shaped; pink. Magna Charta. Fragrant; pink, suffused with carmine. Margaret Dickson. Large petals; white, pale flesh center.

Marshall P. Wilder. Fragrant; blooms late; cherry-car-

Mrs. John Laing. Large, fine form; soft pink. Paul Neyron. Extra large, free blooming; deep rose. Persian Yellow. Large, free-blooming; deep golden yel-

Soleil d'Or. Shades of golden yellow and orange. Dor-

mant, 50c each; potted, 75c each.
Ulrich Brunner. One of the best; cherry, lighted with red.

# Tea or Everblooming Roses

Prices given are for dormant and potted plants, or potted plants only, unless otherwise noted.

Arthur R. Goodwin. Continuous bloomer; coppery red. 75c each.

British Queen. Buds slightly flushed, opening pure white. Type of flower between White Maman Cochet and Frau Karl Druschki. 75c.

Caroline Testout. Free bloomer; clear, bright rose. 35c and 50c

Edward Mawley. One of the most beautiful of the everblooming roses. Flowers are rich crimson, shaded with velvety maroon. 75c.

Etoile de France. Cup-shaped, fragrant; velvety crimson. 35c; not potted.

Francisca Kruger. Coppery yellow, shaded with peach. 50c and 75c.

Francis Scott Key. A heavy double rose of great substance; finely formed, free-blooming, rich crimson red.

General MacArthur. Very fine; crimson-scarlet. 35c; not potted.

Gloire de Dijon. Hardy; combined salmon, rose, and yellow. 50c; not potted.

Gruss an Teplitz. Hardy; very free-flowering; velvety crimson. 50c.

Hermosa. Flat form, double; bright rose. 35c; not pot-

ted. Hoosier Beauty. Velvety, glowing crimson-scarlet, with dark shading. The bud is of good length. \$1.00.

Jonkheer J. L. Mock. Carmine, changing to pink. 50c; potted.

Kaiserin Augusta Victoria. Large; creamy white.

and 50c. Killarney. Queen of the Irish roses; carmine-pink. 35c

and 50c. La France. Constant bloomer; rose, changing to silvery pink. 35c and 50c.

Mad. Edouard Herriot (The Daily Mail Rose). double, of a superb coral red, shaded with yellow and bright rosy scarlet passing to shrimp red; buds slender and pointed. 75c.

Special Rose Catalogue sent on request.

### TEA ROSES (Continued)

Actinidia polygama, or arguta. Glossy foliage with red stems. Strong grower. 3 yr., 50c each, \$5.00 doz.

Akebia quinata. Clover-like leaves. 30c each, \$3.00 doz. Ampelopsis quinquefolia. Common woodbine, or Virginia

creeper. 3 yr., 30c each, \$3.00 per doz., \$15.00 per 100. A. var. Englemanni. Like above, clings to wall surfaces. 3 yr., 25c each, \$2.50 doz.

A. Veitchii (or tricuspidata). "Boston Ivy." Commonly used for covering buildings. 3 yr., 30c, \$3.00 per doz.

Aristolochia sipho (Dutchman's Pipe). Lar shaped leaves. 2 yr., 50c; 3 yr., 75c each. Large heart-

Celastrus Scandens (Roxbury Waxwork; Bitter sweet). Shrubby climber. Orange and crimson, capsuled fruit. 3 yr., 35c each, \$3.00 per doz.

Clematis paniculata. Rapid grower. White fragrant flowers in September. 3 yr., 25c each, \$2.50 per doz.; 4 yr., 35c each, \$3.50 per doz.

C. Virginiana (Virgin's Bower). Good climber, white flowers and tufted seeds. 3 yr., 30c, \$3.00 per doz.

Clematis, Large Flowered. 50c; \$5.00 per doz.

C. Henryi. Large creamy white flower.

C. Jackmani. Violet purple, free flowering.

C. Madame Andre. Large crimson flower.

Hedera Helix (English Ivy). Dark, glossy, evergreen leaves. Fairly hardy. 30c; \$3.00 per doz. Extra large, \$1.00 to \$5.00 each.

Humulus Lupulus (Hop-Vine). July and August. Rapid grower. 20c; \$1.50 per doz.

Lonicera Halleana (Hall's Evergreen Honeysuckle). Blooms all summer; rapid grower. 2 yr., 30c, \$3.00 per doz.

L. Periclymenum Belgicum (Belgian or Dutch Monthly Honeysuckle). Red and yellow; fragrant flowers all summer. 30c each, \$3.00 per doz.

L. Sempervirens (Scarlet Trumpet Honeysuckle). Tubular flowers, handsome foliage and fruit. 3 yr., 35c each; \$3.50 per doz.

Tecoma (Bignonia) radicans (Trumpet Vine). Orange and scarlet flowers. 35c; \$3.50 per doz.

Vitis heterophylla. Strong grower; steel-blue berries. 35c each.

Wistaria Chinensis (Chinese Wistaria). Pendulous blue flower, clusters in May. 75c; extra large, \$1.00 each.

W. var. alba. White flowered variety. 75c each.

W. Multijuga. Extra long purple flower-racemes. 75c each.

Trellises, Arches, Arbors, in stock and to order.

### THE PAEONIES

Peony Jeanne d'Arc

Paeonies should be planted in good, rich, deep moist soil, after which they will require less attention than any other class of flowering plants. They are perfectly hardy and their remarkable freedom from disease and insects makes them most desirable. Paeonies thrive in all locations whether in the broad sunlight or partial shade.

Albatre. Milk-white, tinged lilac, edged with carmine. Fragrant. Tall, mid-season. 50c each; \$5.00 doz.

Charlemagne. Lilac-white with blush center. medium-tall; late. 50c each. Couronne D'Or. Pure white, with yellow stamens, tipped

carmine. Medium tall; late. 75c each; \$7.50 per doz. Duchesse de Nemours. Pure white crown, sulphur-white

collar. Fragrant. Medium height; early. 50c each; \$5 doz.

Felix Crousse. Late. Deep crimson, marked with cardinal. 75c each; \$7.50 doz.

Festiva Maxima. Pure white, prominently flecked crimson; outer petals sometimes faint lilac-white. Tall; early. 50c each; \$5 doz.

Jeanne d'Arc. Large, bomb type; center pale lilac, collar cream white touched with sulphur; mid-season. 50c

Madam Crousse. Pure white; center flecked crimson; mid-season. 50c each.

Madam de Verneville. Pure white, center blush fading to pure white, carmine flecks. Medium height; early. 50c each.

Marie Lemoine. Pure white with cream-white center, occasional carmine tip. Medium height; very late, 50c each.

Meissonier. Brilliant purple red. Very tall; mid-season. 50c each.

Monsieur Dupont. Milk-white center, splashed crimson. Tall; mid-season. 75c each.

Mont Blanc. Pure white with cream white center. 75c each; \$7.50 doz.

Officinalis Rosea. Crimson, changing to rose. 35c each. Officinalis rubra. The old-fashioned red paeony. 35c each. Choice Mixed. Unnamed varieties. 25c each; \$2.50 doz.

# Japanese Single Paeonies

Few plants can vie with the Single Paeony for beauty, and an established bed in full bloom is gorgeous. Price 50c each; \$5 per doz.

Diana. White, creamy white center.

Dragon. Very large dark crimson.

Mikado. Deep lilac rose, silvery markings.

# Hardy Phlox

We have made a specialty of the hardy Phloxes, aiming to evolve a stock of only the more desirable varieties. To those who are not familiar with recent acquisitions, the new sorts will be a revelation. Price of Named Varieties, 15c each; \$1.50 per doz., except as noted.

Africa. Carmine purple, blood-red eye. 25c each; \$2.50 doz.

Annie Cook. Flesh pink. Very fragrant.

Baron Van Dedem. Glistening scarlet, blood-red. 20c each.

B. Comte. Brilliant, rich French purple. 20c each; \$2.00 doz.

Bridesmaid. Pure white, crimson-carmine eye. 20c each; \$2.00 doz.

Elisabeth Campbell. Light salmon, pink center. The best pink Phlox for bedding. 25c each; \$2.50 doz.

Europa. White with crimson-carmine eye. The individual flowers and trusses are very large. 25c each; \$2.50 doz.

Frau Ant. Buchner. The finest pure white Phlox. 25c each.

General Chanzy. Scarlet-pink, with salmon tint. Brilliant.

General Van Heutsz. Brilliant salmon-red; with white center. 20c each; \$2 doz.

Geo. A. Strohlen. Bright scarlet, with crimson red eye. Large flower. 20c each; \$2.00 doz.

Goliath. Rich crimson carmine; very tall. 20c each; \$2.00 doz.

Gruppenkonigin. Flesh colored rose, carmine eye. 20c each; \$2 doz.

Independence. Large pure white flowers. Dwarf habit. Jeanne d'Arc. Pure white. Flowers extra large. Late.

Le Soleil. Bright china rose, rose center. Early. Miss Lingard. White. June to August. Foliage glossy. Mad. Paul Dutrie. Soft pink color. 20c each; \$2 doz. Rynstrom. Uniform color, not unlike that of Paul Neyron Rose. 20c each; \$2.00 doz.

R. P. Struthers. Bright pinkish salmon, with crimson eye. New and most excellent.

Rosenberg. Bright reddish-violet with blood red eye. Stella's Choice. Tall; pure white, very late.
Von Lassburg. Pure white flowers.

# **Dwarf Species**

Phlox subulata (Moss Pink). Pink, 4 to 6 inches, April and May. Foliage, moss-like and deep green. 10c each; \$1 per doz.

P. var. alba. White, 4 to 6 inches, April and May. Very floriferous and handsome. 10c each; \$1 doz.

Phlox Europa

For additional varieties and descriptions see Nursery Catalogue.

Iris Germanica (German Iris)

# German Iris

The German Iris is among the most desirable and easiest grown of our spring-flowering hardy plants, producing in May showy flowers of exquisite coloring, com-bining the richest and most delicate tints. For best results plant in a well-drained, sunny position, barely covering the roots.

In the following description "S" signifies the standards, rerect petals; "F" the falls, or drooping petals. Prices, except where noted, 15c each; \$1.50 per doz.; or erect petals;

\$10.00 per 100.

Asiatica. S. Purple plume. F. Darker purple.

Aurea. S. and F. Clear rich yellow.

Canary Bird. S. Canary-yellow. F. Crimson-purple. Celeste. Pure celestial blue, changing to porcelain.

Darius. S. Lemon. F. Yellow, veined and corded with purple.

Donna Maria. S. Azure. F. Purple.

Duchesse de Nemours. S. Pale lilac. F. Purple-violet, veined white.

Flavescens. Light primrose-yellow, large flowers. Florentina alba. S. and F. Light porcelain-blue, changing to white.

Florentina Blue. S. and F. Pale-blue. Fragrant.

Gracchus. S. Creamy yellow. F. Velvet purple, yellow

striped. Hector. Yellow and brownish red.

Honorabilis. S. Indian-yellow. F. Chestnut-red. La Tendrer. S. Lavender-blue. F. Blue, veined violet.

Madame Chereau. Pure white, penciled violet.

Mrs. H. Darwin. White, veined purple.

Pallida Dalmatica. 3 to 4 ft. Lavender, stately spikes.

New and very fine. 25c each; \$2.50 per doz.

Pallida speciosa. S. Violet-blue. F. Purple.

Princess of Wales. Combination violet-purple, violet and vellow.

Purple Queen. S. and F. Rich violet-purple.

Queen of May. S. and F. Bright rosy lavender.

Silver King. S. and F. Pure white, large. Fragrant.

### Japanese Iris

The flowers of the Japanese Iris are often 8 inches across, and of remarkably varied and beautiful colors. They thrive best in a rich and somewhat moist soil. blooming season is from the middle of June to about August 1.

Large Plants, 30c each; \$3.00 per doz.

Mixed Colors, unnamed, 15c each; \$1.50 pcr doz.

(Order by number or name.)

No. 4 Kumo-no-obi. Double violet-purple, white center.

No. 7 Sofu-no-koi. Double light blue, with pink marking. No. 8 Mana-dowru. Double white, penciled blue, purple center.

No. 10 Yomo-no-umi. Double, maltese lavender, purple center, penciled.

No. 11 Mei-ran. Single carmine rose.

No. 12 Kuma-funjin. Double, dark purple, blue center.

No. 14 Hana-aoi. Double, bright violet-blue, shaded white.

No. 15 Uchin. Double bluish purple, veined white.

No. 16 Oshkun. Double navy-blue, purple center. No. 19 Kimi-no-megumi. Single, light blue, penciled, red center.

No. 20 Kumo-no-uys. Double, very dark bluish purple. No. 23 Oniga-shima. Double, violet purple-sapphire cen-

No. 26 Senjo-no-hora. Double, dark red, splashed white.

No. 28 Shira-taki. Double, white with yellow marking. No. 29 Shiga-no-wia-nami. Double, sapphire and blue, penciled white.

No. 30 Kagaribi. Double, rose red, penciled white.

No. 31 Kosui-no-iro. Double, very light blue, white center.

No. 32 Komochi-guma. Single, very dark blush purple. No. 33 Kaku-jaku-ro. Single, light pink and blue, pen-

No. 34 Momiji-no-taki. Double, pink ground, blue and yellow veined.

# Hardy Garden Chrysanthemums

These old-fashioned plants are eagerly sought for by garden lovers, and we are able to offer a large number of new varieties which are of great value.

Price 15c each; 1.50 per doz.; \$10.00 per 100.

Arabella. Pink. Boston. Golden bronze.

Bridesmaid. Blush.

Canary. Pale yellow. Charles Jenks. Whit White.

Davidiana. Pink.

Golden Pheasant. Rich golden-yellow.

Ida. Yellow.

Julia Lagravere. Dark red.

Little Pet. Violet crimson.

Model of Perfection. Beautiful white.

Soleil d'Or. Orange.
St. Almo. White.
Trojan. Maroon, with yellow center.
Victor. Rosy crimson.

Yellow Queen. Yellow.

Iris Kaempferi (Japanese Iris)

# RHODODENDRONS

lt is our purpose to list only such varieties of this popular evergreen as have proved hardy in this latitude. Proper exposure (half-shade, protected from winds and hot sun) has much to do with their successful growth, as well as thorough preparation of the soil with leafmold or peat. Pick off seed-pods after blossoms have dropped. Mulch heavily with leaves or litter.

### **HEDGE PLANTS**

While a wide range of choice is possible, hedging material should be selected with a view to the ultimate height desired. Plants should be spaced from one foot apart (Barberry and Privet) to three feet apart (Willows, Lilacs, Evergreens) according to size and habits of growth. Advice as to selections and quantities is gladly given. The following are a few of the better-known hedge plants, most of which will bear close shearing. Not less than 25 of one variety at the 100 rate.

Berberis Thunbergii (Japanese Barberry). 12 to 15 in., \$10.00; 15 to 18 in., \$12.00; 18 to 24 in., \$15.00 per 100.

Crataegus Oxyacanthus (English Hawthorn). 3 ft., \$20.00 per 100.

Ligustrum Amurense (Amur River Privet). 18 to 24 in., \$8.00; 2 to 3 ft., \$12.00; 3 to 4 ft., \$18.00 per 100.

Ligustrum Ibota (Japanese Privet). 18 to 24 in., \$6.00;

2 to 3 ft., \$10.00; 3 to 4 ft., \$15.00 per 100. Ligustrum ovalifolium (California Privet). 18 to 24 in., \$5.00; 2 to 3 ft., \$8.00; 3 to 4 ft., \$10.00 per 100.

Rhamnus Catharticus (Buckthorn). 2 to 3 ft., \$10.00; 3 to 4 ft., \$15.00 per 100.

Rosa rugosa (Japanese Rose). 18 to 24 in., \$15.00; 2 to 3 ft., \$20.00 per 100.

Salix pentandra (Laurel-leaved Willow). 3 to 4 ft., \$20.00; 4 to 5 ft., \$25.00 per 100.

Spiraea Van Houttei. 2 to 3 ft., \$15.00; 3 to 4 ft., \$20.00 per 100.

Syringa vulgaris (Common Lilac). 2 to 3 ft., \$20.00; 3 to 4 ft., \$25.00 per 100.

# Evergreens

Picea alba (White Spruce). 18 to 24 in., \$30.00; 2 to 3 ft., \$45.00 per 100.

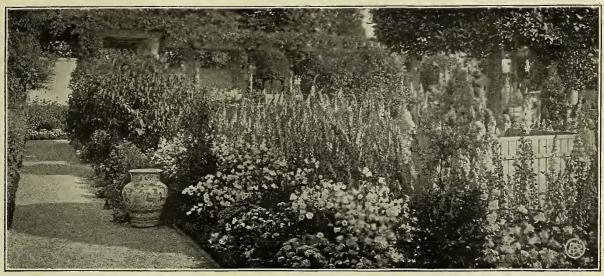

Picea excelsa (Norway Spruce). 18 to 24 in., \$25.00; 2 to 3 ft., \$40.00 per 100.

Thuya occidentalis (American Arborvitae). 18 to 24 in., \$25.00; 2 to 3 ft., \$40.00; 3 to 4 ft., \$60.00 per 100.

Tsuga Canadensis (Hemlock). 18 to 24 in., \$60.00; 2 to 3 ft., \$75.00 per 100.

Japanese Barberry Hedge

Canterbury Bells and Foxgloves

# HARDY PERENNIALS—GENERAL LIST

The Perennials supply us with some of the most beautiful and interesting plants available for out-of-door culture. By judicious selection a succession of bloom from spring until frost, with wonderful range of color, may be obtained. Time of flowering and approximate height of each is indicated.

Achillea "The Pearl." Pure white double. June. 2 ft. 15c each; \$1.50 doz.

Alyssum saxatile compactum. Beautiful yellow flowers in spring. 6 in. 15c each; \$1.50 per doz.

Anemone japonica. Dark pink flowers in August and Sept. 2 ft. 15c each; \$1.50 per doz.

A. japonica, Whirlwind. Beautiful white. 2 ft. 15c each; \$1.50 per doz.

Anthemis tinctoria (Yellow Marguerite). Flowers June to October, 2 to 3 ft. 15c each; \$1.50 per doz.

Aquilegia canadensis. Scarlet and yellow. July. 11/2 ft.

15c each; \$1.50 per doz.

A. chrysantha. Rich yellow. July. 3 ft. 15c each;

\$1.50 per doz.

A. coerulea hybrida. Shades of blue, white, pink, yellow, etc. 1½ ft. 15c each; \$1.50 per doz.

Arabis alpina plena (Alpine Rock Cress). (Perennial, White Alyssum). White. May. 6 to 9 in. 15c each; \$1.50 per doz.

Armeria maritima (Sea Pink). Bright Rose. May to frost. 9 in. 15c each; \$1.50 per doz.

A. var. Laucheana. Dwarf, similar to above; bright pink. 15c each; \$1.50 per doz.

Aster, Beauty of Colwall. Lavender, double. September. 4 ft. 25c each; \$2.50 per doz.

A. nova angliae. Bluish-purple. September. 4 ft. 15c each; \$1.50 per doz.

A. nova angliae preziosa. Deep blue. September. 4 ft. 15c each; \$1.50 doz.

Baptisia australis (False Indigo). Dark blue. July. 3 ft. 15c each; \$1.50 per doz.

Boltonia latisquama. Clear lilac. September. 4 ft. 15c each; \$1.50 per doz.

Campanula carpatica. Clear blue. Summer. 3 to 4 ft. 15c each; \$1.50 per doz.

C. persicæfolia (Peach-leaved Bell Flower). Porcelain blue. June to August. 2 to 3 ft. 15c each; \$1.50 per doz.

C. media (Canterbury Bell). June and July. 3 to 4 ft. Blue, white. 15c each; \$1.50 per doz. Centaurea montana. Colors red, white, blue and pink. Summer. 1½ ft. 20c each; \$2.00 per doz.

Coreopsis grandiflora. Golden-yellow. Summer. 2 ft. 15c each; \$1.50 per doz.

Delphinium chinense. Intense blue. Summer. 2 ft. 15c each; \$1.50 per doz.

D. formosum. Blue, white center. Summer. 3 ft. 15c each; \$1.50 per doz.

D. Belladonna. A very popular light blue variety. 3ft. 25c each; \$2.50 per doz.

Dianthus barbatus (Sweet William). Mixed colors. June and July. 20 in. 15c each; \$1.50 per doz.

D. plumarius (Scotch Pink). Fragrant pink flowers. June. 9 in. 15c each; \$1.50 per doz.

Dicentra spectabilis (Bleeding Heart). Pink. Spring. 2 ft. 15c each; \$1.50 per doz.

Digitalis purpurea (Foxglove). Purple and white. June. 3 to 4 ft. 15c each; \$1.50 per doz.

Eulalia zebrina. A stately grass with green and yellow leaves. 6 ft. 20c each; \$2.00 per doz.

Funkia variegata (Plaintain Lily). Blue with variegated foliage. July. 1 to 2 ft. 15c each; \$1.50 per doz.

F. subcordata grandiflora (White Day Lily). Pure white. July to Sept. 2 ft. 15c each; \$1.50 per doz.

Gaillardia grandiflora (Blanket Flower). Red and yellow. July. 2 to 3 ft. 15c each; \$1.50 per doz.

Gypsophila paniculata. Small white flowers in great profusion. Summer. 2 ft. 15c each; \$1.50 per doz.

Helenium autumnale superbum. Bright yellow. August. 5 ft. 15c each; \$1.50 per doz.

H. hoopesi. Orange yellow. June and July. 2 to 3 ft. 15c each; \$1.50 per doz.

Helianthus decapetalus. Bright yellow. Summer. 5 ft. 15c each; \$1.50 per doz.

H. mollis. Yellow flowers, downy, silvery foliage. 3 ft. 15c each; \$1.50 per doz.

H. multiflorus fl. pl. (So-called Hardy Dahlia). Double Yellow. Aug. to Sept. 4 ft. 15c each; \$1.50 per doz.

HARDY HERBACEOUS PERENNIALS—Continued Heliopsis Pitcherii. Golden-yellow. July to Sept. 6 ft. 15c each; \$1.50 per doz.

Helleborus niger (Christmas Rose). Large white. I cember. Frame culture. 35c each; \$3.50 per doz.

Hemerocallis flava. Golden yellow flowers. Summer. 3 ft. 15c each; \$1.50 per doz. H. Thunbergii. Lemon yellow. Summer. 3 ft. 15c

each; \$1.50 per doz.

Heuchera sanguinea. Bright red flowers. Handsome foliage. Summer. 11/2 ft. 15c each; \$1.50 per doz.

Hibiscus moscheutos, Crimson Eye. White, with crimson eye. Aug. to Sept. 3 to 4 ft. 15c each; \$1.50 per doz.

Iberis sempervirens (Perennial Candytuft). white, foliage evergreen. May to June. 8 to 12 inches. 15c each; \$1.50 per doz.

Lathyrus latifolius (Perennial Pea). Bright red. Summer. 5 ft. 20c each; \$2.00 per doz.

L. var. Albus. White, otherwise like above. 20c each; \$2.00 per doz.

Lavandula vera (English Lavender). July. 1 to 2 ft. 15c each; \$1.50 per doz.

Liatris pycnostachya. Lavender-purple. Summer. 5 ft. 15c each; \$1.50 per doz.

Lobelia cardinalis (Cardinal Flower). 3 ft. August. Scarlet. Very showy border plant. 15c each; \$1.50 per doz.

Lupinus polyphyllus. Blue, pea-like flowers. 4 ft. 15c each; \$1.50 per doz.

L. albus. White, form of preceding. 20c each; \$2.00 per doz.

Lychnis chalcedonica. Brilliant scarlet. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.
L. plenissima. Pink. Summer. 2 to 3 ft. 15c each;

\$1.50 per doz.

Lythrum roseum superbum. Rosy-red. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.

Monarda didyma. Brilliant scarlet. Foliage sweet-scented. Summer. 2 to 3 ft. 15c each; \$1.50 per doz.

Myosotis palustris semperflorens (Forget-me-not). Light blue. Summer. 15c each; \$1.50 per doz.

Cenothera Youngii. Clear yellow. 2 inches in diameter.

June to Aug. 2 ft. 15c each; \$1.50 per doz.

Papaver orientale (Oriental Poppy).

P. Royal Scarlet. Scarlet. Small blotches. 2 ft. 15c each; \$1.50 per doz.

P. nudicaule (Iceland Poppy). Yellow. 1 ft. 15c each; \$1.50 per doz.

Pentstemon barbatus Torreyii (Beard-tongue). Bright red. July. 4 to 5 ft. 15c each; \$1.50 per doz.

Physostegia virginica. Spikes of tubular-shaped, pink flowers. August. 3 to 4 ft. 15c each; \$1.50 per doz.

Platycodon grandiflora. Very dark blue. July to October. 2 to 3 ft. 15c each; \$1.50 per doz.

Primula officinalis hybrida (English Primrose). Shades of white, yellow and red. Spring. 1 ft. 20c each; \$2.00 per doz.

P. veris superba. Large Yellow. 11/2 ft. 20c each; \$2.00 per doz.

Pyrethrum roseum hybridum. Single and double mixed. Colors range white to dark crimson. Summer. 2 ft. 15c each; \$1.50 per doz.

Scabiosa caucasica. Lilac-blue. Summer. 18 inches. 15c each; \$1.50 per doz.

Sedum spectabilis (Showy Stonecrop). Rosy pur September. 18 inches. 15c each; \$1.50 per doz. Rosy purple.

Shasta Daisy. Large snowy-white flowers, in bloom continuously throughout the entire summer and fall. 15c each; \$1.50 per doz.

Spiraea Gladstonei. White flower. Palm-like foliage.
Summer. 2 ft. 25c each; \$2.50 per doz.
S. filipendula plena. Fern-like foliage, creamy white

flowers. 2 ft. 15c each; \$1.50 per doz.

Stokesia cyanea (Cornflower Aster). Lavender blue. Aug. to Oct. 18 to 24 inches. 15c each; \$1.50 per doz.

Tritoma uvaria grandiflora. Red and yellow. Aug. to Oct. 3 ft. 15c cach; \$1.50 per doz. T. Pfitzerii. Orange-scarlet. Aug. to Oct. 4 ft. 15c

each; \$1.50 per doz.

T. nobilis (Red Hot Poker). Aug. to Nov. 6 ft. 35c each; \$3.50 per doz.

Trollius Europaeus. May. Yellow. 18 inches. 15c each; \$1.50 per doz.

Veronica longifolia subsessilis. Blue Flowers. Aug. to Sept. 2 ft. 20c each; \$2.00 per doz.

Yucca filamentosa (Adam's Needle). Early growth, drooping white flowers. 6 ft. Clumps, 50c each.

### HARDY LILIES

A desirable class of hardy perennials which may be planted amongst shrubbery or other earlier-blooming perennials. Some of the late varieties do not arrive from Japan before the ground freezes, but we carry these in cold storage until spring when they may be planted out with good success. Deep planting is advisable, 9 to 12 inches according to size of bulb.

Auratum (Golden Banded Lily of Japan). Immense white flowers, each petal marked with a wide gold band, and spotted with maroon.

-Mammoth Bulbs. 40c each; \$3.00 doz.; \$20.00 per 100. Extra Large. 25c each; \$2.50 per doz.; \$15.00 per 100.

-First Size Bulbs. 15c each; \$1.50 doz.; \$10.00 per 100.

Speciosum Album. Large pure white flowers.
—Mammoth Bulbs. 25c each; \$2.50 doz.; \$20.00 per 100. -Extra Large Bulbs. 20c each; \$2.00 doz.; \$15.00 per 100.

Speciosum Magnificum. Rich crimson. The finest colored of all Speciosums

-Mammoth Bulbs. 25c each; \$2.50 doz.; \$18.00 per 100. -Extra Large. 15c each; \$1.50 doz.; \$10.00 per 100.

Speciosum Melpomene. White, suffused with darkest crimson.

-Mammoth Bulbs. 25c each; \$2.50 doz.; \$18.00 per 100. -Extra Large. 20c each; \$2.00 doz.; \$15.00 per 100.

Speciosum Roseum. White, stained and spotted rose.

--Mammoth Bulbs. 25c each; \$2.50 doz.; \$18.00 per 100. Extra Large. 20c each; \$2.00 doz.; \$15.00 per 100.

Speciosum Rubrum. White with rich crimson spots.

—Mammoth Bulbs. 25c each; \$2.50 doz.; \$18.00 per 100. -Extra Large. 20c each; \$2.00 doz.; \$15.00 per 100.

Batemaniae. Clear orange apricot, without spots, 6 to 8 flowers borne on a stem. 4 ft. high. 20c each; \$2.00 doz.; \$15.00 per 100.

Trumpet-shaped flowers; interior pure white Browni. with chocolate colored anthers; exterior brownish purple. Height 3 ft. 60c each; \$6.00 doz.

Canadense (Canadian Bell-Flowered Lily). Colors vary from reddish orange to yellow. Marked with black. Height 4 ft., 15c each; \$1.25 per doz.; \$9.00 per 100.

Henryi (The Yellow Speciosum). A very beautiful hardy Lily from northern China. Plants are of vigorous growth. They frequently attain the height of 6 ft. Each stem carrying from 5 to 8 flowers of a rich apricot yellow. Brown spots. 60c each; \$6.00 doz.

Superbum. Yellowish red. Height 4 ft. 20c each; \$1.50 doz.; \$10.00 per 100.

rinum Splendens (Tiger Lily). Fiery scarlet flower, spotted black. Height 6 ft. 10c each; 75c doz.; \$5.00 Tigrinum Splendens (Tiger Lily). per 100.

Tigrinum Flore Pleno. Double Flowered orange, spotted black. Height 4 ft. 10c each; 75c doz.; \$5.00 per 100.

Glowing apricot freely spotted with black. Height 3 ft. 15c each; \$1.50 doz.; \$10.00 per 100.

For more complete list see General Nursery Catalogue.

### **EVERGREENS**

Abbreviations.—Size: L, large; M, medium; S, small; D, dwarf; VD, very dwarf. Rapidity of growth: r, rapid; m, medium; s, slow; v, vigorous.

Abies balsamea (Balsam Fir). L. Of rapid, slender pyramidal growth, with very dark foliage. Grows in cold, wet ground as well as in better soil. 3 to 4 ft., \$1.50 each.

A. concolor; syn., lasiocarpa. Lm. It is from Colorado, and grows to a height of 50 feet and more. The foliage varies exceedingly in color from a glaucous-blue to a very light green. It is graceful and feathery, and as it grows older retains its lower limbs. 3 to 4 ft., \$5.00 each; 4 to 5 ft., \$7.00 each.

Juniperus communis (Common Juniper). Usually a shrub with spreading, sometimes prostrate, branches which curve upwards near the ends; widely distributed throughout the colder regions and mountains of the Northern Hemisphere. Foliage grayish green, very dense. A beautiful shrub valuable in rockeries or as a ground cover. 18 in. \$1.50 each: 2 ft.. \$2.50 each.

a ground cover. 18 in., \$1.50 each; 2 ft., \$2.50 each. J. var. Hibernica (Irish Juniper). Mm. Of dense pillar-like growth. Glaucous green foliage. 2 to 3 ft., \$1.50 each.

J. Sabina (Savin Juniper). VDs. Prostrate, spreading branches, with somber green foliage. Hardy and well adapted for hillsides, etc. 18 to 24 in., \$1.25 each; 2 to 3 ft., \$2.00 each.

J. Virginiana (Red Cedar). Mm. Tapering form, bright, rich green foliage. Useful for ornamental planting. 2 ft., \$1.00 each; 3 ft., \$1.75 each; 4 ft., \$2.50 each.

Picea alba (White Spruce). Lm. Light, silvery green foliage and dense pyramidal growth. Hardy in all locations. 2 to 3 ft., \$1.00 each: 3 to 4 ft., \$1.50 each.

locations. 2 to 3 ft., \$1.00 each; 3 to 4 ft., \$1.50 each. P. excelsa (Norway Spruce). Lr. The most generally used of evergreen trees. Useful for screens and windbreaks on account of its rapid growth. It makes a tall tree, and, as an individual tree, with room to develop, is of pyramidal, symmetrical growth, its lower branches sweeping the ground. 2 to 3 ft., 75c each; 3 to 4 ft., \$1.25 each; 4 to 5 ft., \$2.25 each; 5 to 6 ft., \$3.50 each.

P. pungens glauca Kosterii (Koster's Blue Spruce). Lr. Stiff, pungent foliage and clusters of cones. The most highly-colored variety. No evergreen tree can excel it as it has the advantage of growing vigorously where many evergreens fail; withstands the coldest seasons. 2 to 2½ ft., \$3.00; 2½ to 3 ft., \$4.50; 3 to 4 ft., \$6.00 each. (Prices quoted on larger specimens.)

Pinus Austriaca; syn., nigricans (Austrian, or Black Pine). Lr. A robust-growing variety, with long, dark green stiff needles. Does well on all soils, and is one of the best evergreens for seashore planting. 2 to 3 ft.. \$1.75 each.

2 to 3 ft., \$1.75 each.

P. mughus (Dwarf Mugho Pine). Ds. Of the highest value where a low, dense, spreading growth is desired. Very dark foliage and extremely hardy. 12 to 15 in. spread, \$1.50; 18 to 24 in., \$2.50.

P. strobus (White Pine). Lr. The most valuable of

P. strobus (White Pine). Lr. The most valuable of all native evergreens for timber purposes. A well-grown individual tree, with its light, silvery foliage; is always highly ornamental. In age this Pine is most impressive. Useful for hedges, as it can be clipped like a shrub. 2 to 3 ft., \$1.00; 3 to 4 ft., \$1.50; 4 to 5 ft., \$2.00.

Retinospora var. plumosa (Plume-like Japan Cypress). Lr. One of the hardiest and best. Delicate glaucous foliage. 2 to 3 ft., \$1.50; 3 to 4 ft., \$3.00; 4 to 5 ft., \$5.00.

R. var. plumosa aurea. Lm. A striking, fine form of the above, and very hardy. Brilliantly golden throughout the season. One of the most desirable. 2 to 3 ft., \$1.50; 3 to 4 ft., \$3.00; 4 to 5 ft., \$5.00.
R. squarrosa. Mm. An exquisite Japan form, with

R. squarrosa. Mm. An exquisite Japan form, with steel-colored foliage, which is very fine and feathery. It displays many shades of color during the season. 2 to 3 ft., \$2.00; 3 to 4 ft., \$3.00.

Thuya occidentalis (American Arborvitae). Mr. Of conical form and rapid growth. Used largely for hedges.

3 ft., 75c each; 4 ft., \$1.00 each.

Tsuga Canadensis (Hemlock Spruce). Lr. A graceful tree, with loose, open growth, and yew-like foliage. It can be kept in dense form if pruned. Prefers moist soil. 2 to 3 ft., \$1.50; 3 to 4 ft., \$2.00.

### HARDY EVERGREEN SHRUBS

Daphne Cneorum (Garland Flower). A dwarf evergreen plant with shiny leaves. Bears a profusion of bright pink, fragrant blossoms in May. 6 to 8 in., 50c; 8 to 10 in., 75c.

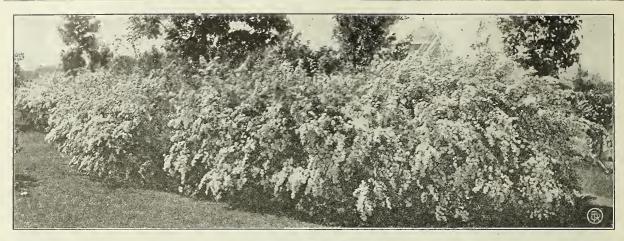

Kalmia latifolia (Mountain Laurel). A native evergreen shrub. Glossy foliage, beautiful pink and white flowers in June. 18 to 24 in., \$1.50; \$15.00 doz.; carloads, \$150 to \$200; specimens, \$2 to \$5 each.

Leucothoe Catesbaei. Small with thick foliage. Showy spikes of white flowers in May. 15 to 18 in., 60c and \$1.00 each.

Mahonia or Berberis aquifolia (Ashberry). Large spiny leaves turning scarlet in fall. Bright yellow flowers in May. 12 to 18 in., 30c; 18 to 24 in., 50c.

Pachysandra terminalis (Japanese Spurge). An evergreen plant forming a mat of glossy foliage. 15c each; \$1.50 doz.

For more complete list see General Nursery Catalogue.

Spiraea Van Houttei

### FLOWERING SHRUBS

Althaea (Hibiscus, or Rose of Sharon). Double white, pink or red; also variegated-leaved. 2 to 3 ft., 35c each; \$3.50 per doz.

Hybrid varieties, single and double, 50c each; \$5.00 per doz.

Aralia pentaphylla (Five leaved Aralia). Arching, spiny branches; valuable for foliage. 3 ft., 35c; \$3.50 per

Azalea viscosa (Swamp Honeysuckle). White, fragrant

flowers in June and July. 2 ft., 75c each. A. mollis (Hardy Azalea). Dwarf in habit. Mixed colors in shades of red, white, yellow and orange. 18 to 24 in., 75c.

A. Pontica. Named varieties, single and double. 18 in., \$1.00 each.

Berberis Thunbergii (Japanese Barberry). Well known hedge plant. 12 to 15 in., 15c each; \$1.50 per doz. 18 to 24 in., 25c; \$2.50 per doz. (See also "Hedge Plants," page 110.)

B. purpurea (Purple Leaved Barberry). 3 ft., 35c each; \$3.50 per doz.

Buddleia variabilis Veitchiana. A new shrub; violet and yellow flowers in long spikes; August. 50c; \$5.00 per doz.

Calycanthus floridus (Sweet Shrub or Allspice). 2 ft., 35c; \$3.50 per doz.

Chionanthus virginica (White Fringe). For damp or partially shaded places. 3 to 4 ft., 50c each.

Cornus Siberica (Red-barked Dogwood). Valuable for its bright-colored bark. 3 to 4 ft., 35c; \$3.50 per doz.

Cydonia Japonica (Japanese Quince). Dwarf-growing; scarlet flowers in May, followed by large fruit. 2 ft., 30c; \$3.00 per doz.

Deutzia Pride of Rochester (Pink Deutzia). Rose-tinted flowers in June. 3 ft., 35c; \$3.50 per doz. D. gracilis (Dwarf or Slender Deutzia). White flowers;

May and June. 18 to 24 in., 35c; \$3.50 per doz.

D. Lemoinei. A free-flowering white variety, a little larger than D. Gracilis. 2 ft., 35c; \$3.50 per doz.

Diervilla candida (Weigelia). White flowers in June and

later; for sheltered locations. 3 ft., 40c each.

D. rosea. Rose colored flowers. 2 to 3 ft., 30c; \$3.00

D. Eva Rathke. Crimson. 3 ft., 35c; \$3.50 per doz.

Euonymus alatus (Winged Burning-bush). An odd and attractive shrub, valued for its gorgeous fall colors. 12 in., 30c; 2 ft., 50c. E. Europaeus (Spindle Tree). Orange and red fruit in

autumn. 4 ft., 50c; \$5.00 per doz.

Well known yellow. Forsythia, Forsythia Fortunei. blooming in April before the leaves show. 3 to 4 ft., 35c; \$3.50 per doz.

F. suspensa. Drooping form. 3 to 4 ft., 35c; \$3.50 per doz.

Hamamelis virginica (Witch Hazel). Yellow flowers in November. 3 to 4 ft., 35c; \$3.50 per doz.

Hydrangea arborescens sterilis. A recently acquired hardy Hydrangea blooming in July. 2 ft., 50c

H. paniculata grandiflora. The common form, flowering in September. 2½ to 3 ft., 35c; \$3.00 per doz. Standard or tree form. 4 to 5 ft., 75c and \$1.00 each.

Kerria Japonica (Corchorus). Bright green bark; yellow flowers all summer, low growing. 2 ft., 30c each. K. var. foliis variegatis. Dwarf with silvery-green

leaves. 12 to 18 in., 35c each.

Lonicera Morrowi (Bush Honeysuckle). Yellow flowers in July, followed by red berries. 3 ft., 35c; \$3.50 per doz.

L. Tartarica (Tartarian Honeysuckle). Pink. 30c; \$3.00 per doz.

Philadelphis coronarius (Mock Orange). Orange-blossom scented flowers in June. The best of the Syringas. 3 to 4 ft., 30c; \$3.00 per doz.

P. Avalanche. A dwarf, white-flowering variety, a valuable shrub. 2 ft., 30c; \$3.00 per doz.

Prunus Pissardi (Purple-leaved Plum). Valuable for its foliage. 3 to 4 ft., 50c; \$5.00 per doz. P. triloba (Double-flowering Plum). Rose-like pink

flowers crowding the branches in May. 3 ft., 50c each.

Rhodotypus kerrioides (White Kerria). White, Syringalike flowers throughout the summer, followed by black seeds. 2 to 3 ft., 30c; \$3.00 per doz.

Rhus cotinus (Smoke Bush or Purple Fringe). Purplish flowers in June. 3 ft., 50c each.

R. typhina (Staghorn Sumac). A strong growing shrub for poor soils. 3 to 4 ft., 25c each; \$2.50 per doz.

Sambucus aurea (Golden Elder). 3 ft., 35c; \$3.50 per doz. Spiraea Anthony Waterer (Dwarf Spiraea). Flat heads of pink flowers in late summer. 18 in., 30c; \$3.00 per

doz. S. opulifolia aurea (Golden Spiraea). Yellow foliage. 3 to 4 ft., 30c; \$3.00 per doz.

S. prunifolia fl. pl. The old-fashioned Bridal Wreath.

2 to 3 ft., 35c; \$3.50 per doz.

S. Van Houttei. The best known Spiraea, and the most

valuable. Arching sprays of white flowers in June. 3 to 4 ft., 30c; \$3.00 per doz.

Symphoricarpos racemosus (Snowberry). Showy white berries in fall. 3 ft., 30c; \$3.00 per doz.

Syringa vulgaris (Common Lilac). Purple flowers. 2 to 3 ft., 30c; \$3.00 per doz.

S. var. alba (White Lilac). 3 ft., 40c; \$4.00 per doz. S. Named Varieties. Single and double. 50c to 75c.

Viburnum opulus (Bush Cranberry). Showy crimson berries in fall. 3 ft., 35c; \$3.50 per doz. V. plicatum (Japanese Snowball). Globe-shaped heads

of white flowers in June. Grows best in sheltered locations. 3 to 4 ft., 50c; \$5.00 per doz.

# SHADE AND ORNAMENTAL TREES

Acer dasycarpum (Silver Maple). Rapid growing; leaves silvery on under side. 8 to 10 ft., 75c; 10 to 12 ft.,

A. var. Wieri laciniatum (Weir's Cutleaved Maple). A graceful tree with pendulous branches; silvery leaves.

6 to 8 ft., 75c; 8 to 10 ft., \$1.00.

A. platanoides (Norway Maple). Hardy and vigorous; spreading habits. 6 to 8 ft., 75c; 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50 and \$2.00.

A. saccharum (Sugar or Rock Maple). A well known native tree. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50 and

A. polymorphum atropurpureum (Blood-leaved Japanese Maple). Dwarf growing, valued for its foliage. 2 to 2½ ft., \$1.50; 3 ft., \$2.00.

Aesculus hippocastanum (Horse-chestnut). White-flower-

ing. 6 ft., \$1.00; 8 ft., \$1.50.

Betula alba (European White Birch). Rapid growing; symmetrical. 7 to 8 ft., 75c; 8 to 10 ft., \$1.00.

B. pendula laciniata (Cutleaved Weeping Birch). Of

tall, slender growth; white bar, finely cut foliage. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50 and \$2.00.

Catalpa Bungei. A fine globe headed tree; of large glossy leaves. 6 to 7 ft., \$1.50.

C. Speciosa (Indian Bean). A large tree covered with showy flowers in July. 6 to 7 ft., 75c; 8 to 10 ft., A large tree covered with \$1.00.

Cercis Canadensis (Judas Tree or Red Bud). A mass of purplish-red flowers in spring. Heart-shaped leaves. 3 to 4 ft., 50c; 4 to 5 ft., 75c. Cornus Florida (White-flowering Dogwood). Small tree

with handsome white blossoms early in spring. 3 to 4 ft., 75c; 4 to 5 ft., \$1.50.

C. var. Rubra (Red-flowering Dogwood). Same as above except that blossoms are a lovely tint of reddish pink. 2 to 3 ft., \$1.00; 3 to 4 ft., \$1.50.

Crataegus Oxyacantha, alba plena (Double white-flowering Thorn). Flowers in May. 4 to 5 ft., 75c.

C. Coccinea flore pleno Paulii (Paul's Double Scarlet Thorn). A small tree with brilliant carmine flowers. 4 to 5 ft., \$1.00.

Fagus Sylvatica. The well known European Beech. A superb tree. 3 to 4 ft., 75c each; 4 to 5 ft., \$1.25.
F. var. purpurea Riversii (River's Purple Beech). Like

the European Beech, but with dark purple foliage. 3 to 4 ft., \$1.00; 4 to 5 ft., \$1.50; 6 to 7 ft., \$2.50.

Fraxinus Americana (American White Ash). The native ash. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50.

Ginkgo biloba (Salisburia or Maiden-Hair Tree). One of the best small trees; fan shaped leaves. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

Laburnum vulgare (Golden Chain). Long racemes of showy yellow flowers in July. 5 to 6 ft., \$1.00. Larix Europea (European Larch). Tall compact tree with

light green needle-like foliage. 3 to 4 ft., 50c; 4 to 5 ft., 75c.

Liriodendron Tulipifera (Tulip Tree or Whitewood). A large native tree. Bears tulip-like blossoms in June. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

Magnolia Soulangeana. The best known Magnolia. Grows vigorously; large pink and white blooms. 3 to 4 ft., \$2.00; 4 to 5 ft., \$2.50.

M. Speciosa. Similar to Magnolia Soulangeana,

later-flowering. 3 to 4 ft., \$2.00; 4 to 5 ft., \$2.50.

M. Halleana Stellata (Hall's Magnolia). The earliest and most charming of the magnolias. Bears an abundance of star-shaped fragrant blossoms. 21/2 to 3 ft., \$2.50.

Morus Alba pendula (Weeping Mulberry). Drooping foliage; edible fruit. 5 to 6 ft., 2 year heads, \$1.50; 3 years, \$2.00. M. var. Tatarica (Russian Mulberry). Very hardy; red

dish fruit. 6 to 8 ft., 75c.

Populus Bolleana (Bolleana Poplar). Habits of growth like the Lombardy, but longer-lived. Silver leaves. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50.

P. monilifera (Carolina Poplar). A large and spreading tree, thriving in sandy soil. 8 to 10 ft., 75c; 10

to 12 ft., \$1.00.

P. nigra fastigiata (Lombardy Poplar). The well known poplar of tall narrow growth. 8 to 10 ft., 75c; 10 to 12 ft., \$1.00; 12 to 14 ft., \$1.50.

Quercus Palustris Pin Oak

Prunus Pissardi (Purple-Leaved Plum). Attractive purple foliage. 3 to 4 ft., 50c; 4 to 5 ft., 75c.

P. triloba (Flowering Plum). Large double pink, flowers in spring. 3 to 4 ft., 50c.

Pyrus Malus Parkmani (Flowering Apple). Bears pink buds, which later open into pendulous semi-double flowers. 4 to 5 ft., \$1.00.

P. Ioensis Bechteli (Bechtel's Double-flowering Crab). A shrub or small tree bearing delicate pink blossoms. 3 to 4 ft., 50c; 4 to 5 ft., \$1.00.

Pyrus Sorbus Aucuparia (European Mountain Ash). Medium size. Bunches of scarlet berries in winter. 6 to 7 ft., 75c.

P. S. quercifolia (Oak-leaved Mountain Ash). dal growth. Oak-like leaves. 6 to 7 ft., \$1.00.

Quercus palustris (Pin Oak). One of the best oaks for street or lawn. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.25;

10 ft., \$1.75. Q. rubra (Red Oak). Large and rapid grower; valuable for general planting. 5 to 6 ft., 75c; 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50.

Salix alba (Common White Willow). Grows to large size in wet ground. 5 to 6 ft., 30c; 6 to 8 ft., 50c. S. vitellina aurea (Golden-barked Willow). Yellow bark

in winter. 4 to 5 ft., 25c; 6 to 7 ft., 50c. S. elegantissima (Thurlow's Willow). Drooping habit.

6 to 8 ft., 75c; 8 to 10 ft., \$1.00.

S. pentandra, or laurifolia (Laurel-leaved Willow). bushy tree with dark green, glossy leaves. Good near seashore. 4 to 5 ft., 25c; 6 to 8 ft., 50c; 8 to 10 ft., \$1.00.

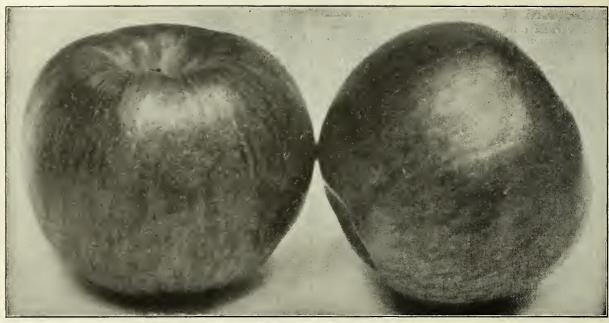

Syringa Japonica (Japan Tree Lilac). A distinct tree form. Very fine and hardy. 3 to 4 ft., 50c; 4 to 5 ft., 75c; 5 to 6 ft., \$1.00.

Tilia Americana (Linden or Basswood). A well known tree. Large and shapely. 6 to 8 ft., 75c; 8 to 10 ft., \$1.00.

T. Europaea (European Linden or Lime). darker and smaller than those of the American. 6 to 8 ft., 75c; 8 to 10 ft., \$1.25.

Ulmus Americana. Our native American Elm. 8 to 10 ft., \$1.00; 10 to 12 ft., \$1.50; 12 to 14 ft., \$2.00. U. Campestris (English Elm). Small leaves, rough

bark; large trunk. 8 to 10 ft., \$1.00; 10 to 12 ft., \$2.00.

Northern Spy Apples

# FRUIT TREES

### **APPLES**

The following list of Apples embraces varieties which have been tested, and can be recommended as the very best for general cultivation. All Apples are furnished in standard sizes unless dwarf trees are specified.

Prices: Bearing age, 8 to 10 ft., \$2.00 each; 3-year, extra size, \$1.00 each; 2-year, 5 to 7 ft., 50c each, \$4.00

per doz., \$30.00 per 100.

Dwarf Trees on Paradise stock, 2 to 3 ft., 50c each; \$5.00 per doz. These are useful for small gardens, and usually bear the third year after planting. Offered in the following varieties: Baldwin, Gravenstein, McIntosh, Red Astrachan, Yellow Transparent.

### SUMMER

Early Harvest. Pale yellow, excellent, early. Golden Sweet. Large, pale yellow, sweet. Red Astrachan. Large, crimson, very early. Williams. Dark red, mild flavor.

Fameuse (Snow Apple). Crimson, flesh white, excellent. Gravenstein. Large, yellow, striped red. Maiden's Blush. Sept.; large, yellow and red; good. Pippin. Fall, yellowish green, very fine. Porter. Medium, bright yellow; good. Pound Sweet. Nov.; very large, yellowish, sweet and rich.

### WINTER

Baldwin. Large, dark red, productive, medium. Golden Russet. Late yellow, good flavor. Hubbardston. Large yellow, splashed red; early.
McIntosh Red. Vigorous growth; handsome, hardy. Ripening November to February. Northern Spy. Large, striped red, good keeper.

Rhode Island Greening. Large, yellowish green, medium. Roxbury Russet. Extra quality. Largest of russets. Tolman's Sweet. Medium, light yellow, excellent. Wealthy. Dec. to Feb.; dark red, juicy, good, very hardy.

### Crab-Apples

Price, 50c each; \$5.00 per doz. Extra size, 75c each. Hyslop. October to January; deep crimson.

Martha. A new crab raised from seed of the Duchess of Oldenburg. Fruit glossy yellow, shaded with light red; fruit mild and tart.

Transcendent. September, October; useful alike for preserving, pies, sauces and cider.

### **PEACHES**

Prices: 5 to 6 ft., 50c each; \$5.00 per doz.; \$25.00 per 100. 4 to 5 ft., 35c each; \$3.00 per doz.; \$20.00 per 100. Carman. New, hardy rot-proof. Pale yellow skin and red cheek; early.

Champion. Aug.; new, creamy white; large; superior. Crawford's Early. September; large, yellow, freestone. Crawford's Late. Very large, juicy, good, freestone. Crosby (Ironclad). Sept.; medium, sweet, firm. Elberta. August first; flesh yellow. Very juicy. Fitzgerald. Sept.; large, Crawford type; hardy. Foster. September; similar to Early Crawford; better. Mountain Rose. September; large, white and red, melting. Old Mixon. Sept.; large, white and red, juicy and rich.

### **PLUMS**

Price, 5 to 7 ft., 50c each; \$5.00 per doz. Extra size, 75c each.

### **EUROPEAN TYPE**

Bradshaw. August; large, purple, sweet. Damson. September; dark purple, very productive. Reine Claude. Sept.; large, greenish yellow, very fine. Lombard. September; medium, violet, red, juicy. Yellow Egg. August; large, yellow.

### JAPANESE TYPE

Abundance. Early; fruit amber turning to cherry, flesh yellow, juicy, tender and sweet. Bears heavily. Burbank. Sept.; bright red, flesh yellow and sweet. Wickson. Late, large, carmine, delicious, small stone. Satsuma. September; purplish-red, flesh dark red, juicy.

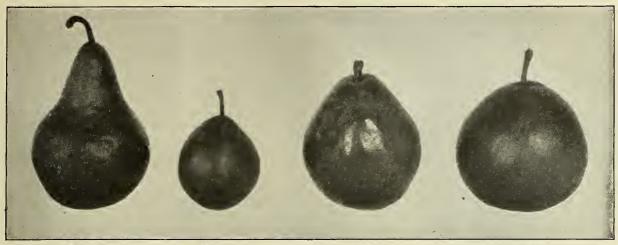

### QUINCES

4 to 5 ft., 50c each; \$5.00 per doz.; \$35.00 per 100. Apple, or Orange. Large, roundish, bright golden yellow; very productive. Champion. Vigorous and productive; very late.

### CHERRIES

Price, 6 to 7 ft., 50c each; \$5.00 per doz.. Extra size, 75c each. Coe's Transparent. June; medium, pale amber and red. Black Tartarian. June; large, purplish black; sweet. Montmorency. July; large, tender, rich; sour. May Duke. June; large, dark red, tender; sour. Windsor. July; large, dark red, nearly black, sweet. Yellow Spanish. Late June; pale yellow, red cheek.

See Special Fruit Catalog for additional varieties.

Bose

Seckel

### **PEARS**

Standard Pears. 5 to 7 ft., 50c each; \$5.00 per doz.; \$30.00 per 100, except where noted. Extra size, 75c each.

Dwarf Pears. Budded on quince stocks, in the following varieties. 3 to 4 ft., 50c each; \$4.00 doz.; \$25.00 per 100. Bartlett, Beurre d'Anjou, Clapp's Favorite, Duchess d'Angouleme, Howell, Lawrence, Seckel, Wilder's Early.

### Summer Pears

Bartlett. Vigorous growth; large; yellow and red; juicy. Ripening September.

Clapp's Favorite. Vigorous growth; very large and handsome; yellow and crimson. Ripening August.

Wilder. Ripens in August and is a liberal cropper. Skin, bright yellow; flesh rich creamy color and virtually coreless.

# Autumn Pears

Bosc. Moderate growth; large, russety; buttery, rich. Ripening September and October. \$1.00 each.

Flemish Beauty. Vigorous growth; large; yellow and russet; juicy melting, sweet; good; very hardy. Ripening September and October.

Louise Bonne of Jersey. Vigorous growth; large; yellow and red; melting, buttery, rich; Sept. and October.

Seckel. Moderate growth; medium; brown; juicy, melting and buttery; of the highest flavor. Sept. and Oct.

Sheldon. Vigorous growth; large; russet and red; melting, rich, delicious, very good. Ripening October.

Vermont Beauty. Brilliant-colored skin. Matures a little later than the Seckel and is valuable as a shipping pear.

### Winter Pears

Anjou. Vigorous growth; very large; greenish yellow; melting, buttery, juicy, sprightly, vinous; keeps into mid-winter. Ripens November and December.

Lawrence. Moderate growth; medium to large; golden yellow; melting, aromatic, very good. Nov. and Dec.

Winter Nelis. Free growth; medium; russet; melting, buttery and rich; very good; Dec. and Jan. \$1.00 each.

### HARDY NATIVE GRAPES

Campbell's Early. Clusters large, compact and handsome; berries large, nearly round, black with light purple bloom. Vigorous grower. 50c each; \$4.00 per doz.

Concord. Bunch and berries large, round, black; flesh moderately juicy, sweet pulp. 30c each; \$3.00 doz.

Moore's Early. Quality better than Concord; its size and earliness render it desirable. 30c each; \$3.00 per doz.

Worden. Berries large, sweet. Tcn days earlier than Concord and superior to it. 30c each; \$3.00 per doz.

Anjou

Sheldon

### RED AND REDDISH PURPLE

Agawam (Roger's No. 15). Large, tender, juicy, vinous, vine vigorous. 30c each; \$3.00 per doz.

Brighton. Large, handsome and of the best quality and ripens early. 30c each; 3.00 per doz.

Delaware. Medium or small, but delicious; highly esteemed everywhere. 30c each; \$3.00 per doz.

Salem (Roger's No. 53). One of the best and most popular. Ripens with the Concord. 30c each; \$3.00 per doz.

### WHITE

Green Mountain (Winchell). Ripens early, good bearer, vigorous grower. 50c each; \$4.00 per doz.

Moore's Diamond. Berry about the size of Concord; color, greenish white with yellow tinge; juicy. 30c each; \$3.00 per doz.

Niagara. Berry large, slightly pulpy, tender, sweet, ripens with Concord. 30c each; \$3.00 per doz.

# **HOT-HOUSE GRAPES**

Black Hamburg. The best known and most rugged of the greenhouse grapes. Bears heavily. Early.

Foster's White Seedling. Mid-season; amber-colored. Bears freely in large clusters.

Lady Downs. A late black grape of best quality.

Muscat of Alexandria. A white variety requiring somewhat higher temperature than Black Hamburg, but almost equally rugged. Ripens later and keeps longer.

Fruiting Canes, from pots, \$5.00 each.

# RASPBERRIES

\$1.00 per doz.; \$5.00 per 100, except as noted.

Cuthbert. Red, firm and superior quality.

Columbian. Very large, purple.

Golden Queen. Productive and of superior quality. Golden yellow.

Cumberland. One of the finest black, large and productive.

Gregg. Good black, productive and hardy.

Marlboro. Large, red, very productive.

St. Regis. The everbearing red, good quality. \$1.50 per doz.; \$8.00 per 100.

### **GOOSEBERRIES**

Red Jacket. The best red, free from mildew. 25c each; \$2.50 per doz.

Pearl. The most prolific, free from mildew, green. 20c each; \$2.00 per doz.

Industry. Very large, dark cherry red. 25c each; \$2.50 per doz.

per doz. Downing. Whitish green. 20c each; \$2.00 per doz.

See Special Fruit Catalog for additional varieties.

Agawam Blackberries

# BLACKBERRIES

\$1.00 per doz.; \$5.00 per 100.

Agawam. The earliest; flavor like the wild berry.

Rathbun. Extra large, productive, new.

Snyder. Best quality, very sweet, medium size.

Eldorado. Hardy, good size and quality, unusually productive.

Wachusett Thornless. Fruit medium, hardy and very productive, almost free from thorns.

Erie. Large and early; excellent quality.

### **CURRANTS**

\$1.50 per doz.; \$9.00 per 100, except as noted.

Black Naples. Fine for wine and jelly.

Cherry. Large, red, juicy.

Fay's Prolific. The most popular red variety for home use; bears heavily.

La Versailles. Very large, red.

Perfection. The largest red currant in existence; a prize winner. 25c each; \$2.50 per doz.

White Grape. Large yellowish white, sweet.

### **STRAWBERRIES**

Strawberries require a medium rich, well-tilled soil for successful growing. Plants should be set about 15 inches apart; 100 plants are sufficient for 6 rows, 20 feet long. When setting out see that the plants are "firmed" well, keeping the crown just above the soil. Keep all runners cut off, and about December 1 to December 15 cover over the bed with dry straw, meadow hay or leaves and litter. In Spring, as the plants show indication of growth, push aside the covering from crowns of the plants, thus allowing them to come through with their new growth. A fresh mulching of good hay or new grass about May 1 to May 15 will serve to keep the fruit clean and prevent the growth of weeds.

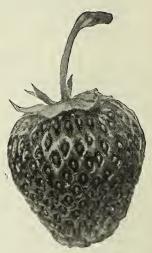

Varieties marked "P" are pistillate and must have a row of staminate, or perfect-flowered varieties (P. F.), planted every 10 feet among them.

### PRICES

Layer Plants. For spring planting. Per doz., 25c; per

100, \$1.00; per 1000, \$7.00.

Pot Grown Plants. For July, August and September planting. Per doz., 50c; per 100, \$3.50; per 1000, \$30.00.

Abington. Large fruit, solid, and excellent flavor. P. F. Belmont. Late; crimson berry; very productive. P. F.

Black Beauty. P. F. Similar to Marshall but bearing more freely.

Breck's Abundance. Large, excellent berry; vcry heavy cropper; flavor tart; mcdium early. Highly recommended. P. F.

Brandywine. Hardy, good quality. Medium. P. F.

Chesapeake. P. Mid-season to late; a fine large berry of good quality.

Commonwealth. Late; very large; deep crimson; excellent flavor. P. F.

Early Ozark. P. F. Extra early; large, dark red, delicious fruit.

Excelsior. The best of all early strawberries. Is medium small; crimson; tart, and the earliest of all. Splendid

variety. P. F. Gandy. Large berries; late and an excellent cropper. Splendid keeper. P. F.

Glen Mary. Large; crimson berry; good quality; very productive; late. P. F.

Heritage. P. F. Mid-season; a robust grower and a prodigious yielder. Flesh solid and of fine texture.

Marshall. Requires no recommendation; is medium late. The fruit is very large, deep crimson color, and extra quality. P. F.

Minute Man (P.) Medium early; vigorous grower, free from rust; berries light red and a great cropper.

Norwood. P. F. Early to mid-season; fruit very large, of the Marshall type. Excellent quality.

Parsons' Beauty. P. F. Mid-season; very heavy yielder,

marketing well.

Senator Dunlap. P. F. Early to mid-season. Dark red berries of medium size; flesh red throughout, juicy and

Fall or Everbearing Strawberries

Although several varieties of everbearing strawberries have been introduced, we have found only two which are prominently superior. These were fully tested in our trial grounds last season, and excellent fruit was picked almost daily until frost destroyed the unripened berries.

Runner Plants, for spring planting, 50c per doz.; \$3.00 per 100.

Potted Plants, for mid-summer planting, \$1.00 per doz.; \$5.00 per 100.

Progressive. This variety makes a vigorous growth, and produces immense quantities of berries. Blossoms should be kept picked off until about the middle of July. If this is done, a heavy crop is insured from about the first of August until heavy frost. The berries are of medium size and excellent quality.

Superb. The berries of this excellent variety are a

little later than those of Progressive. The plants are about equal in vigor of growth, but do not produce so many berries per plant as Progressive. The quality, however, is excellent, and is always sure to bring the highest price on the market.

### SPRAYING CALENDAR

This calendar, based upon the recommendations of the Agricultural Colleges and Experiment Stations of the country, is a brief guide for the general treatment of insect pests and plant diseases.

Timeliness is one of the greatest factors in the control of diseases and pests; in order to spray intelligently, that is, to strike at the proper time, one should know at least the main facts in the life-history of the insect or disease sprayed against. Moreover, it will pay to remember that, for nearly all fungous diseases and some insects, spraying is a preventive, and to be most effective must be done at the time when attacks may be expected, without waiting for the enemy to become apparent.

Spray only on clear, sunny days and finish the work early in the afternoon, so that the application will dry rapidly and before dew falls. Spray evenly and thoroughly, using ample pressure and a nozzle that throws a fine mist, but do not continue until the foliage drips. Never spray when the trees are in blossom.

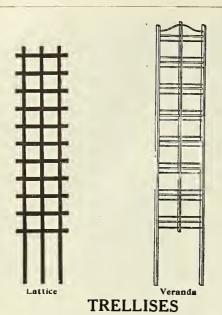

In general terms:

POISONS, such as Arsenate of Lead, are used to control leaf-eating insects. Examples—Canker Worm, Potato Beetle.

CONTACT INSECTICIDES, such as Tobacco Extracts, Soap Sprays, Kerosene Emulsion, etc., are used in fighting sucking insects. Examples—Plant Lice, Squash Stink-bug. Sucking insects will not be killed unless they are hit by the spray.

Bordeaux Mixture and Lime-Sulfur are for use against plant DISEASES.

Plant	Enemy	Spray	1st Application	2nd Application	3rd Application
Apple	Bud Moth Codling Moth Scab Curculio	Arsenate of Lead and Bordeaux. (Lime- Sulfur may be used instead of Bordeaux)	open.	{Immediately after petals fall.	{ 10 days later.

SIMPLEX WEATHERPROOF

Neat, convenient, permanent. The writing is protected by the transparent cover, and will

last indefinitely if done with lead pencil. Whatever water enters at the sides will not deface the markings as the graphite of the pencil is not soluble to any extent and requires friction to remove it. This friction is prevented by the transparent cover.

DIRECTIONS: Slide transparent cover to one side, mark with ordinary lead pencil, replace cover, pass wire through both holes and attach. Waterproof India Ink may also be used for marking with excellent results.

### Prices, including Copper Wires for attaching.

# **Bouquet Holders for Cemeteries**

Indispensible for cemetery use. Made of iron, nicely finished in green and bronze. . Each, \$0.20 No. o Lily . . . Each, \$0.25 No. 4 Tulip . .25 .30

Egyptian Bouquet Holder, new pattern, large size; holds half gallon water. \$1.25 each.

Tin Bouquet Holders. No. 35, \$1.25 doz., 12c. each; No. 36, \$1.50 doz., 15c. each; No. 37, \$2.00 doz., 20c. each.

# Folding Wire Plant Stands

The most compact, strong, durable plant stand ever offered for sale, and at prices less than all others of the same capacity. They pack closer than any other plant stand for shipment. The ends are made of flat steel and have porcelain castors. The steel and iron work is finished in green and bronze. The construction of the shelves or trays is such that there is more room for the pots and foliage than any other plant stand that takes up the same amount of room on the floor.

Rustic Settee. Length of seat, 21/2 ft. \$5.50; 31/2 ft. \$7.50; 4½ ft. \$10.00, each.

Any special size or design to order.

### Galvanized Steel Window Box

This plant box is made of strong galvanized iron, neatly enameled in dark green. It is so constructed that the watering is easy; the drainage ample; the air circulation perfect. Made with a water pocket on one side, at the bottom. This pocket runs the full length of the box. Leading from it into the box itself, are openings to convey the water to the soil. To prevent these openings from clogging up, a roof-shaped piece of metal extends from the pocket openings to the center of the box at

the bottom.

# Sterlingworth Weed Killer

This preparation is the most powerful and effective weed-killing compound known. It is unexcelled for use on walks, drives, tennis courts and golf links, and is used largely in parks and cemeteries, or where the killing of all objectionable vegetation is desired. It is a dry powder to be dissolved in water. It permanently destroys all kinds of weeds, grass (including milk-weed and witch grass), poison ivy, briars, burdocks, dandelions, daisies, thistles. One application kills roots and foliage, preventing further growth until new seed is sown. Do not dig up your walks, drives and tennis courts to kill weeds. The cheaper, quicker and less laborious way is to use this killer. It is applied with an ordinary watering can. Full directions on every can. I-lb. pkg. (makes 10 gals.) 50 cts., 3-lb. pkg. (makes 30 gals.) \$1.25, 5-lb. pkg. (makes 50 gals.) \$2.00.

Glazing Points. The Peerless. The only durable and reliable points. Made of galvanized steel wire, no rights and lefts. No raising up when driving. Three sizes: Nos. 2,2½ and 3. The Nos. 2 and

2½ are for general use; the No. 3 for extra heavy work. Per box of 1000, 60 cts. Pincers for driving same, 40 cts.

Caps, Hay, Breck s Improved. Brown, medicated, complete with ropes and pins, \$1.00 each; \$90.00 per 100.

Butter Color, Hansen's Danish. This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June" to butter at all seasons of the year. Bottle, sufficient to color 500 lbs. of butter, 25 cts.; for 1200 lbs., 50 cts.; for 2500 lbs., \$1.00.

Mats, Straw. Hotbeds,  $6 \times 6$ , \$1.75 each;  $3 \times 6$ , \$1.25. Other sizes to order.

Arlington Plant Protector

Protectors, Arlington Plant. Protects from bugs, bores and fowls, also subdues wind, rain and cold. Each 25 cts., doz., \$2.25.

Cotton Batting. For packing flowers, etc. Per sheet, 6 cts. Palmer Hotbed Mat No. 2. Size 76 x 76 inches, wool filled and quilted, frost proof. Drill or burlap, outside covering, \$2.75 each.

Pencils. Wolff's Indelible Garden. For writing on wood labels, with point protector. Each 20 cts., doz. \$2.00.

Protecting Cloth for Hotbeds. Used as a substitute for glass for protecting plants in early spring. In pieces of 60 yds., 12 cts. per yd.

Putty Bulbs. A simple and useful device for applying putty to sashes, \$1.00 each.

White Wax Paper. For packing and protecting flowers and plants. Size 12 x 18 inches, 90 cts. per ream. Size 24 x 36 inches, \$3.50 per ream.

Kraft Wrapping Paper. In 18, 24 and 30 in. rolls. For wrapping parcels, boxes, etc., per pound 12c. Price subject to change.

Twine Melon Nets. 15c each; \$1.50 a doz. For supporting melons growing in greenhouses.

# Hyacinth Glasses

The Hyacinth Glasses we offer are of American manufacture. They are of better shape and in more desirable colors than the imported Belgian glasses usually sold.

Ordinary Tall Shape. Green, blue and amber. Each 20 cts., doz. \$2.00.

Tye's Style. Green, blue and violet. Each 25 cts., doz. \$2.25.

### Mastica

(For Greenhouse Glazing.)

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

### We are the Manufacturers' Distributing Agents for Boston

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent reglazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans \$1.50, ½ gallon 80 cts. 6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons; f.o. b. Boston.

Machines for applying Mastica, \$1.50 each. Net.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. Price, 25 cts. per lb.

Garden Gloves. Specially made for garden use. Men's Gauntlet, 85 cts. per pr. Ladies' Gauntlet, 75 cts. per pr. "Basket Making." The first book of the "How to Do It Series." Tells all about bas-

ket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail 25 cts.

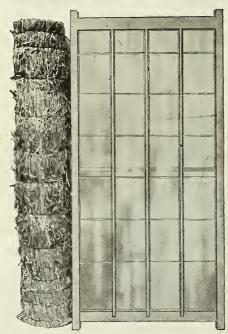

Silkaline. Used for growing smilax and asparagus on, also for tying in bouquet work; per reel, 25 cts.

Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprink-ling bouquets, dampening clothes, etc.; three sizes, 75 cts., \$1.00 and \$1.25 each.

Scollay Sprinkler

# Double Glass Hot Bed Sash

Straw Hot Bed Mat

Two sashes in one frame, doing away with the extra mat and board covering which must be used in this section during our severe winter, if one is to be sure of plants growing in Hot Bed or Cold Frame.

The double layer of glass, 5% inch apart, provides dry air space, which is the best non-conductor known, and while acting as a protecting mat or blanket, lets in the sun with its heat Our sash is all puttied into the frame, which is made of the very best material and well painted and the standard 3 x 6 size; lights of glass, 10 x 12.

Price: per single sash, \$5.00; 5-sash at \$4.85 each; 10-sash and over \$4.75 each; delivered to railway station or express, Boston. Crating extra.

# Single Glass Sash for Hot Beds or Cold Frames

Crating Extra at Cost

Made from thoroughly seasoned lumber. Frame, well puttied and painted, 13/4-inch stock; glass, 8 x 10. The best sash offered today in Boston.

Price: Single sash, \$4.00 each; 5-sash or over, \$3.75 each.

# Breck's Special Hot Bed Sash with Frame, Complete

The outside dimensions of Frame are three feet one inch long, and four feet eight inches wide, made of one inch Cypress; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing the frame may be made to last for years.

The Sash is also made of Cypress of one and one-half inch stock, put together and glazed in the very best manner. On the under side of the Sash is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with a hammer and screwdriver can put it together in a few minutes. In offering this **Special Hot-Bed** to our customers we feel

that we have something that will give entire satisfaction and will supply a long felt want.

Our price for Frame and Sash complete is only \$6.50 delivered at the railroad in Boston,

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20 and 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each respectively.

### INSECTICIDES AND FUNGICIDES

In general terms: ARSENATE OF LEAD and PARIS GREEN are specifics for leaf-eating insects.

KEROSENE EMULSION, TOBACCO, FISH OIL SOAP for sucking insects.

BORDEAUX MIXTURE and LIME AND SULPHUR for fungus.

Prices subject to change without notice. See spraying calendar on page 119.

# "CORONA DRY" (Arsenate of Lead)

A pure Arsenate of Lead containing 33% arsenic oxide, absolutely chemically combined with lead and the lowest percentage of "free" or water soluble arsenic. It is the ideal compound for spraying potatoes because it combines the quality of quick poisoning (superior suspension), giving even application; absolutely safe from "burning" and great adhesiveness. It gives an even application, covers more thoroughly and sticks to the foliage longer. It mixes easily and readily in water. No working up to prepare for the spray tank. No straining. It is only necessary to shake the proportional amount into the spray

proportional amount into the spray tank. By using the same weight each time you spray, your mixture is always the same strength. No guesswork. Standardization is alone worth the price. No freight to pay on water; cannot freeze or dry out, cake, or lose its strength. ½-lb. pkg. 25 cts. each, 1-lb. pkg. 40 cts., 5-lb. pkg. 35 cts. lb., 10-lb. pkg. 30 cts. lb., 25-lb. drums 27 cts. lb., 50-lb. drums 26 cts. lb., 100-lb. drums 25 cts. lb., 200-lb. drums 24 cts. lb.

June 28, 1916.

J. Breck & Sons.

Please send me by Tenney's Express 10 lbs. Corona Arsenate of Lead. I have used it on my potatoes with the best of success and want to be prepared for the next crop of bugs.

(Signed) ALFRED KIMBALL, Georgetown, Mass.

Corona Dusting Sulphur for Fungus Pests. Pure refined superfine flour sulphur. No other ingredients. This pure sulphur is especially prepared for dusting. It can be used for all purposes of commercially pure sulphur. There are many insects, and even more fungus diseases, that have no known remedies at the present time. The fungus diseases are the harder of the two to handle, but some of the most common ones can easily be controlled by the use of an efficient sulphur product. Price 1-lb. can 20 cts., 5-lb. cans 75 cts., 25-lb. drums 9 cts. lb., 100-lb. drums 7 cts. lb.

METHOD OF APPLICATION: "Corona Dry" and Corona Dusting Sulphur are applied to growing plants, trees, shrubs, etc., in exactly the same way. The dry powder is placed in the powder reservoir of the powder gun, or duster, and is blown over the foliage. The dust is so light, fine and uniform that it comes out in a cloud, and spreads over the plant much more rapidly than wet sprays can be applied. The foliage and fruit is covered with the protective dust very completely, and in about one-fifth of the usual time. The dust sticks just as well as a wet spray, and gives a much more even and thorough covering. In fact, dusting methods have proven far superior to wet methods, for control of many insects' injuries such as codling moth, etc., and the danger due to injury from "burning" has been practically eliminated.

LEARN HOW TO MAKE CORONA MIXTURE A COMBINED INSECTICIDE AND FUNGICIDE made by mixing equal parts by volume of "Corona Dry" and Corona Dusting Sulphur as shown in the booklet, "Garden Pests and Their Control."

Breck's Scale Destroyer dilutes instantly in cold water. It kills San Jose and Oyster Shell scale, Aphis Plant lice, and soft-bodied sucking insects by covering them with a thin waxy coating. Ev ry scale hit by it is killed. It has no caustic

action, does not injure the operator or spraying outfit, possesses no disagreeable odor and is altogether one of the most satisfactory and effective Scale Killers produced. If your trees are badly infested with Scale, do not use anything else but this destroyer. For a fall, winter or spring spray, it is unexcelled. It does not cost any more to spray a good fluid than it does a pcor one, and there is a world of difference in the result. 1-qt. can 35 cts., 1-gal. cans \$1.00, 5-gal. jacket cans \$3.75, 10-gal. jacket cans \$7.00, 25-gal. bbls.\$25.00.

Aphis Punk, Nikoteen. A special preparation of Nicotine for the extermination of Green and Black Fly, Thrip, etc., contains no ammonia and does not injure delicate plants. Per box of 1 dozen rolls (720 grains Nicotine) 60 cts.

Aphine. Most effective against all plant sucking insects infesting flowers, foliage, fruits and vegetables. Can be used as a spray, wash or dip. ½ pt. cans 25 cts.; ½ pt. cans 40 cts.; 1 pt. cans 65 cts.; qts. \$1.00; gals. \$2.50.

Creosote Mixture. This mixture is sure death to the eggs of the Gypsy Moth, Tussock Moth and similar insects. Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee. 1 qt. 20 cts., 1 gal. 50 cts., 5-gal. cans 35 cts. gal., 50-gal. bbl. 20 cts. gal.

He-bo (Sterlingworth). A substitute for Hellebore which is satisfactory for use against Rose slugs, currant worms, cabbage worms and most other leaf eating insects, where a milder poison than paris green is desired. For many uses it is superior to Hellebore. ½ lbs. 15 cts., 1 lb. 25 cts.

Dalmation Insect Powder. (Sterlingworth). Ground from pure closed dalmation flowers. The purest, strongest, best grade obtainable. Invaluable to the housekeeper

# Breck's Victor Fly Driver

Safe to use, thoroughly effective and cheaper than any other first-class preparation for the purpose on the market. Put up in 1-gal. cans only. 1-gal. can 75 cts., per case of 1 dozen cans \$7.50.

Bordeaux Mixture, Liquid, Acme Brand. We consider this the best concentrated Bordeaux Mixture on the market. One gallon makes 50 gallons of Bordeaux by simply adding 49 gallons of water. It does not clog the nozzle and adheres to the leaves. Full directions on cans for use. 1 qt. cans 40c., 1-gal. cans \$1.25, 5-gal. cans \$4.50 each, 10-gal. \$8.00 each, 25-gal. \$17.00 each.

Dip, Cooper's Sheep. A world-famous preparation, in powder form. It is easily carried, quickly prepared and most effective. Large pkg. sufficient to make 100 gals. \$2.00, small pkg. to make 25 gals. 50 cts.

Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per lb. 50 cts. ½ gal. \$1.50, 1 gal. \$2.50.

For free delivery offers and general instructions regarding orders and shipments see third page of cover

# INSECTICIDES AND FUNGICIDES—Contd.

Prices subject to Market Changes.

Bowker's Pyrox. The one best spray for all leaf-eating insects. Does all that Arsenate of Lead will do, besides protecting trees, shrubs, vegetables and plants against fungus diseases, one application answering both purposes saving labor and expense. "Sticks like paint" in spite of even heavy rains. Guaranteed under the National Insecticide Act. All ready to use by adding water. Lb. 25 cts., 5 lbs. \$1.00, 10 lbs. \$1.85, 25 lbs. \$4.50, 50 lbs. \$8.00, 100 lbs. \$15.00. Large quantities, price on application.

Bowker's Concentrated Lime Sulphur kills San Jose Scale, Oyster Shell bark lice, etc., and gives the tree a thorough "house-cleaning." It should be

applied any time after the leaves drop in autumn and before the buds start in spring. Needs only to be diluted with cold water and it is ready to apply. One gallon makes 10 gallons of spray. Guaranteed under the National Insecticide Act. 1 gal. 75 cts., 5 gal. can \$2 25, 10 gal, can \$3.50, 50 gal. bbl. \$8.00. Write for special prices on larger quantities, stating quantity required.

Bowker's Arsenate of Lead (Disparene Brand). It is easy to apply and won't injure the most tender foliage. Lb. 25 cts., 5 lbs. 90 cts., 10 lbs. \$1.60, 25 lbs. \$3.75, 50 lbs. \$6 50, 100 lbs. \$12.00.

"Black Leaf 40." A concentrated solution of Nicotine sulphate. Active ingredient, Nicotine 40%. For spraying fruit trees to destroy soft-bodied sucking insects. Each sucking insect must be "hit" by spray to be affected. Against Green and Rosy apple, Aphis, Pear psylla, Hop louse, etc., one fluid ounce "Black Leaf 40" to eight gallons water. Against Black Aphis, Wooly Aphis, one fluid ounce "Black Leaf 40" to 6 gallons water. Add soap as follows: One pound of good laundry or fish oil soap to each thirty gallons water, which lessens formation of drops and gives better penetration. Dissolve the soap in the water before adding "Black Leaf 40." Keep solution well stirred while spraying.

Full directions for all uses attached to every can.  $\frac{1}{2}$ -lb. cans 75 cts. each, 2-lb. cans \$2.50 each, 10 lb. cans \$10.75 each.

 $\it Eciffo.$  A sure cure and prevention of water-bugs, cockroaches, etc. Per tin 50 cts.

Fungine. An infallible remedy for mildew, rust, bench rot and other fungi affecting flowers and vegetable plants. ½ pts. 40 cts., pt. cans 65 cts., qt. cans \$1.00, gals. \$3.50.

Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites. 5-lb. pkg. 35 cts.

In-a-Minute. Best known killer of roaches, hen lice, ants in the house, and also bed bugs, etc. Non-explosive, non-staining, and non-poisonous. Bottle, 25 cts.

Kerosene Emulsion, Acme Brand. This is a concentrated article for successful use against scale and all soft-bodied sucking insects, such as San Jose Scale, Plum Lecanium, etc. Dilute 10 to 12 times for plant lice and soft-bodied bugs. Use strong solution for scale insects. Pt. can 25 cts., qt. can 40 cts., gal. can \$1.00 5-gal. can \$4.00.

Oriole Brand North Carolina Pine Tar. Strictly pure old process North Carolina Tar in full measure cans; useful for protecting cut surfaces of pruned trees, also broken and bruised places in the bark of trees and shrubs. Per gal., 50 cts. (in gallon cans only).

Bug Death. A patented non-poisonous powder, effective against potato, squash, and cucumber bugs, currant and tomato worms also other plant and vine eating pests. If used according to directions injury cannot result to the most tender plants and it has a tendency to assist growth. Bug Death may be applied dry in a shaker or mixed with water and sprayed. Prices 1 lb. boxes, 20 cts., 3 lb. boxes, 45 cts., 5 lb. boxes, 60 cts, 12½ lb. boxes, \$1.25, 100 lb. drums, \$8.00.

Reg. U. S. Pat. OFF. Pat. March 16 and Nov. 9, 1897.

Rogers Dry Lime Sulphur. In Rogers Brand of Dry Lime Sulphur we find successfully combimed lime and sulphur in a dry form and producing a compound which has all of the insecticidal and fungicidal qualities of the liquid material and all of its advantages with none of its disadvantages. Safe and effective not only as a dormant spray but also as a summer spray in combination with arsenate of lead. Rogers Dry Lime Sulphur has been tested by experiment stations and found to be infinitely superior to all of the present dry compounds on the market, not only in safety but in effectiveness.

From 10 to 12 pounds of Roger's Dry Powdered Lime Sulphur dissolved in 50 gallons of water should be used as a dormant spray against scale, etc.

From 2 to 3 pounds to 50 gallons of water in combination with the usual preparation of Dry Powdered Arsenate of Lead or Paste Arsenate of Lead should be used for summer spraying on all seed fruits such as apples, pears, quinces, etc.

From 1 to 1½ pounds to 50 gallons of water in combination with the usual strength of Arsenate of Lead should be used for summer spraying of peaches, plums and all stone fruits. Prices: 5 lb. pkgs., \$1.00; 10 lb. pkgs., \$1.75; 25 lb. pkgs., \$3.75; 100 lb. drums, \$12.00.

Sticky Tree Cord. A soft cord about 3/8 of an inch in diameter, thoroughly saturated and coated with a black sticky material similar in character to that used on sticky fly paper.

It is supplied in tubes about 234 x 6 inches, and the cord is pulled out through a hole in the screw top, which has an attachment for clamping to facilitate cutting off the cord. It is applied to trees by tacking one end to the tree, then passing it around once or twice, tacking about every 18 inches and then cut off.

The cord will not run or drip appreciably and will remain sticky for three or four months according to climatic conditions. It has been endorsed by prominent Park and Cemetery Superintendents, Foresters and Horticulturists generally. Price 25 cts., per tube containing about 30 feet of cord. Weight about 1½ pounds.

For free delivery offers and general instructions regarding orders and shipments see third page of cover

### INSECTICIDES AND FUNGICIDES—Contd.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 50 cts., qt. 80 cts., gal. \$2.25.

"Nico-Fume" is especially effective against Aphids ("Green Fly" and "Black Fly") and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets 85 cts., 144 sheets \$4.00, 288 sheets \$7.50.

"Nico-Fume" Liquid.  $\frac{1}{4}$  lb. can 50 cts., 1 lb. can \$1.50, 4 lb. can \$5.50, 8 lb. can \$10.50.

Nikoteen. Packed in pint bottles; each bottle contains all the nicotine obtained from 200 pounds of tobacco stems. A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pt. bottle \$1.50.

HOW TO MEASURE THE HOUSE. To ascertain how many cubic feet there are within any greenhouse, etc., multiply the length in feet by the breadth in feet, then by the average height; the result being the number of cubic feet.

Paris Green, Guaranteed Pure. This is the highest grade of Paris Green it is possible to make. It is manufactured from pure material and is always of uniform quality. Be careful of cheap greens and so-called new methods. These products are liable to burn and scorch the leaves. 1/4 lb. 15 cts., 1/2 lb. 20 cts., 1 lb. 35 cts. Subject to market changes.

Reade's Electric Worm and Ant Destroyer. A most effective and quick acting liquid preparation, which will destroy earth worms, ants and other soil pests. Add a gallon to 120 gallons of water, mix well; apply carefully and thoroughly with an ordinary watering pot. All Golf green keepers should have a supply on hand. I gal. kegs \$4.00; 5 gal. kegs, \$3.50 per gal.

Sterlingworth Cut Worm Killer is a powder for sprinkling near 'he vegetation to be protected, and is so alluring to Cut Worms that they are irresistibly attracted to it. Dead Cut Worms may be seen wherever there are Cut Worms and this Killer is used. It is non-poisonous, and birds, fowl and pets that eat the dead Cut Worms are not killed. Do not use poison for killing Cut Worms. You may poison

insect-eating birds. One pound protects 175 plants in hills, and 150 lineal feet when in rows. 1-lb. box 25 cts., 5-lb. tins \$1.00, 24-lb. drums \$4.00.

**Slug Shot.** Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. 1-lb. boxes 15 cts., 5-lb. pkg. 35 cts., 10-lb. pkg. 65 cts., in bbls. of about 225 lbs., per lb. 5 cts.

Sterlingworth Anti-Crow Corn Oil is a non-poisonous oil for protecting newly planted corn from crows and blackbirds. Do not kill the crows. They eat bugs. Corn treated with this Oil will run through a seeder. Different and better than tar. 1-pt. can 25 cts., 1-qt. can 40 cts., 1-gal. can \$1.25.

Sterlingworth Plant Lice Killer. Is a combination of Nicotine soap and oil for use against all small sucking insects, lice, etc., in festing house plants. Use one part to 15 parts water and sprinkle or spray. Price 25 cts. pint, gal. \$1.50.

Sterlingworth Cent-i-cide. Is for sprinkling an ant hills or out of doors on the ground wherever ants appear. One pound covers about 200 square ft. 1 lb. box 25 cts., 5 lb. tins \$1.00, 25 lb. drums \$4.50 each.

Soap Spray, Imperial. Contains no mineral poisons, but does contain vegetable poisons, harmless to plants, but peculiarly effective against Red Spider on fruit, etc., Rose Pug, White, Black and Green Fly, Mealy Bug, Thrip, Aphis, and other insect pests on fruits, flowers and foliage. It sticks but can easily be washed off fruit before marketing. It does not spot leaves. Harmless to animals eating orchard grass. Largely used for general tree and shrub spraying against elm-leaf beetle, etc. Qt. 55 cts., gal. \$1.65, 5-gal. can \$6.50. Prices subject to change.

Soap, Fish Oil Soap and Potash. Breck's Special. For the destruction of San Jose scale and all sucking insects. Lb. 20 cts., 14-lb. bucket \$1.50. Special prices on kegs and casks.

Soap, Sulpho-Tobacco (Patented). A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes it is valuable as an exterminator of Moths, Cockroaches, Carpet Bugs, and is a superior wash for dogs and all animals. Every insect will succumb to this insecticide. 3 oz. cake 10 cts., 8 oz. cake 20 cts.

Sulphate of Copper (Blue Stone). Lb. 20 cts. subject market changes.

Sulphur, Flowers of. Used to prevent and cure mildew on plants. Lb. 8 cts., 100 lbs. \$6.00. Net.

Tree Tanglefoot. A perfect safeguard for trees, vines and shrubs against Gypsy, Brown-tail and Tussock Moth, Canker Worm, Cut Worm, Ants, and other creeping insects. Do not heat it but apply it directly from the can. 1-lb. can 35 cts., 3-lb. can \$1.00, 10-lb. can \$3.00, 20-lb. can \$5.50.

Tree Burlap. 10 inches wide, for girding trees. 5 cents per yard, 100 yards 4 cents yard.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. \$1.00 per 30-lb. sack, \$2.50 per bale, \$25.00 per ton. Net.

Tobacco Dust. Fine ground. Can be used for dusting on plants, animal and poultry houses, to destroy lice, vermin and other insects. Can also be used to fumigate against insects, lice, etc. Readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Lb., 10 cts., 100 lbs. \$4.50.

Vaporite. A fine, dry powder, most effective for killing ants, beetles, wire worms, cut worm and similar insects in the garden soil. To destroy ants one should dust the Vaporite over the ground near the largest ant hills and runs, then wet the insecticide down thoroughly with hose or watering pot, that it may be driven as far into the soil as possible. To use it most effectively against the cut worm, Vaporite should be thoroughly worked into the surface soil 5 or 6 days before planting time. 15 cts. lb., 5-lb. can 60 cts., 100 lbs. \$10.00.

Vermine. Destroys white grub, cut, eel and wire worms, slugs, maggots, root lice and ants. For greenhouses, gardens, lawns, tennis courts and golf-links. ½ pt. 25 cts., ½ pt. cans 40 cts., pt. cans 65 cts., qt. cans \$1.00, gal. cans \$3.00.

For free delivery offers and general instructions regarding orders and shipments see third page of cover

The Acre-an-Hour Sifter. Is ideal for applying Bug Death Dry. Easy to operate and gives a quick covering to all plants and vines requiring a top application. Price, 75 cts. each. Net.

Dickey's Bug Death Shaker. The best thing in the way yet offered. Every person who has a garden will want one. Price, 25 cts. Net.

Powder Bulb, Scollay's Insect. This is a large, strong rubber bulb, with long metal neck and distributor set at an angle that enables the operator to apply either powder or liquid over or under the leaves. \$1.25 each.

# Fine Ground Limestone

Fine ground Carbonate of Lime. Always safe to use and its application is never followed by the temporary ill effects, especially on light soils, when the same amount of lime in caustic of slaked form is employed. Highly recommended by eastern Experiment Stations. Always lime before seeding to Alfalfa or mixtures which include Clover. Remember that Ground Lim-stone does not take the place of Commercial fertilizer, but to correct sour or acid soils. Shipped in roo-lb. bags, per 100-lbs. 75 cts., per ton, \$8.75. \$8.25 ton F. O. B. Boston. Special prices, including delivery, on car load lots.

R-R Land Lime is specially prepared for use on the soil, and is an unusually pure calcium lime,

being made from a lime-stone which analyzes from 93 to 97 per cent. calcium carbonate (Ca C  $O_3$ ), with less than 2 per cent. magnesion carbonate (Mg C  $O_3$ ). It is a combination of calcium hydrate Experiment Stations. It is shipped in the form of a fine white powder in roo-pound cloth bags. This form is most convenient, as it is ready for immediate distribution on receipt or will keep indefinitely when stored in a dry place; size and shape of package admit easy handling; loss of time and labor necessary to slake and sift ordinary lump lime is obviated, and the fine-

# ness removes all danger of breaking machinery of a spreader. 100-lb. bags \$1.00, per ton \$12.00. Price on application for car lots. **FERTILIZERS**

# Breck's Special Lawn and Garden Dressing

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is manufactured expressly for us and we vouch for its containing all the constituents required to produce a luxuriant growth. We believe beyond a question that ours is the only absolutely odorless Lawn Dressing. It is also so clean that the most fastidicus person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a firmer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment.

Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower beds and all vegetable crops as for the lawn.

# Bon Arbor Ant Destroyer

A most effective preparation for destroying and driving away ants infesting lawns, tennis courts

and golf courses. Usually about 3 days is required to get rid of the ants and about three applications are necessary. Follow directions on package carefully. Price per lb. 50 cts. 5 lb. cans \$2.25, 10 lb. cans \$4 00, 25 lb. box \$9.00. Price subject to change.

# Breck's Special Market Garden Manure without Potash

A high grade properly balanced, complete fertilizer. Can be used either with or without barnyard manure, and for general use on all farm and garden crops. Especially recommended for market gardeners. \$1.10 for 50-lb. bag. \$2.00 per 100-lb. bag. \$37.00 per ton, all F. O. B. Boston.

For free delivery offers and general instructions regarding orders and shipments see third page of cover.

# Breck's Ram's Head Brand Pulverized Sheep Manure—(Odorless)

A standard dressing for lawns and around private homes or cemeteries; on golf courses and wherever a strong, luxuriant growth of grass is needed. No time is lost waiting for Pulverized Sheep Manure to rot, as is the case with stable or Barnyard Manure, and no necessity for raking off refuse after an application of Breck's Ram's Head Brand, or danger of tracking into the house, or making the lawn unsightly or evil smelling.

Apply Ram's Head Brand two or three times during the season before rain or watering at the rate of one pound or over to 30 square feet or less. This will keep the

lawn or golf course in flourishing condition.

Ram's Head Brand is pure and unadulterated. We get it from Sheep Corrals where the animals have been kept under cover, hence it retains its full strength, and besides has been put through a mechanical drying and grinding process which destroys absolutely all weed seeds, rendering Ram's Head Brand very valuable for the florist to be used as a bench fertilizer.

We are selling increased quantities of our brand to the Florist for this purpose and we can highly recommend it. Price per ton, \$38.00; 100-lb. bags, \$2.25; 50-lb. bags, \$1.25; 5-lb. pkgs., 30c; 1-lb. pkgs., 10c; f. o. b. Boston.

### Scotch Soot

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two-thirds soot, one-third sulphur) there is nothing better to prevent and cure mildew. Used as a fertilizer either in the dry state or in liquid, it quickly promotes growth. Per bag of about 2½ bu., \$3.00.

# Canada Hardwood Ashes

A most valuable fertilizer. The very best we can produce in Canada. Quote special prices, carload lots in bulk delivered anywhere, price per ton in sacks, f. o. b. Boston, \$24.00 ton net; per sack of 100 lbs., \$1.50.

### Fine Ground Fertilizer Bone

We have a high grade of this valuable fertilizer prepared especially for us. It is useful for all crops, but especially for grass lands and Fruit Trees. Per 50-lb. bags, \$1.25; 100 lbs., \$2.25; per ton, \$40.00. Net f. o. b. Boston.

# Inch or Grape Bone

This is unmanipulated bone, broken into pieces that vary in size from one-quarter to an inch. It is unsurpassed as a lasting fertilizer for grape vines, fruit trees, shrubs and trees of all kinds. It should be used liberally in grape vine borders and when setting out vines and fruit trees. Mix with soil to a depth of one foot or more. Price \$2.75 per 100 lbs.; \$45.00 per ton, f. o. b. Boston.

# Thomson's Vine, Plant and Vegetable Manure

A safe and reliable food and stimulant for every fruit-bearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: ½ cwt. (14 lbs.) \$1.50; ¼ cwt. (28 lbs.) \$2.50; ¼ cwt. (56 lbs.) \$4.50; I cwt. (112 lbs.) \$7.50.

# Thomson's Special Chrysanthemum Manure

Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaping dessert-spoon full will be sufficient for a 10-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, 14 lbs. \$2.50; 28 lbs. \$4.50; 56 lbs. \$7.50.

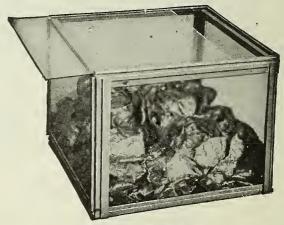

# Bowker's Ammoniated Food for Flowers

A dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless, and producing early and abundant blossoms of rich and brilliant color and healthy, luxuriant plants free from vermin. Price, small pkg. 15 cts.; large pkg. 25 cts.

### Cocoanut Fibre

A chemically prepared cocoanut fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Cocoanut Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs. 30 cts.; 15 lbs. 50 cts.; 25 lbs. 75 cts.; 50 lbs. \$1.00; 100 lbs. \$1.50, net.

# The Barrie Forcing Frame

The Barrie Forcing Frame

Under these frames corn, cabbage, cauliflower, lettuce, cucumbers, tomatoes, melons, egg plant, etc., as well as all tender flowers, can be started and grown in the open ground and brought to maturity much earlier than usual.

The frames placed over rhubarb or other permanent plants, either vegetables or flowers, greatly hasten their maturity in the spring.

Lettuce, etc., can be grown under or protected by the frames through the late fall.

Excellent for the starting of tender flower and vegetable seeds for transplanting into the open ground.

The frames also protect their contents from the ravages of the cut worm.

Placed over bulbs in the spring time, in the small garden, blooms of greater perfection may be had much earlier than usual.

The frames are constructed of tinned iron, thoroughly protected from rust by a special painting process, and can be instantly set up or taken apart without the use of tools.

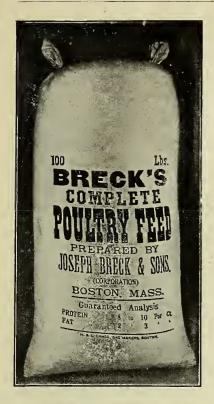

Any light of glass can be easily replaced, in case of breakage, without taking apart the frame, and the top glass slides open for ventilation.

The metal frame weighs two pounds without the glass and is absolutely strong and rigid. The glass consists of four panes 10 x 12 inches, and one pane 12 x 13 inches, standard sizes, easily obtainable anywhere.

To assemble, fit the corners of the top and bottom squares into the slits in the ends of the posts. Pass the stay rods, bent end up, through the holes in the squares, inside the posts. Attach nuts and tighten slightly. Slip in the glass and the frame is complete.

Carefully packed, knocked down, in heavy corrugated cartons, each containing six frames and glass complete.

Price, \$1.50 each; \$17.00 a dozen.

BLATCHFORD'S
CALF MEAL
ALWAYS IN STOCK

# Breck's Hygienic Brand Chick Food

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhæa, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle-forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.75. 100 lb. bag, \$3.00.

# Breck's Complete Poultry Feed

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in *Breck's Complete Poultry Feed* what we believe is the best food for poultry that is on the market today.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$1.75, 100 lb. bags, \$3.00.

# Breck's Mash Egg Food

Is a properly balanced meat and cereal preparation, and is one of the best egg-producing foods we know of for poultry that do not have large runs; it is just what is wanted to keep them in good vigorous condition. Can be fed wet or dry. Price, 100 lb. bags, \$2.75.

# Breck's Alfalfa Meal

Our brand of best pea green California Alfalfa, grown on irrigated land, rich in protein; one of the best green feeds during the winter for poultry.

DIRECTIONS FOR FEEDING: Pour on boiling hot water, cover, let steam an hour, then mix with the usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Shipped in 100 lb. bags only. Price, \$2.00 per 100 lbs. or \$36.00 per ton.

### Breck's Banner Brand Cut Clover

Made from the best New York grown Red Clover, ground medium fine, all from Red Clover hay.

DIRECTIONS FOR FEEDING: Pour on boiling water, cover, let steam an hour, then mix with the usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50-lb. bag, \$1.00. Net. Special prices on larger quantities quoted upon application.

Breck's Poultry and Swine Meal. A concentrated powder, a palatable animal meal for poultry and swine. Full directions for feeding with each package. Price per 100 lbs., \$2.25; 50 lbs., \$1.50; 25 lbs. (month's supply for 30 hens), \$1.00.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. (See cut.) ½ gal., 50 cents each; 1 gal., 75 cents each; 2 gals., \$1.00 each. Special prices per dozen or 100 upon application.

Blatchford's Calf Meal. The perfect milk substitute. Will raise and veal calves at one-third to one-quarter the expense of feeding milk. Used and endorsed by Experiment Stations and farmers all over the world; has been on the market for 100 years. A valuable feed for pigs, colts, lambs and poultry. It is absolutely the only milk substitute that contains the elements necessary for bodily growth and correct preparations. Blatchford's Calf Meal is not a stock food; it contains no drugs, medicine or stimulants; it is purely and simply a baby food for young animals. A 100 lb. bag makes 100 gallons of rich, nutritious gruel, thoroughly cooked and prepared for digestion. Price per 100 lbs. \$3.50, 50 lbs. \$2.00, 25 lbs. \$1.00, f.o.b. Boston.

# Pratt's Poultry Regulator

(Formerly called Pratt's Poultry Food)

This is the original Poultry Regulator, in use by the most successful poultry raisers everywhere. It is entirely different from Pratt's Animal Regulator. It is composed of valuable imported roots, herbs and barks so blended as to make a perfect regulator, tonic and stimulant, suited to the constitu-

tion of the poultry.

Pratt's Poultry Regulator overcomes the difficulties met by every poultryman by regulating the blood, bowels and digestive organs of all fowl. Thus it keeps the birds in robust health, produces good, rich blood, healthy fat, sturdy muscles, strong bones, red combs and wattles, brilliant feathers and fertile eggs. It stands unrivalled as an eggproducer, and when regularly used, the hens lay throughout the year.

Pratt's Poultry Regulator costs but a few cents a week for a big flock, and it pays its cost many times over in the results it produces. Results are immediate and permanent. Trial pkg. 10 cts., 26-oz. pkg. 25 cts., 5-lb. pkg. 60 cts., 12-lb. pails \$1.25, 25-lb. pails \$2.50, 50-lb. bag \$5.00, 100-lb. bag \$9.00.

# Pratt's Baby Chick Food

This is one of the greatest money savers and greatest chick savers ever placed on the market. Every man, placed on the market. Every man, woman or child who raises little chicks, turkeys, ducks and geese should try at least one package of Pratt's Baby Chick Food. It is a scientific food ration to be fed for the first three weeks. If you want real success with your hatches, if you want to save all the baby chicks, if you want to grow them fast, get Pratt's Baby

Chick Food on our recommendation for your first trial, after that you will never be without it. 3-lb. pkg., 25 cts.; 61/2 lb. pkg., 50 cts.; 25-lb. bags, \$1.50. Pratt's Poultry Book mailed on request.

Pratt's Roup Cure is a scientific preparation compounded into a fine powder, and when mixed with water, is absorbed by the blood at once, purifying the system, allaying inflammation, and reducing the fever. It not only cures but prevents roup, colds, canker, catarrh and diphtheria, and should be given to all fowls frequently to keep diseases away. Extra large boxes 50 cts. and \$1.00, small size 25 cts.

Pratt's White Diarrhea Remedy. This remedy will positively save many dollars worth of little chicks to poultry It has taken us nearly three years to find a remedy for White Diarrhœa and we are so sure that we have it in this article that we authorize our dealers throughout the world to refund the purchase price in case it fails. Small pkg. 25 cts., extra large pkg. 50 cts. Postpaid.

Pratt's Roup Pills. Quick, safe, sure; for roup, canker, and diphtheria. 1½-oz. pkg. 25 cts., 31/2-oz. pkg. 50 cts. Postpaid.

Pratt's Animal Regulator. The original stock regulator of America. Keeps horses well, improves their wind and makes their coats glossy. Cows give more and richer milk, butter fat being increased, and calves are strong and healthy. Steers fatten in half the time; hogs and sheep fatten quickly, free from disease. In 25 cts., 50 cts. and \$1.00 pkgs. 25 lbs. \$3.50.

Pratt's Poultry Disinfectant. Will protect your birds from nearly all the serious germ diseases. It gets rid of lice and mites, prevents roup, cholera, gapes, scaly leg and a host of other trouble makers.

Wonderfully effective in ridding cattle, horses, hogs, sheep and dogs of parasites and disease bacteria. I qt. 35c.; 1/2 gal., 6oc.; 1 gal. \$1.00.

Sanitary Poultry Fountains. Made of glazed stoneware, in two pieces, a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one-quart size is specially suitable for pigeons. I qt. 25 cts., 2 qts. 30 cts., 1 gal. 35 cts., 2 gals. 50 cts. Net. Packing charges extra.

Ground Oyster Shells. 100-lb. bag 75 cts.; 500-lb. lots, 65 cts. per 100 lbs.

Mica Crystal Grit. 50-lb. bag 50 cts., 100 lbs. 80 cts.

Bone Meal for Poultry and Cattle. 50-lb. bag, \$1.25 100-lb. bag \$2.50.

Flour of Bone. Bbls. about 200 lbs. only; \$2.50 per 100 lbs., Cracked Poultry Bone. Per bbl. of about 200 lbs., \$2.50 per 100 lbs.

### Poultry Charcoal

This Charcoal is especially prepared for poultry. It is carefully and uniformly graded in just the right sizes, is free from ammonia or other dangerous poisons, contains no useless dust or dirt and is the best charcoal sold for poultry. It is manually the production of the contains the production of the contains and the contain factured in four grades: X (Fine Powdered) for mash foods and ducks; XX (Fine Granulated) for brooder chicks and dry chick food mixtures; XXX (Medium Granulated) for halfgrown fowls and pigeons; XXXX (Coarse Granulated) for full-grown fowls, geese and turkeys. Per lb. 10 cts., 5 lbs. 25 cts., bag of 50 lbs. \$1.00.

Spratt's Food. The celebrated English preparation; nothing equals it for young chicks. 50-lb. bag \$3.25, 100 lbs. \$6.00.

Barley (Feeding). \$1.75 per bushel. Net.

Buckwheat (Feeding). \$1.50 per bushel. Net.

Peas. Small white Canada, \$3.50 per bushel. Net. Sunflower. Large Russian, 8 cts. per lb.

Millet. Good feeding quality, 4 cts. per lb. Net.

Kaffir Corn, or White Sorghum. 100-lb. bag \$2.50. Net.

Wheat. \$3.50 per 100 lbs. Net.

Ground Beef Scraps. Always freshly ground from the best kettle rendered cake scrap. 50-lb. bag \$1.50, 100-lb. bag \$2.75, ton \$52.00.

Fish Scraps. Dry, fine ground, 100-lb. bags; \$3.00 per 100 lbs., ton \$55.00.

Darling's Meat Crisps. Made from meat trimmings taken from the markets of Chicago and cooked the same night. After being cooked in a most careful and thorough manner the feed is pressed in tremendous presses to take out every possible bit of grease and moisture. Guaranteed to contain 75 per cent protein. A concentrated feed for laying hens. Small package 25 cts., large package 50 cts., 25-lb. pails \$1.75. Net.

Conkey's Roup Cure. One 50-cent pkg. makes 25 gallons of medicine. Directions with every package. Small size 25 cts., medium 50 cts., large size \$1.00.

Death to Lice. 5 oz. box, 10 cts., if by mail 15 cts.; 15 oz. box 25 cts., if by mail 40 cts.; 3 lb. pkg. 50 cts., by mail \$1.00 100 oz. pkg. \$1.00.

Liquid Lice Killer, Acme Brand. It is applied with an ordinary sprayer. It is of such strength that the gas given off by it destroys the pests; is perfectly safe to handle and is not injurious to fowls, animals or operator when used as directed Price, 1 qt. cans 35 cts., 2 qt. 60 cts., 4 qt. \$1.00.

### COW'S RELIEF

Is guaranteed to cure Caked Bag caused by garget, injury, overfeeding or calving; sore or injured Teats, Spider in the Teat, Stricture, Hard Milkers, Cow Pox and is especially valuable for heifers with the first calf, to remove the soreness and swelling that is too frequently a cause of kickers and hard milkers. Your money back if it does not satisfy you. Small pkg. 50 cts., large \$1.00.

Garget Remedy. This remedy has stood test of twenty years and is a complete success. It will not injure the butter or lessen flow of milk. Per can 50 cts.

Nest Eggs, China. Per doz., 25 cts. Net.

Nest Eggs, Knox Medicated. Medium size, strong and clean; will help keep poultry free from vermin. Each, 5 cts.; per doz., 50 cts.

Breck's Water Glass. Silicate soda, for the preservation of fresh eggs. Of the various methods devised for preserving fresh eggs only two have proved successful, viz.: Cold Storage with temperature at 34° or the Water Glass Method, the latter being the only practical one for family use. Water Glass is recommended by the U. S. Dept. of Agriculture as being the best preservative having no chemical action whatever. It simply seals the pores of the shell, keeping the contents of the egg in same condition as when put into the solution. If directions are followed, fresh eggs will keep perfectly for a year or longer. Full directions on every can. Price per gallon 50 cts.

Kow-Kure. It is a medicine for cows only. It prevents abortion, cures barrenness, removes retained afterbirth, prevents tuberculosis, stops scours, cures milk fever, caked udder, swelling in the bag, bloating, red water, increases the flow of milk, cures cows "off their feed," improves the quality of the milk. Large size, \$1.00; small size, 50 cts.

Sulpho-Naphthol. This preparation, originated by the late Doctor Cabot, is recommended for a great many purposes. It cleans and heals all sorts of cuts, bruises and sores. It is sure death to all kinds of bacteria and insects, and is unsurpassed as a disinfectant. For domestic animals, poultry and poultry houses it is the thing. Trial size 10 cts. 25c. bottle makes 5 gals.; 50c. bottle makes 10 gals.; \$1.00 bottle, 50 gals. solution; 1 gal. can, \$3.00.

Leg Bands. THE FAMOUS PHŒNIX, secure, neat, light and superior to all others. Numbered to order. Per doz., 25 cts.; per 100, \$1.50.

Spiral Celluloid Leg Bands. Best and cheapest to use. Last a lifetime. Put on and take off easily. Slip on just like a key ring. Will not come off. Birds cannot lose or remove them.

Colors: Black, Blue, Green, Pink, Red, White, Yellow. Per doz., 15 cts.; per 100, 75 cts. Special price on large quantity.

Leg Bands, Aluminum, for Poultry. Double Clinch. No. 1 for Bantams, No. 2 for Mediterraneans, No. 3 for American females; No. 4 for American males, Asiatic females, small turkeys; No. 5 for Asiatic males and turkeys. We number them to order. Per doz., 15 cts.; per 100, 65 cts. Postpaid. Numbering, extra 10 cts. per 100.

ARBONNI

Leader Adjustable

Leader Adjustable Leg Bands. Latest and best adjustable leg band out. Has neat, compact and smooth fastening with no catching points; easily attached and are absolutely secure. Made in two sizes: No. I for Bantams or Mediter-

raneans, No. 2 for Americans. Per doz., 15 cts.; per 100, 65 cts. Postpaid. Numbering, extra 10 cts. per 100.

Guns, Insect Powder. 2-oz. size, 15 cts. each.

Carbonol. Combines all the good properties of Carbolic Acid and yet has none of its bad features. Such a substitute has long been sought. Carbonol is a preparation of coal tar product adapted to a wide range of uses. It is a disinfectant, antiseptic and insecticide. Follow directions that accompany each package. 4-oz. bottles, 25 cts.; pints, 50 cts.; quarts, 75 cts.; gallon cans, \$1.75.

No a D Timbs and band

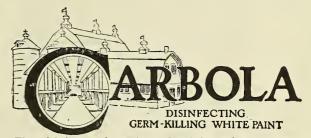

Creonoid. Lice destroyer and cow spray. Creonoid is prepared especially for this purpose. An up-to-date antiseptic preparation made from coal tar. Creonoid stands for animal comfort. Follow directions on can carefully. Stock tormented with flies cannot make flesh or milk. Keeping the flies off may mean the difference between profit and loss. Cows sprayed with Creonoid just before milking are quiet and give better yields of milk, because the flies are kept away. Try it, and see the results for yourself. Prices: \$1.00 per gal.; 5 or 10 gal. cans, 85 cts. gal.; ½ barrels, 80 cts. gal.; barrels, 75 cts. gal., f. o. b. Boston.

Milkol. An antiseptic, a disinfectant, cleanser, a curative agent. Keeps your live-stock clean and healthy, cleanses and purifies their quarters. Absolutely safe to use, non-poisonous and non-corrosive. One gallon makes from 60 to 256 gallons. Directions on every can. ½ gal. can, 85 cts.; I gal. can, \$1.50; 5 gal. can, \$1.25 per gal.

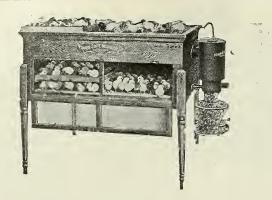

Clark Heaters. The use of Clark Heaters and coal is steadily on the increase. Write for special catalogue giving all sizes. Popular sizes are:—

No. 5 B. Light and handy.		
12 inches long. Weight 4 lbs.		
Covered with carpet		\$1.50
No. 7 D. 14 inches long. Weight 9 lbs.		
Flat slanting top.		
Covered with carpet	•	2.25
Clark Coal, 1 doz. bricks in box, weight 71/2 lbs.		· <b>7</b> 5
Case of 100 bricks		6.00

The Disinfectant that paints. Use it instead of whitewash. Put on with a brush or sprayer. A snow white cold water paint that will not blister, flake or peel off, combined with a germicide 20 times stronger than carbolic acid but neither caustic nor poisonous. Particularly good for use in stables, cow barns, chicken coops, dairies, hog pens, creameries, cellars, factories and outbuildings.

The necessity of absolute cleanliness and complete sanitation in barns, pens and stables where poultry and livestock are kept, if they are to thrive and produce as profitably as they should, has been pointed out by the Department of Agriculture, by Experiment Stations and by farm and poultry papers too often to be repeated here. Failure to keep their living quarters clean and sanitary is the surest means of introducing into flocks and herds the lice and other vermin that sap their vitality, and so reduce their production, as well as the contagious diseases that prove so costly if they once gain a foothold. Carbola can be applied to wood, brick, stone, cement or sand finished walls; to plaster board, tar paper or over whitewash or old oil paint that is hard and firm, but not glossy. It will not blister, flake or peel off, no matter how many coats are put on, and as the mineral pigment used has a greater fire resistance than asbestos it is apparent that several coatings of Carbola will act as an efficient fire retardant. Trial package by parcel post 25 cts. (Paints and disinfectants 250 square feet). Io pounds (10 gallons) for \$1.00, 20 pounds (20 gallons) for \$2.00, 50 pounds (50 gallons) for \$4.00.

### Prairie State Incubators

To those who desire to rear as well as to hatch chicks and ducks, the selection of an incubator is of vital importance. The high death-rate experienced with chicks the first ten days is more frequently due to imperfect incubation than to any other cause. Too many incubators of today are constructed with reference solely to hatching the desired numbers without considering the manner in which they are brought into existence.

Weak, anæmic chicks, lacking in strength and vitality, are of no value, if you hatch thousands; hence the importance of carefully considering the merits of an incubator in this direction before making a selection.

The Prairie State Sand Tray Incubators have proven themselves by thousands of tests, both in the hands of the novice, as well as in comparative results obtained by the large poultry plants using different makes of incubators.

The perfect construction and automatic heat regulation of these machines makes them easily operated and results doubly certain.

No. 0.	100 Eggs	\$21.50

Southboro, Mass.

Prairie State Incubator Co., Homer City, Pa.:

the chicks so uniformly good as the "Prairie State" has.

When they commence to hatch, they come out like
Pop-Corn and clean up in a few hours, no dragging along
a day or two.

W. R. GRAVES,

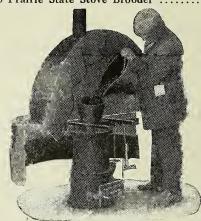

Ex-Pres. American Poultry Ass'n.

## Prairie State Stove Brooder

The Prairie State Stove Brooder is of solid cast iron construction and will, therefore, last indefinitely. Its fire bowl is of ample capacity, which will positively carry a fire overnight and last an extra margin of from five to eight hours. No sheet iron enters into the construction of the stove. There is no coal magazine, consequently no bridging of ashes or coal, no belching of smoke into the brooder room. The chicks are comfortably warm over their backs by the deflection of heat over the canopy, which is the only correct way in brooding. The canopy is hinged and easily lifted, giving ready access to the stove and regulator and reduces to the lowest terms, the labor involved in charging the fire box. The canopy is

of flat construction, permitting deflection of heat and, at the same time, preventing rapid radiation above the top. The regulator is at once automatic, sensitive and simple, giving triple control with one motion of the lever and assuring positive action at all times. The lower door is not a part of the regulating system and needs never be opened except for the removal of ashes. The Prairie State Brooder is not a makeshift, hastily placed upon the market to meet competition, but is an equipment of splendid design, characteristic of Prairie State methods and has been brought out only after most careful thought and experimenting on the part of our Company.

Sr. Prairie State Stove Brooder \$30.00
Jr. Prairie State Stove Brooder 18.00
No. 0 Prairie State Stove Brooder 13.00

Holliston, Mass., June 26th, 1914.

Joseph Breck & Sons, Boston, Mass.:

Dear Sirs:—We have your inquiry of June 24th regarding the Prairie State Stove Brooders we have installed. The first installation of one brooder decided us to put in twenty, and after operating the twenty, we put in another twenty. We have now forty brooders in operation on our Holliston, Mass., plant, and about twenty more at our other branches. We brood 500 chicks to a brooder, making a total of about 30,000 chicks now being brooded under your brooders.

We do not think further comment is necessary.
PITTSFIELD POULTRY FARMS CO.,

Per Howard Gilmore.

# Prairie State Brooders and Hovers

The Prairie State Brooders and Hovers are made in the most thorough manner. The No. 1 Brooder is, in fact, a colony house, as the hover can be removed and attached to another house. The No. 2 and No. 3 are constructed on the same general plans as the No. 1, only they are smaller in size.

The Universal Hover has stood the test of a number of years and has proved to be one of the most successful of brooders. It is easy to attach to any colony house or box. The lamp box is placed on the outside of the colony house, thus making it very easy for the attendant to look after the lamp.

The Portable Hover is just what its name indicates, a hover that can be moved from one house to another at any time. This hover is constructed entirely of galvanized sheet steel. No wood or other inflammable materials are used. It is insulated thoroughly with asbestos and mineral wool. Every inch of the inside of this house is available for brooding purposes and is uniformly heated throughout, there being no hot or cold spots.

### **DAZEY CHURNS**

The Dazey cannot be compared with any other churn, because there is such an immense difference. It is not an imitation; it is an entirely new departure in churn making. It is better. Any churn will agitate and make butter, but the Dazey is the only one that produces butter in its natural condition.

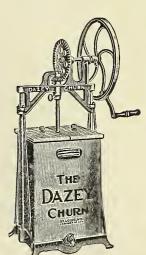

Descriptive circulars mailed on application.

### Hall Dandelion Puller

### Water or Sand Ballast Rollers

The "Water Ballast Lawn and Garden Roller" idea is a brand new one and by the introduction of this type of tool, the old style, clumsy, iron and steel weighted machines are relegated to oblivion. The "Anyweight" system is one particularly pleasing to the user, as but a moment's time is required to obtain any weight from 115 pounds to ½ ton, suitable to condition of ground or strength of operator. To weight the machine, turn on end, remove pipe plug by unscrewing, insert garden hose or, if necessary, use pail and funnel, fill the drum to any desired weight, screw in the threaded plug and your machine is ready for business.

Furnished complete with wrought iron handles and counter-weights.

### I. X. L. Galvanized Steel Chain Pump

There has never been a better device for raising water from the well than the old-fashioned chain pump with rubber buckets. The galvanized tubing does not make the water taste, it cannot rust, and will not rot or accumulate filth. This pump is antifreezing and can be used in wells that are fifty feet deep or under successfully, giving sixteen gallons of water per minute.

# Planet Jr. Farm and Garden Tools

Why worry along with slow out-of-date implements and meagre results? Planet Jr. tools are far more economical—they do 3 to 6 times the work, get bigger, better crops, and outlast several ordinary implements. FULLY GUARANTEED. You are actually losing money whenever you cultivate without them. Send for special PLANET JR. CATALOG.

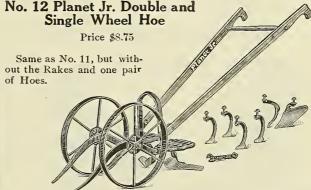

No. 4 D, Hill and Drill Seeder, same as above less the cultivating attachments, \$10.75.

a small packet of garden seed with great precision. Quickly changed to a splendid wheel hoe. A special machine for the small gardener.

No. 11 Planet Jr. Double Wheel Hoe, Cultivator, Plow and Rake price \$11.00 A single and double wheel hoe in one. Straddles crops till 20 inches high, then works between. Has steel frames and 14-inch steel wheels. The greatest hand cultivating tool in the world.

#### No. 13 Double and Single Wheel Hoe Price \$6.00

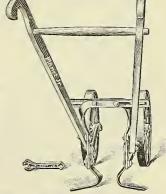

This tool is the No. 12, with 6-inch hoes only, these being the tools that are most used. Any of the attachments shown with No. 11 may be added at any time.

No. 60 Planet Jr. Double Wheel Onion Hoe

Price \$5.25

This new tool is a departure from all previous Wheel Hoes. It is adjustable for the complete culture of onions, or general hoeing. The new all-steel hoes are a decided improvement over the older models. We offer a special Onion Harvester for this tool.

It will sow even

Price, \$1.50 No. 65 Planet Jr. Slide Hoe Price \$3.00 S DETERMINE TO

Admirable for all between-rows workings. Light, strong, easy running.

# Planet Jr. Farm and Garden Tools

Old-time farming no longer pays—these scientific tools do the work of 3 to 6 men, give bigger yield, and save their cost in a single season. Invented and made by a practical farmer and manufacturer, with half a century's experience. Planet Jrs. are strong and lasting. Every tool fully guaranteed.

Come and let us convince you of their economy.

The highest type of Single Wheel Hoe made. Light but strong, and can be used by man, woman or boy. Will do all the cultivation in your garden in the easiest, quickest, and best way.

### No. 17 Planet Jr. Single Wheel Hoe

Price, \$6.25

Same as No. 16, but without the Rakes and Leaf Lifter. These Single Wheel Hoes have steel frames and 15-inch steel

### No. 17½ Planet Jr. Single Wheel Hoe

Price, \$5.50

This tool is identical with No. 16, except in equipment. The pair of 6-inch hoes, three cultivator teeth and leaf lifter which go with it, are all the finest of their kind.

#### No. 18 Single Wheel Hoe

Price, \$4.50

This has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season. Other attachments can be added as needed.

This combination will delight the suburbanite, the growing boy, women, younger or older, who will find it a light running wheel hoe that will save them hard work and help much to supply the table with fine vegetables.

#### 72-PAGE PLANET JR. CATALOG FREE

Describes 70 tools, including Seeders, Wheel Hoes, Horse Hoes, Harrows, Orchard and beet Cultivators. Write Postal for It

#### No. 90 Planet Jr. 12-Tooth Harrow, Cultivator and Pulverizer

Has new steel wheel which prevents clogging. Its 12 chisel-shaped teeth cut out all weeds, stir and mellow the soil and leave the ground in the finest condition without throwing dirt on plants.

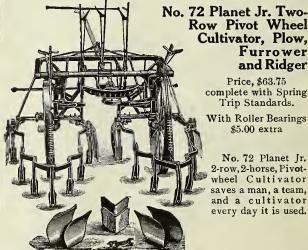

Non-clogging steel wheel. Depth regulator and extra long frame make it run steady.

#### No. 9 Planet Jr. Combined Horse Hoe and Cultivator

Price, with Steel Wheel, \$10.00

Is identical with No. 8, except that it has no depth regulator, and has a plain wheel instead of a lever wheel.

No. 72 Planet Jr. Two-Row Pivot Wheel Cultivator, Plow, Furrower and Ridger Price, \$63.75

> Trip Standards. With Roller Bearings \$5.00 extra

> No. 72 Planet Jr. 2-row, 2-horse, Pivotwheel Cultivator saves a man, a team, and a cultivator every day it is used.

Cultivates 2 rows of corn, potatoes, beans, etc., at one passage, even if rows are crooked or irregular width. In check rows and listed corn it also beats any other tool. Can be equipped with spring-trip standards, discs, sweeps, hoe steels, and fur-rowing shovels. Specially hardened cultivating steels add 50 per cent to wear.

Price complete - - - - - - \$7.00

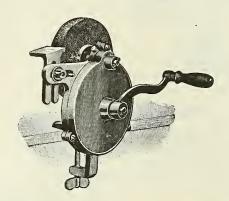

### "Favorite" Cream Separators

The "Favorite" Separators are made in Stockholm, Sweden, and are especially designed for the small milk producer and for family use. Thoroughly made from the finest material. Cleaning can be easily done in a moment's time. These separators have a regulator, making very even or sharp skimming. Only 70 R. P. M. are necessary, and at this speed skim evenly and with great ease, and can be regulated so that a percentage of cream (say 15%) may be obtained. Complete Instruction Manual sent with each separator.

No. 1 "Favorite," about 40 quarts per hour, net price, \$20.00 No. 2 " " 60 " " " 25.00

#### American Grinders

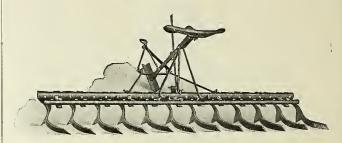

#### American Grinders Give Universal Satisfaction

Light and quiet running. (Each grinder runs as though mounted on ballbearings). Simple in design. Only grinder made with absolutely oil tight casing. All working parts inclosed. Every part is interchangeable. The general construction of all American grinders is powerful and pleasing in appearance. Lock screw adjustment nut for taking up slack and wear in spindle.

### ACME Pulverizing Clod Crusher Harrow and Leveler

No. 17. 61/2 Foot, Cut Rigid Frame, 2 Horse, Standard Type

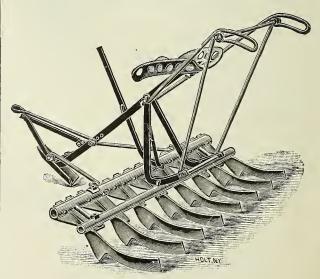

A general purpose Harrow for the farm, the truck tarm or the orchard. The man who owns an "Acme" is completely equipped for the preparation of perfect seed-beds after plowing regardless of the character of soil he has to work. Everything that a Harrow ought to do, the "Acme" does.

It cuts, crushes, turns, smoothes and levels, all in one operation. The shape of the coulters permits trash and sod turned under by the plow to remain beneath the surface, adding a valuable fertilizer to the soil. Other Harrows tear this up and permit it to waste on the surface.

It is made entirely of steel and iron, is practically indestructible, and such repairs as may be necessary after long use, as new coulters, may be had at a minimum cost.

Size	Width	Description	Standard	XL
G	3 ft. 0 in.	1 Horse	\$12.00	\$12.85
H	4 " 4 "	1 "	18.00	19.15
17	6 " 6 "	2 "	21.00	22.70

24	13 " 6 "	4 "	52.50	55.90
27	17 " 6 "	4 "	60.70	65.20

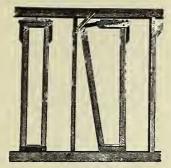

X L Series Harrows. Same sizes as regular Harrows, but equipped with X L coulters which are longer, overlap and have more flare. Ideal for killing small weeds as the whole surface is cut over; also extensively used for summer fallowing

Size H. 1 Horse, 4 ft. 4 in. Cut

We have sold the "Acme" Harrows for many years, and customers who have worn out their second Harrow tell us that they can find no other Harrow that will do the work of the "Acme" in preparing the ground for seeding. Nos. G, H and 17 standard type from Boston stock.

### Breck's Improved Swing Stanchion

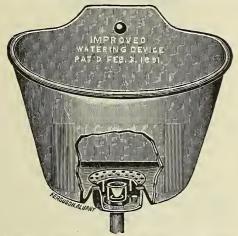

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

they can rest the head upon the body as when in pasture.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

Our net price, each, \$1.75

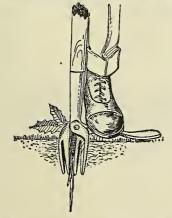

### **Buckley's Patent Watering Device**

The above illustration shows the general application of this system, but a brief description will be necessary to demonstrate its **importance**, usefulness and simplicity. On application we will mail descriptive catalog with testimonials. etc.

No. 2 Stanchion Basin, with Valve (18 lbs.)
Our net price, each, \$1.50

### Simplex Automatic Weed Puller

You will find it a pleasure to weed your lawn with the Simplex Automatic Weed Puller. "It pulls 'em out by the roots, they can't come back." It's guaranteed. (4 lbs.)

Our net price, each, \$1.00

### Clipping and Shearing Machines

If properly stabled, well fed, carefully groomed, and clipped in season, a horse will continue in good health and appearance. His value will not impair and he will do good work. Whether you own but 5 sheep or 5000, you cannot afford to overlook the merits of the sheep shearing machines. Machine shorn wool brings the highest price because the machine gets the wool that is next to the skin and that is the best wool of the whole fleece. Hand shears always leave this wool on.

### Superior Sanitary Churn

The Superior Sanitary Churn is made with the idea of furnishing the butter maker with a churn that will not absorb any moisture whatever, making it absolutely sanitary. It is very easy to wash and dry, there being no reason for placing it out in the sun to dry, or in the basement to keep it from leaking. It costs more than the ordinary churn and is worth more. The difference in price is nothing when you consider the difference in quality. The labor saved each year, the satisfaction of knowing there is nothing about your churn that will taint the butter, and that your churn will be just as sweet after use as when new. Power attachments can be furnished for the sanitary churns. Circular and prices mailed on application.

### Porter Sanitary Barn Equipment

The cleanliness, convenience, and comfort of Porter Equipment will swell your dairy dividends. The better care you give your cows, the better they will pay you. Stable them in light, clean, comfortable, sanitary quarters and they'll require less feed, keep freer from disease, produce more milk, with a higher percentage of butter fat, and your milk and butter will bring top notch prices. These are facts proved over and over again in the experience of successful dairymen who are using Porter in the experience of successful dairymen who are using Porter Litter Carriers, Feed Carriers, Stalls and Stanchions. Porter Equipment in your barn will mean a big boost for extra profits, for it's built with practical common-sense understanding of the care the Dairy Cow needs for best results. It keeps the stalls clean, prevents waste of feed and manure—gives your cows the best chance to show what they can earn for you.

Descriptive Catalogues and Price Lists mailed on application

#### Breck's Couch Hammock

The "Sam-O-Set" is undoubtedly the most comfortable and durable couch hammock made (see cut). All the undesirable features of the ordinary hammock eliminated. Frame, steel tubing and angle steel. Bottom, diamond fabric. Mattress, 4-inch box, soft top and bottom covered with duck, tutted. Hammock, 12-oz. khaki duck. Magazine pocket in end. Luxury adjustable back. Ropes and hooks for hanging.

### Iwan's Post Hole Auger

This is the only auger that has met with universal satisfaction under all conditions of soil. It is effective in operation, and unexcelled for easy and quick work; no suction when removed from the hole.

An operator can do three times as much work as with any other auger or digger now in use. The condition of the ground makes no difference. Whether wet or dry it simply gets there every time.

Total length of 12 and 14 inch sizes, 6 feet. All other sizes 4 feet.

### Dolen's Refuse, Waste and Leaf Burner

A portable steel furnace for the rapid and convenient destruction of all leaves, refuse and waste matter.

In reality a two-wheeled hand cart (for which purpose it can be used), made of strong steel angle iron and heavy steel netting, which is fireproof and guaranteed not to burn out.

netting, which is fireproof and guaranteed not to burn out.

Is fitted with broad tired wheels, which enables it to be pulled along with the cleaning-up squad on lawns or soft ground without injury. A strong steel pan is fitted under the axle which catches all the fire and ashes as they fall through the bottom. This pan can be easily emptied as needed.

bottom. This pan can be easily emptied as needed.

The unsightly burned spots on lawns and black streaks of ashes on paths and drives is done away with and all danger of fire eliminated.

nre eliminated.

Against the cost of hauling the leaves and rubbish to a convenient spot for burning, the leaf burner will pay for itself twice over in one season.

A number are already in use in public and private places, and the names of satisfied customers will be gladly supplied if desired.

### Banner Root Cutter No. 31

Made entirely of iron and steel. A positive feed—it must cut. The roots cannot get away from the knives. It has 19 gouge-shaped steel knives, fastened from the inside with two bolts to a cast iron cone-shaped drum. They project through the round openings in the drum about ¾ of an inch, and every time the drum turns around once, the knives hit and cut the roots 19 times. The drum is driven by gear wheels with the power in favor of the operator, so it makes an easy running Root Cutter, with good capacity. The hopper is 24 inches in diameter at the top, 11 inches at the bottom, and 16 inches deep.

### Walking Weeder

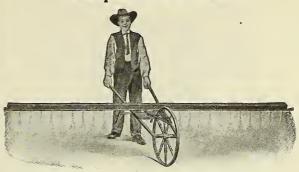

Simple in construction, but nevertheless carefully designed, and embodies features that distinguish this tool from other weeders. Best material used throughout. Shafts fasten to front tooth bars, and handles fasten to front of frame.

Can also furnish Two-Horse Riding Weeders.

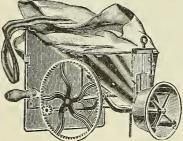

Descriptive circular and price on application.

#### Thompson Grass Seeder

This seeder is arranged to sow all chaffy seeds such as red top, orchard grass and blue grass, and all seeds like timothy, hungarian and clover, in any quantity from 6 to 40 quarts to the acre, mixed or separate. The hopper being carried close to the ground, the sowing is not affected by the wind.

#### The Cahoon Broadcast Seed Sower

For sowing Grass Seed and all kinds of Grain from 4 to 8 acres per hour. At common walking gait will throw wheat 40 feet.

The acknowledged superiority of these machines has placed them in the front rank of labor-saving agricultural implements. A saving of four-fifths of

the labor and one-third of the seed is effected by their use, and a person entirely unused to sowing by hand can use this machine with perfect success. They are warranted to give perfect satisfaction and to save their cost in less time than any other farm implement, and with ordinary care will last many years.

### Masters Rapid Plant Setter

Here it is. The tool that truck growers have wanted for years. The MASTERS RAPID PLANT SETTER is the ideal tool for transplant ing Cabbage, Tobacco, Sweet Potato, Cauliflower, Tomato, Strawberry, and all similar plants.

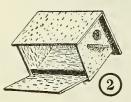

Each plant is put into the ground just the right depth, set, watered and cov-

ered in one operation. NO STOOPING AND NO LAME BACKS. Saves labor, does perfect work and more than three times as fast as can be done by hand. Will set plants in dryest weather and get a perfect stand. Thousands in use. No up to date Grower can afford to be without one. Satisfaction guaranteed or your money back. Price, \$4.50 delivered to you.

#### BIRD HOUSES

#### Save the Wild Birds

And you'll actually save money for yourself! Every year the farmers and fruit growers of this country spend millions more of YOUR money than they ought to. They allow countless hordes of harmful insects to levy a tremendous tax, and it comes right out of your very own pocket!

Your help will lead to your family's help, your friend's help, your neighbor's help. All of that is needed. Get White's "Suet" Feeding Basket (No. 1) and an "All-in-One" Bird House (No. 2). If you have a bird house now, equip it with the "Three-Hole" Entrance (No. 3).

Whatever care and protection you provide for the valuble songsters will be amply repaid by the pleasure you derive from the "good work."

Special pamphlet on request.

#### ANNUAL LOSS

Statistics prepared by the Bureau of Entomology, offer conclusive proof that the United States suffers an approximate yearly damage, caused by insect pests, of

### Berlepsch Bird Houses Audubon Food Houses Weathercock Food Houses

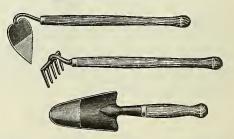

We are prepared to deliver promptly and at reasonable prices, Berlepsch Nest Boxes, Audubon Food Houses, Weathercock Food Houses, and other devices for attracting birds to woodland, farm and garden. The houses are made of such woods as Hemlock, Oak, Ash, Bass Wood, Black Cherry, White Birch, and Yellow Birch, each with the natural bark adhering. Each house has attached to it at the back a hardwood batten, by which it may be fastened to the trunk of a tree, post, or side of a building. No pains are spared to make each individual bird home a perfect specimen of the type; the cavity in the log is practically a facsimile of the natural burrow of a bird, widening out as it descends and curving in again to a rounded point at the bottom.

### Ladies' Floral Set

All handles are hand-turned and hand-finished, and are extra heavy. Tools are all finished in red enamel. These are all practical tools and are put up, each set in a strong box.

#### United States Poultry Fence

The United States Poultry Fence is galvanized after weaving and will not rust as Fencing galvanized before weaving.

The United States Poultry Fence has proven best by test. It has long since established its superiority over other makes, and is in a class by itself. It is built to withstand use and abuse and is guaranteed to give satisfaction.

The United States Poultry Fence is strictly a "No-Sag" poultry fence, as the combination of line and mesh wires, closely woven, prevents any lengthening or narrowing between posts. These features place it a long stride beyond the Hex Mesh Netting, which never fails to narrow and lengthen if you attempt to stretch it to a tension required to prevent sagging.

### Cyclone Sanitary Yard Fencing

Style "F" Fabric is without question the neatest, strongest and most pleasing design yet conceived for ornamental fencing. It will not rot nor burn and being heavily galvanized requires no paint. Note also the sharp corrugation at the bottom of each picket—this effectually prevents the lower cable from being displaced. At the top, pickets of No. 9 wire are spaced 2% inches apart, and woven into a double cable, giving extra strength where the greatest wear comes; an extra picket of the same size interwoven in the lower half, gives a spacing of but 1% inches at the bottom, making it perfectly chicken proof.

### Cyclone Tree Guards

72 inches high x 9 inches in diameter . . Each \$1.00 Descriptive Catalogues mailed on application.

### Breck's Water Glass

Fresh Eggs in Winter at Summer Prices.

Of the various methods devised for preserving fresh eggs, only two have proved successful, viz: Cold storage with a temperature of 34, or the Water Glass Method, the latter being the only practical one for family use.

Water Glass is recommended by the U. S. Department of

Water Glass is recommended by the U. S. Department of Agriculture as being one of the best preservatives, having no chemical action whatever. It simply seals the pores of the shells, keeping the contents of the egg in the same condition as when put into the solution.

If directions are followed, fresh eggs will keep perfectly for a year or longer. Use only Fresh Eggs.

DIRECTIONS.— Use only clean, watertight glass or earthen receptacles, stone earthenware being preferable. To one quart Water Glass, add enough water to make ten quarts of solution Stir or mix thoroughly. Dip each egg in this solution and pack in receptacle, small ends down. Cover eggs with solution to the depth of about two inches. Cover and set away in a cool cellar, out of the sunlight. Discard any eggs that float. If evaporation takes place, add water, but do not disturb or stir the fluid. A five-gallon stone jar with cover would hold fifteen dozen eggs, requiring one-half a gallon diluted, as above, to cover same. Do not use m. tal receptacles.

Our Net Price . . . . Per gallon \$0.75

Books and other publications. Books and other publications.

Seeds in bulk, plants, nursery stock, fertilizers, insecticides, horticultural sundries and agricultural hardware forwarded by Parcel Post, express or freight, as purchaser may direct; or in the event of there being given no shipping instructions, we will use our judgment and endeavor to ship in a way that will best protect our customer's interests.

After taking receipt for goods in good order from transportation company, our responsibility ceases.

We would impress on our friends the importance of sending us their orders early. Please do not wait until spring, when we are so rushed that there is sometimes an unavoidable delay in filling orders.

Use the order sheet which we send you with this catalog and giving us, written plainly, your name, post office address and shipping instructions.

We recommend that all plants and nursery stock be shipped by express; all such orders will be forwarded direct from our Nursery, the Breck-Robinson Nursery Co., Monroe Station, Lexington, Mass., and at our customer's expense, unless special arrangements are made regarding delivery at time order is placed.

PACKING. We make no charge for boxes or packing on orders at catalog prices. We charge for cotton bags as follows: 2 bushels, 24c. cach; 1 bushel, 15c. cach; ½ bushel, 12c. cach; ½ bushel, 8c. cach; ½ bushel, 6c. cach. On flower pots and other fragile articles, packages will be charged

1 bushel, 15c. each; ½ bushel, 12c. each; ½ bushel, 8c. each; ½ bushel, 8c. each; ⅓ bushel, 9c. each. On hower poes and other raghe articles, packages who contained extra at cost.

PRICES. Our prices are as low as those of any reliable dealer on the same quality of goods. For large orders, or on orders for export, we will be pleased to quote special prices.

SHPMENTS BY PARCEL POST. Seeds in packages and in bulk, bulbs and the majority of the articles shown in the Horticultural, Sundry, Insecticide and Hurdware Sections of our catalog, can be delivered at your door or post office by Parcel Post. To enable our customers to estimate the amount which they should remit to cover Parcel Post charges, we give below a table of Parcel Post rates and condensed instructions in regard to Parcel Post shipments. The approximate weights of the seeds sold by measure, including the weight of container, is as follows: Peas, beans and corn weigh approximately 1 pound per pint, including containers; potatoes, 2 pounds to the quart, 15 pounds per peek and 60 pounds per bushel.

On all sundries, Insecticides, Tools and other merchandise which can be sent by Parcel Post, we have given the approximate weights in brackets, thus () and by referring to the table of Parcel Post rates you can readily ascertain the exact amount to remit to cover cost of postage and delivery to your door.

#### TABLE OF PARCEL POST RATES

Rates of postage on Fourth Class or Parcel Post matter—to be fully prepaid—unsealed—are as follows:

 (a) Parcels weighing four ounces or less, except books, seeds, plants, etc. one cent for each ounce or fraction thereof, any distance.
 (b) Parcels weighing eight ounces or less, containing books, seeds, cuttings, bulbs, roots, scions and plants, one cent for each two ounces or fraction thereof, regardless of distance. regardless of distance.

(c) Parcels weighing more than eight ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than four pounds, and all other parcels of fourth-class matter weighing more than four ounces are chargeable according to distance zone, at the pound rates shown in the above table, a fraction of a pound being considered a full pound.

The limit of weight of fourth-class matter is 50 pounds for parcels mailed for delivery within the first and second zones, and 20 pounds for all other zones.

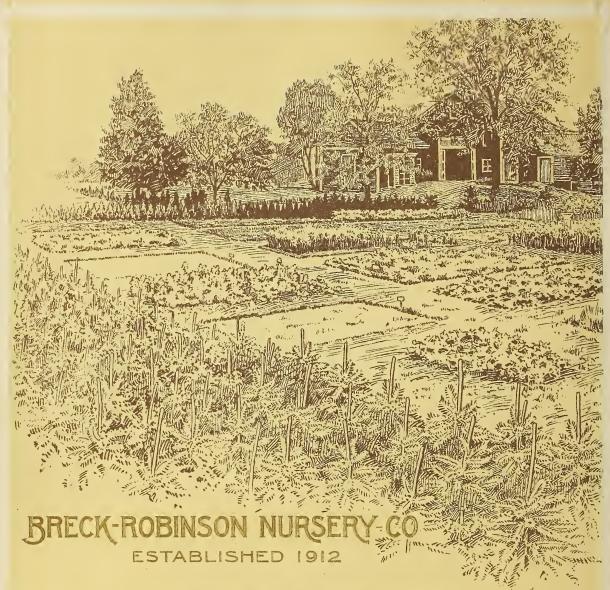

Limit of Size.—Pareel Post matter may not exceed 72 inches in length and girth combined. In measuring a pareel the greatest distance in a straight line between the ends (but not around the pareel) is taken as its length,

the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide, and 5 inches high measures 65 inches in length and girth combined.
